

This Cover Page is an important document.

- It highlights the key features and risks of this product and should be read together with the Policy Illustration, Product Summary and Bundled Product Disclosure Document, if it applies.
- It is important to read the Policy Illustration, Product Summary and Bundled Product Disclosure Document, if it applies, before deciding whether to purchase this product. If you do not have any of these documents, please do not hesitate to ask your representative of either Prudential Singapore or a distributor duly appointed by Prudential Singapore for a copy.
- You should not purchase this product if you do not understand or are not comfortable with the risks of this product.

PRUApex Legacy Index

Product Type	Indexed Universal Life Plan
Premium Payment Term	Single Premium
Policy Term	Whole Life
New Money Crediting Rate (Fixed Account)	4.20%
Current Crediting Rate (Fixed Account)	4.10%
Current Assumed Crediting Rate (Index Account)	6.60% for S&P 500 Index
Guaranteed Minimum Crediting Rate	2.00% for Fixed Account 0.00% for Index Account
Name of Insurer	Prudential Assurance Company Singapore (Pte) Limited
Policy Currency	US Dollars

WHAT ARE YOU PURCHASING?

This is a non-participating single premium universal life plan. It is a product which offers you insurance coverage and also invests part of your premiums in the insurer's Non-participating Fund. It comprises guaranteed and non-guaranteed benefits and may not be suitable for you if you want all benefits to be guaranteed.

WHAT ARE THE KEY RISKS OF A UNIVERSAL LIFE PLAN?

By purchasing a universal life plan, your premiums will be pooled together and invested with premiums from other policyholders in the Non-participating Fund managed by Prudential Assurance Company Singapore (Pte) Limited. As a policyholder, the key risks commonly associated with universal life plan are:

Investment Risks	Lower than expected investment returns earned by the fund
Insurance Risks	Higher than expected claims made by policyholders (e.g. due to death or other terminations)
Expense Risks	Higher than expected expenses paid for managing the Non-participating Fund
Currency Risks	If your home currency is not denominated in US Dollars, the payments you make or receive may be worth less over time when expressed in your home currency

These risks can affect the crediting rate to be declared to and the charges to be taken off from the policy, which in turn affect the account value.

Your policy will lapse if the account value is insufficient to pay for the charges. In order to keep your policy in force, you may need to pay additional premium(s).

**ARE THE UNIVERSAL LIFE ILLUSTRATED CREDITING RATE GUARANTEED?**

The Policy Illustration shows two crediting rates – Guaranteed Minimum Crediting Rate and Current Crediting Rate. Current Crediting Rate is not guaranteed and may increase or decrease after the guaranteed period, subject to the Guaranteed Minimum Crediting Rate as a minimum floor. The Guaranteed Minimum Crediting Rate is guaranteed by the company.

ARE THE UNIVERSAL LIFE ILLUSTRATED CHARGES GUARANTEED?

The Policy Illustration shows two charges – current and maximum charges. Some charges may increase or decrease after the guaranteed period. Should the charges increase from their current level, a larger deduction will be made and this will impact the account value of your policy. We may adjust the charges according to factors such as the expected future claims and expenses. However, the charges will never exceed the maximum level stated in your policy contract.

You may refer to the product summary for the details of the current and maximum charges for the policy.

WHAT RETURNS CAN YOU EXPECT FROM THIS POLICY BASED ON THE ILLUSTRATED CREDITING RATES AND CHARGES?

Based on the Current Crediting Rate for Fixed Account of 4.10% p.a., Current Assumed Crediting Rate for S&P 500 Index of 6.60% p.a., Loyalty Crediting Rate (applicable on the 11th policy year onwards for Fixed Account only) of 0.35% p.a. and current charges, your total Illustrated Yield upon surrender at age 71 is 3.91% p.a.

Based on the Guaranteed Minimum Crediting Rate for Fixed Account of 2.00% p.a., Guaranteed Minimum Crediting Rate for Index Account of 0.00% p.a. and maximum charges, the policy is projected to have lapsed before age 71.

Financial Consultant's Signature

Proposer's Signature

The total Illustrated Yields upon surrender have not taken into consideration any additional premiums paid, partial withdrawals made and loans taken. Please refer to the Policy Illustration for assumptions made. The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the Guaranteed Minimum Crediting Rate) and charges (subject to the maximum charges) as well as the amounts of any additional premiums paid, partial withdrawals made and loans taken.

Depending upon actual experience, you may need to make additional premiums payment to keep the policy in force.

You can compare 3.91% Illustrated Yield upon surrender at age 71 with the returns of Singapore Savings Bonds and Singapore Government Securities. You may refer to <https://www.mas.gov.sg/bonds-and-bills> for more information on the returns of Singapore Savings Bonds and Singapore Government Securities. Please note that the Illustrated Yield upon surrender at age 71 take into account the cost of insurance and expenses paid.

HOW MUCH WILL YOU NEED TO PAY FOR ADVICE?

The total distribution cost of this product is the amount that you will pay for advice and for other distribution related expenses. It includes cash payments in the form of commissions and benefits paid to the distribution channel and its representative(s) who have provided you with financial advice. This is not an additional cost to you as it has been included in the premiums payable for this plan.

The Total Distribution Cost for this plan is US\$175,671 as shown in the Policy Illustration. This makes up 24.8% of the total premiums payable.

WHAT HAPPENS IF YOU SURRENDER YOUR POLICY EARLY?

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid.

OTHER IMPORTANT INFORMATION

After purchasing a life insurance policy, you have a 14-day free-look period starting from the day you receive your policy documents to review the documents carefully. During this time, if you choose to cancel your policy, Prudential Singapore will refund you the premiums you have paid, less any medical fees and other expenses, such as payments for medical check-ups and medical reports, paid by Prudential Singapore.

Introduction

Prudential Singapore believes that it is important that you fully appreciate the benefits of your policy. You should also understand how the cost of your insurance cover and the expenses of administration and sales affect the benefits that you will receive.

The illustration that follows shows how the value of your policy progresses over time and the sum(s) that would be payable. The methods used to derive the values shown follow guidelines established by the Life Insurance Association, Singapore, to ensure that a fair and consistent approach is used in preparing this illustration.

Please note that your policy illustration provides two sets of illustrated values:

(1) Illustrated values at the Guaranteed Minimum Crediting Rates and maximum charges

The crediting rate used in this illustration is a guaranteed minimum that cannot be lowered any further and charges are the maximum chargeable that cannot be increased any further.

(2) Illustrated values at the current crediting rates and charges

The crediting rate used in this illustration, which does not exceed the rate supportable by underlying asset portfolio, is not guaranteed and may be varied at the company's discretion, subject to the guaranteed minimum. Charges are not guaranteed and may be increased in the future up to the maximum limits. The crediting rate and charges used are the rate and charges prevailing at the date of this illustration.

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid.

If you need clarification, please do not hesitate to ask your representative of either Prudential Singapore or a distributor duly appointed by Prudential Singapore.

PRUApex Legacy Index

Specially prepared for : **Client**

Age next birthday : **31 Male / Non Smoker**

Occupation : **Director (admin only)**

(Class 1)

Country of Residence: **Singapore**

(Region A)

Life Status: **Standard**

Automatic Premium Spread: **Yes**

Net Premium Allocation: **Option 1: 0% Fixed Account; 100% Index Account**

Index Account Allocation: **S&P 500 Index = 100%**

Premium Option: **Minimum Premium Option**

Series: **1**

	Sum Assured (US\$)	Policy Term (Years)	Single Premium (US\$)
PRUApex Legacy Index	10,000,000	Whole Life	708,740.00
Accelerated Terminal Illness	5,500,000	Whole Life	

Total Single Premium : **US\$708,740.00**

	<u>Net Premium Allocation</u>		<u>Guaranteed Minimum Crediting Rate</u>	<u>Current Crediting Rate</u>
Fixed Account	0%		2.00%	4.10%
Index Account	100%			
Index Account	<u>Index Account Allocation</u>	<u>Average Cap Rate</u>	<u>Guaranteed Minimum Crediting Rate</u>	<u>Current Assumed Crediting Rate</u>
S&P 500 Index	100%	9.00%	0.00%	6.60%
Current Assumed Index Account Crediting Rate				6.60%

The premium payment received after deducting for charges (Net Premium) goes into the Fixed Account and Index Account according to the selected Net Premium Allocation above.

Premium Option

Minimum Premium Option is the Single Premium required such that the Account Value is projected to equal the sum assured at the life assured's age 100, based on the Current Crediting Rate for Fixed Account of 4.10% p.a., Current Assumed Crediting Rate for Index Account of 6.60% p.a., and current charges prevailing at the date of this illustration.

Higher Premium Option is the Single Premium amount greater than the Minimum Premium Option amount such that the Account Value is projected to equal the sum assured earlier than the life assured's age of 100 years, based on the Current Crediting Rate for Fixed Account of 4.10% p.a., Current Assumed Crediting Rate for Index Account of 6.60% p.a., and the current charges prevailing at the date of this illustration; thereby improving projected sustainability of the policy.

Fixed Account

For the purposes of this Policy Illustration, the Current Crediting Rate for the Fixed Account is 4.10% p.a. and the Guaranteed Minimum Crediting Rate for the Fixed Account is 2.00% p.a.

Index Account

Based on the selected Index Account Allocation above, the Net Premiums allocated to the Index Account (as per Net Premium Allocation) will be allocated into the Index Sub-Account corresponding to the following indices:

i) S&P 500 Index

For the purpose of this Policy Illustration, the Current Assumed Crediting Rate for S&P 500 Index is 6.60% p.a. This is based on the historical back-tested returns of the underlying index, floored at the Guaranteed Minimum Crediting Rate of 0.00% p.a., and capped at the Average Cap Rate of 9.00% p.a..

The Current Assumed Crediting Rate and Average Cap Rate for Index Account is an estimate and not guaranteed. It is not representative of past or future performance of the Index Account. Actual crediting rate used will only be determined at the Segment Maturity Date, based on the performance of the underlying index, subject to the Guaranteed Minimum Crediting Rate and the Cap Rate for Index Account. Please refer to the Product Summary for details on how the actual crediting rate for Index Account is calculated.

The Index Account is made up of the total of the values of the following two accounts: Master Holding Account and Segment Holding Account.

Net Premiums allocated to Index Account (as per Net Premium Allocation) are temporarily held in the Master Holding Account before it is transferred to the Segment Holding Account on the Segment Creation Date. The amount kept in the Master Holding Account will earn a crediting rate that is the same as the prevailing crediting rate of the Fixed Account.

Under the Segment Holding Account, segments are created on the 15th of the month ("Segment Creation Date") and will run for a year. The first segment will be created on the 15th of the next calendar month following the Cover Start Date. The segments will mature on the 15th of the same month in the following year ("Segment Maturity Date"). Once matured, it will automatically reinvest into a new segment for another year.

The crediting rate at segment maturity is subject to the Index Account Cap Rate and the Guaranteed Minimum Crediting Rate of 0.00%. The Cap Rate may change between Segments and will not be lower than the Guaranteed Minimum Cap Rate of 3.00%. We will inform you if the Cap Rate has changed, and any change will apply only to the new Segments created after the effective date of change.

For the purpose of this Policy Illustration, it is assumed that the Net Premiums allocated into the Index Account (as per Net Premium Allocation) are held in Segment Holding Accounts on the Cover Start Date.

Please refer to the Product Summary for the details of the Master Holding Account, Segment Holding Account, Segment Creation Date, Segment Maturity Date, and Index Account Cap Rate.

Automatic Premium Spread:

If Automatic Premium Spread option is selected, any amount allocated into Index Account will gradually be transferred from the Master Holding Account to create Segment Holding Account over a 12-month period on the Segment Creation Date.

Automatic Premium Spread is applicable only to Index Account. It aims to reduce the volatility of Index Account's return by creating multiple Segment Holding Accounts, which is also the concept of Dollar Cost Averaging. This Policy Illustration assumes a level crediting rate and does not illustrate the Automatic Premium Spread.

Other Key Notes:

We will pay the Minimum Surrender Value at the time of full surrender if it is higher than the Policy Value less Surrender Charge. Minimum Surrender Value is determined using a fixed crediting rate of 2.00% p.a. throughout the policy term, regardless of the actual Account Value in the Fixed Account and Index Account.

Please refer to the Product Summary for details.

Important Notes:

This Policy Illustration is for illustrative purposes only and shall not constitute a contract. The precise terms and conditions of this assurance plan are specified in the policy document.

Prudential Singapore reserves the right to change the crediting rates and charges. However, the revised crediting rates and charges are subject to Guaranteed Minimum Crediting Rate and Maximum Charges respectively.

The current crediting rates and current charges applied in the illustration are the rates and charges prevailing at the date of this illustration. This Policy Illustration will only be valid if your policy is incepted before any revision of crediting rates and/or charges are effected.

The sum assured above may be reduced at the issuance stage due to issuance limits imposed on a per life basis and/or underwriting assessment at the discretion of Prudential Assurance Company Singapore (Pte) Limited ("Prudential Singapore").

The illustrated values are calculated based on several factors including age, sex, country of residence and the underwriting class or rating shown in the Policy illustration. If a different rating is assigned during the underwriting process, it will affect the actual values and benefits.

Life insurance is a contract of utmost good faith and you are required to disclose in the proposal form fully and faithfully all the facts which you know or ought to know, as otherwise the policy issued may be void.

If you need clarification, please do not hesitate to ask your representative of either Prudential Singapore or a distributor duly appointed by Prudential Singapore.

What is the significance of the Illustrated Investment Rate of Return?

The illustrations have been prepared on two sets of assumptions regarding the crediting rate and charges applicable to the policy:

1. Illustration A – Illustrated values at the Guaranteed Minimum Crediting Rates and maximum charges represent the lower benefit limits of the policy

The Account Value, Surrender Value and Death Benefit are illustrated based on the:

- (a) Maximum Charges, which are the maximum amount of Premium Charge, Assurance Charge and Admin Charge that are billed to your account; and
- (b) The following crediting rates:
 - (i) New Money Crediting Rate for Fixed Account of 4.20% p.a. is applied for the Guaranteed Period of 1 year.
 - (ii) Guaranteed Minimum Crediting Rate for Fixed Account of 2.00% p.a. is applied after the Guaranteed Period of 1 year.
 - (iii) Guaranteed Minimum Crediting Rate for Index Account of 0.00% p.a. is applied throughout the policy term.
 - (iv) Loyalty Crediting Rate of 0.35% p.a. is added to the Guaranteed Minimum Crediting Rate from the 11th Policy Year onwards. Loyalty Crediting Rate is applicable to Fixed Account only and is not applicable for top-up premium (if any).

2. Illustration B – Illustrated values at the current crediting rates and current charges prevailing at the date of this illustration

The Account Value, Surrender Value and Death Benefit are illustrated based on the:

- (a) Current Charges, which are the current amount of Premium Charge, Assurance Charge and Admin Charge that are billed to your account; and
- (b) The following crediting rates:
 - (i) New Money Crediting Rate for Fixed Account of 4.20% p.a. is applied for the Guaranteed Period of 1 year.
 - (ii) Current Crediting Rate of 4.10% p.a. for Fixed Account is applied after the Guaranteed Period of 1 year.
 - (iii) Current Assumed Crediting Rate[^] of 6.60% p.a. for Index Account is applied throughout the policy term.
 - (iv) Loyalty Crediting Rate of 0.35% p.a. is added to the Current Crediting Rate from the 11th Policy Year onwards. Loyalty Crediting Rate is applicable to Fixed Account only and is not applicable for top-up premium (if any).

[^]Based on Current Assumed Crediting Rate for S&P 500 Index of 6.60% p.a.

Note:

1. The actual crediting rates applicable to your policy may be different to those shown in the illustrations, which are used purely for illustrative purposes. The actual rates may be higher or lower depending on future investment performance. The actual rates applicable to the Index Account in your policy further depend on the actual performance of the underlying index and the actual cap rate. The Cap Rate can vary for each Index Segment and subject to our review from time to time, it will not be lower than the Guaranteed Minimum Cap Rate.
2. The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the Guaranteed Minimum Crediting Rate) and actual charges (subject to the maximum charges), as well as the amounts of any top-up, partial withdrawals and loans taken.
3. Depending upon actual experience, you may need to make additional premiums payment to keep the policy in force. Your policy will terminate if there is no more or insufficient Account Value to pay the charges.

What is the Illustrated Yield upon Surrender?

The Illustrated Yields upon Surrender represent the annualised investment return you may receive upon the surrender of the policy at the age of 71, net of the cost of insurance and charges, based on the Illustrated Crediting Rates and Charges.

The Illustrated Yields upon Surrender based on current crediting rates and current charges is not guaranteed and do not represent the upper and lower limits on the yield you could receive on this policy.

The total Illustrated Yields upon Surrender have not taken into consideration any additional premiums paid, partial withdrawals made and loans taken. The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the Guaranteed Minimum Crediting Rate) and actual charges (subject to the maximum charges) as well as the amounts of any additional premiums paid, partial withdrawals made and loans taken.

Please note that the guaranteed benefit you receive upon the surrender of the policy may be less than the total premiums paid.

What do the columns in the table of deductions mean?

1. "Value of Premiums Paid To-date" is obtained by accumulating the premiums paid to date at the Illustrated Investment Rate of Return, assuming the premiums paid can be invested without deduction for the cost of insurance and without any expenses.
2. The difference between the "Value of Premiums Paid To-date" and "Surrender Value" represents the "Effect of Deductions To-date". This is the Account Value of the deductions for the cost of insurance, distribution cost, expenses, surrender charge, expected tax payments, and expected transfers to shareholders (for participating policies).

How much are you paying for distribution costs?

This table shows the total costs of distribution that Prudential Singapore expects to incur in relation to your policy, including the cost of any financial advice provided to you.

TOTAL DISTRIBUTION COST		
End of Policy Year/Age	Total Premiums Paid To-date (US\$)	Total Distribution Cost To-date (US\$)
1/32	708,740	175,671
2/33	708,740	175,671
3/34	708,740	175,671
4/35	708,740	175,671
5/36	708,740	175,671
6/37	708,740	175,671
7/38	708,740	175,671
8/39	708,740	175,671
9/40	708,740	175,671
10/41	708,740	175,671
15/46	708,740	175,671
20/51	708,740	175,671
25/56	708,740	175,671
30/61	708,740	175,671
35/66	708,740	175,671
40/71	708,740	175,671
45/76	708,740	175,671
50/81	708,740	175,671
55/86	708,740	175,671
60/91	708,740	175,671
65/96	708,740	175,671
70/101	708,740	175,671
75/106	708,740	175,671
80/111	708,740	175,671
85/116	708,740	175,671
89/120	708,740	175,671

What does the last column represent?

1. The Total Distribution Cost To-date is the sum of each year's expected distribution-related costs, without interest. Such costs include cash payments in the form of commission, costs of benefits and services paid to the distribution channel.
2. Please note that the Total Distribution Cost is not an additional cost to you; it has already been allowed for in calculating your premium.
3. You can obtain the Total Distribution Cost of each of the supplementary benefits (if applicable) from your representative of either Prudential Singapore or a distributor duly appointed by Prudential Singapore.

OPOE (VPM V11.1.0) E. & O.E PD

Underwritten by Prudential Assurance Company Singapore (Pte) Limited (Reg. No 199002477Z)

This is a supplementary illustration and must be read in conjunction with the Main Illustration.

Illustration B is illustrated based on the current crediting rates and current charges prevailing at the date of this illustration.

Minimum Surrender Value is illustrated based on the 2.00% p.a. crediting rate and current charges prevailing at the date of this illustration. We will pay the Minimum Surrender Value at the time of full surrender if it is higher than the Policy Value less Surrender Charge. Minimum Surrender Value is determined using a fixed crediting rate of 2.00% p.a. throughout the policy term, regardless of the actual Account Value in the Fixed Account and Index Account.

Please refer to the Product Summary for details.

OPOE (VPM V11.1.0) E. & O.E PD

Underwritten by Prudential Assurance Company Singapore (Pte) Limited (Reg. No 199002477Z)

This is a supplementary illustration and must be read in conjunction with the Main Illustration.

Illustration B is illustrated based on the current crediting rates and current charges prevailing at the date of this illustration.

Illustration C is illustrated based on lower crediting rates and current charges prevailing at the date of this illustration.

The Account Value, Surrender Value and Death Benefit are illustrated based on the:

- (a) Current Charges, which are the current amount of Premium Charge, Assurance Charge and Admin Charge that are billed to your account; and
- (b) The following crediting rates:
 - (i) New Money Crediting Rate for Fixed Account of 4.20% p.a. is applied for the Guaranteed Period of 1 year.
 - (ii) Lower Crediting Rate of 3.50% p.a. for Fixed Account is applied after the Guaranteed Period of 1 year.
 - (iii) Lower Crediting Rate of 5.60% p.a. for Index Account is applied throughout the policy term; and
 - (iv) Loyalty Crediting Rate of 0.35% p.a. is added to the Lower Crediting Rate from the 11th Policy Year onwards. Loyalty Crediting Rate is applicable to Fixed Account only and is not applicable for top-up premium (if any).

Based on Illustration C, your total Illustrated Yield upon surrender at age 71 is 2.33% p.a.

Note:

1. The actual crediting rates applicable to your policy may be different to those shown in the illustrations, which are used purely for illustrative purposes. The actual rates may be higher or lower depending on future investment performance. The actual rates applicable to the Index Account in your policy further depend on the actual performance of the underlying index and the actual cap rate. The Cap Rate can vary for each Index Segment and subject to our review from time to time, it will not be lower than the Guaranteed Minimum Cap Rate.
2. The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the Guaranteed Minimum Crediting Rate) and actual charges (subject to the maximum charges), as well as the amounts of any top-up, partial withdrawals and loans taken.
3. Depending upon actual experience, you may need to make additional premiums payment to keep the policy in force. Your policy will terminate if there is no more or insufficient Account Value to pay the charges.

**PRODUCT SUMMARY: PRUApex Legacy Index**

This Product Summary and Policy Illustration are for illustrative purposes only and shall not constitute a contract. The following is a simplified description of the key product features. The exact terms can be found in the policy document.

Details of Product Provider:

Prudential Assurance Company Singapore (Pte) Limited ("Prudential Singapore"), 30 Cecil Street, #30-01 Prudential Tower, Singapore 049712 Tel: 1800-3330 333

Prudential Singapore is responsible for the product features and contractual provisions and these will be explained to you by a representative of either Prudential Singapore or a distributor duly appointed by Prudential Singapore.

This policy and its Supplementary benefit(s) (if any) is/are protected under the Policy Owners' Protection Scheme which is administered by the Singapore Deposit Insurance Corporation (SDIC). Coverage for your policy and its Supplementary benefit(s) (if any) is/are automatic and no further action is required from you. For more information on the types of benefits that are covered under the scheme as well as the limits of coverage, where applicable, please contact your insurer or visit the General Insurance Association (GIA)/Life Insurance Association (LIA) or SDIC web-sites (www.gia.org.sg or www.lia.org.sg or www.sdic.org.sg).

The Proposer acknowledges receipt of all pages of the Product Summary for the Main plan and Supplementary benefits (where applicable). The contents have been explained to your satisfaction.

Nature and Objective of Plan:

PRUApex Legacy Index is a US dollar denominated single premium whole of life non-participating indexed universal life policy that provides financial protection against death and terminal illness for as long as the life assured lives. The policy works on a dual account structure – a Fixed Account and an Index Account.

When you pay us your single premium, we will apply a premium charge before we place the monies into the Fixed Account and the Index Account according to the option you chose at the start of your policy ("Net Premium Allocation").

From these accounts we will deduct the monthly policy charges and add the crediting rate. This will make up your Account Value.

If you would like more details of how the product and index works, please refer to this link:
<https://www.prudential.com.sg/paliproductdeck>, which we recommend you to read before purchase.

Accounts:

Options of Net Premium Allocation into Fixed Account and Index Account:

When you apply for your policy, you can choose to allocate to the Fixed Account and Index Account with the options below:

- 100% of your premium into the Index Account;
- 20% of your premium into the Fixed Account, 80% into the Index Account;
- 40% of your premium into the Fixed Account, 60% into the Index Account;
- 60% of your premium into the Fixed Account, 40% into the Index Account;
- 80% of your premium into the Fixed Account, 20% into the Index Account; or
- 100% of your premium into the Fixed Account.

The percentages for options above are fixed. You are allowed to switch options after the first policy year.

1. Fixed Account

Starting from the next policy month after the start of your policy, crediting rate that is compounded daily will be credited monthly into the Fixed Account at the New Money Crediting Rate in the first policy year.

For the following years, credited value will be based on the Current Crediting Rate as declared by us and we can change the rate from time to time. However, we guarantee this Current Crediting Rate will not be lower than the Guaranteed Minimum Crediting Rate at any time.

Crediting Rates:

- The **New Money Crediting Rate** is the crediting rate that applies to new monies. This would be the single premium paid and any ad-hoc top-up amount. This crediting rate is guaranteed for the first policy year or the first year of the ad-hoc top up amount. We can change this rate from time to time for future new monies.
- The **Current Crediting Rate** is the crediting rate that applies after the first policy year or first year of ad-hoc top up amount. This crediting rate is not guaranteed and can be changed.
- The **Guaranteed Minimum Crediting Rate** is the crediting rate that we guarantee the Current Crediting Rate declared will not be lower than. This crediting rate is guaranteed throughout the policy term. We can change this rate from time to time for future new monies.
- From the 11th policy year, we add the **Loyalty Crediting Rate** of 0.35% per year to the Fixed Account only. It will be added to the prevailing declared Current Crediting Rate of the Fixed Account to form the total crediting rate of the Fixed Account. It is guaranteed from the cover start date of the policy. The Loyalty Crediting rate does not apply to top-up amounts and to the Minimum Surrender Value.

The crediting rate earned on the Fixed Account for the month will be the New Money Crediting Rate or Current Crediting Rate + the Loyalty Crediting Rate (if applicable), x the Fixed Account value of that policy month.

Policy charges are deducted from this account proportionately as well.

2. Index Account

The Index Account is made up of the total of the values of the following two accounts:

- Master Holding Account; and
- Segment Holding Account

Master Holding Account:

When the net premium allocation is placed in the Index Account, it is temporarily housed in the Master Holding Account before it is transferred into the Segment Holding Account. This is because each segment can only be created on a specific date in each calendar month (this would be the 15th of the month).

Before being used to create the Segment Holding Account, the amount kept in the Master Holding Account will earn a crediting rate based on the prevailing crediting rate that is equal to the Fixed Account, excluding the loyalty crediting rates.

Segment Holding Account:

Under the Segment Holding Account, segments are created on the 15th of the month (“Segment Creation Date”) and will run for a calendar year. The first segment will be created on the 15th of the next calendar month following the cover start date. The segments will mature on the 15th of the same month in the following year (“Segment Maturity Date”). Once matured, it will automatically reinvest into a new segment for another calendar year.

Each Segment will work out its crediting rate based on the performance of index selected and its applicable Segment Cap Rate on a rolling 12-month basis. If the Segment Creation Date or Segment Maturity Date is not a trading day for the index, the index value will be based on the previous trading day. There is no pro-rated crediting rate for any unmatured segment in the Segment Holding Account.

Once the percentage return on the index value is determined, the crediting value to be credited to the policy in each maturing Segment Holding Account is calculated by multiplying the percentage by the Segment’s Average Account Value of the respective maturing Segment.

The Segment’s Average Account Value of a Segment is calculated by adding the Segment Holding Account Value on the 15th of each month, over the 12 months of the segment, then divide the total by 12. If the Segment Creation date and policy anniversary fall on the same day, the Segment Holding Account Value that we use in the calculation on the 15th of the month, will be after we deduct the applicable policy charges.

The Segment Holding Account Value on the 15th of the month will be:

Segment Holding Account Value on the 15th of the previous month, less monthly policy charges, less partial withdrawals (if any)

The amounts allocated into the Index Account will be first kept in the Master Holding Account and subsequently placed into the Segment Holding Account, depending on whether the Automatic Premium Spread option was selected.

- If the Automatic Premium Spread option is not selected, then this allocated amount will be transferred from the Master Holding Account to the Segment Holding Account on the 15th of the next calendar month, in one lump sum.
- If the Automatic Premium Spread option is selected, then this allocated amount will be gradually transferred from the Master Holding Account to the Segment Holding Account starting on the 15th of the next calendar month for 12 months.

If you chose allocation into the index account, the index available is the S&P 500 Index.

For details on S&P 500 Index, you may visit this URL: <https://www.spglobal.com/>

Crediting Rates on Index Account

		S&P 500 Index
Segment Holding Account	Segment Crediting Rate	Based on the 12-Month Index Performance and applicable Segment Cap Rate
	Segment Cap Rate	Based on the prevailing rate on the 15 th of each month upon Segment Creation Date
	Guaranteed Minimum Cap Rate	3.00%
	Guaranteed Minimum Crediting Rate	0%

- Your premiums are not directly invested in the index.
- The Segment Cap Rate is the maximum crediting rate that you can receive.
- The Segment Cap Rate is subject to change on a monthly basis and will affect only the maturing segment that is going to reinvest into a new segment.
- The Guaranteed Minimum Cap Rate is the lowest possible cap rate that we will ever offer.
- The Guaranteed Minimum Cap Rate is subject to change from time to time for future new monies.
- The Guaranteed Minimum Crediting Rate is the minimum crediting rate that you can receive.

Policy charges are deducted from this account proportionately as well.

We can change the following that is related to the Index Account any time:

- a) Removal, replacement, or addition of indices;
- b) Revision of the Index Account Allocation and its composition;
- c) Revision of the Segment Cap Rate for the maturing segment that is going to reinvest into a new segment.

If there is a change in the indices because of any of the following reasons:

- a) Index is discontinued,
- b) Index becomes unavailable to us,
- c) The calculation of the index is substantially changed,
- d) We determine that an index will no longer be used,

we will remove such index or replace it with another index of our choice. We may also add new indices as we deem appropriate.

If we remove the index without a substitute index, we will switch the Index Account Allocation percentage of the affected Index to the remaining available Index. If this happens, we will let you know by giving you written notice of the switch.

Any unmatured segment in the Segment Holding Account will remain in the segment until it matures. The matured proceeds will be automatically transferred to the available Index as determined by us.

Automatic Premium Spread:

The Automatic Premium Spread ("APS") only applies under the Index Account. It creates multiple Segment Holding Accounts to reduce the volatility of the Index Account's return, just like the concept of dollar cost averaging.

You can choose to opt in or out of APS before the cover start date of your policy. Any change in APS (opt-in or opt-out) will only apply to new amounts allocated to the Index Account. Opting-in or opting-out from APS will only apply to new premiums, like top-ups or transfers into the Index Account. The on-going premium spread schedule will continue until the completion of segments creation.

Once opted in, any amount allocated to the Index Account will gradually be used to create Segment Holding Accounts over a 12-month period on the Segment Creation Date. This is the Premium Spread Period. The 12-month period of APS is fixed and cannot be changed.

Here is how APS works, assuming the Net Premium Allocation amount is allocated to the Index Account,

- The Net Premium Allocation amount will first be split into the chosen index composition and then kept in the Master Holding Account.
- Starting from the 15th of the next calendar month, a pre-calculated Premium Spread Amount will be transferred from the Master Holding Account to the Segment Holding Account for a 12-month period. The Premium Spread amount is calculated using the Net Premium Allocation amount allocated to the Index Account and divided equally by 12.

During the Premium Spread Period, the values in Master Holding Account may deplete prior to completing 12-month transfer (for example, because of the deduction of charges). In such case, the APS will end automatically once the value in Master Holding Account has run out.

If there is an additional amount (for example, a top-up) allocated to Index Account during the current Premium Spread Period, and Automatic Premium Spread remains opted in for the policy, such amount will also be first kept in Master Holding Account, and a separate stream of Premium Spread Amount (calculated using this additional amount) will be transferred from Master Holding Account to Segment Holding Account for another 12-month APS period which is independent from the current on-going premium spread schedule.

There is no pro-rated crediting rate for any unmatured segment in the Segment Holding Account.

Account Switch:

After the first policy year, you can choose to switch:

- a) the Revised Net Premium Allocation – the allocation between the Fixed Account and the Index Account, according to the percentage rates available under the Net Premium Allocation.
- b) the Revised Index Account Allocation – the allocation between the Index Account Allocation options of Index choice (if applicable).

If you request for both switches at the same time, the process will start from (a) first, then followed by (b). Once switched, all future Net Premiums (if any) will be allocated accordingly.

You can choose to switch at any time after the first policy year but each switch has to be at least one year apart based on transaction date.

Death Benefit:

What do we pay for Death Benefit?

If the life assured dies, we pay the higher of:

- the sum assured for death shown in your certificate of life assurance; or
- the Account Value, less any terminal illness claim amount already paid out (if any), less any amounts you owe us.

The Account Value will be determined on the date we receive the notification of death.

If death is during the No Lapse Period, we use the date of death to determine if the No Lapse Period is still valid, instead of notification date of the death.

If we deducted policy charges from the Account Value at any time before the notification of the death, we will not refund these policy charges to the Account Value.

If there was a claim made under the Accelerated Terminal Illness benefit and its sum assured was lower than the sum assured of the Death benefit, then the sum assured of the Death benefit will be reduced by the sum assured already paid out under the Accelerated Terminal Illness benefit.

What happens after we pay for Death Benefit?

The whole policy automatically ends once we pay a death benefit claim.

What is not covered for Death Benefit?

If the life assured dies from suicide within 12 months from the cover start date or date of reinstatement (if any) of your policy, we will make your policy void. In this case, we cancel it and refund the total premiums received from you. We will first deduct:

- any partial withdrawal made,
- any payment made under the Accelerated Terminal Illness benefit; and
- all other amounts you owe us in connection with your policy and expenses (including administrative, sales-related and medical expenses) we have had to pay for your policy.

If the life assured dies directly or indirectly from an activity under special exclusion or special terms and conditions shown in your certificate of life assurance, we do not pay the sum assured but we will either refund the premium received from you or pay the Account Value (whichever is higher). We will first deduct:

- any partial withdrawal made,
- any payment made under the Accelerated Terminal Illness benefit; and
- all other amounts you owe us in connection with your policy and expenses (including administrative, sales-related

and medical expenses) we have had to pay for your policy.

If there is a change of life assured, and the new life assured dies:

- from suicide within 12 months from the cover start date of the new life assured or date of reinstatement (if any); or
 - from an activity under special exclusion or special terms and conditions (see the above paragraphs),
- the refund of premiums will be based on premiums received on the new life assured, less any amounts you owe us.

Accelerated Terminal Illness Benefit:

What do we pay for Accelerated Terminal Illness Benefit?

If the life assured is diagnosed as having a Terminal Illness, we will pay you as follows:

- A) if the sum assured for the Death benefit is the same as the Accelerated Terminal Illness benefit, we pay the higher of:
- the sum assured for Accelerated Terminal Illness benefit as shown on your certificate of life assurance; or
 - the Account Value, as at the date we receive notification of the terminal illness claim, less any amounts you owe us in connection with your policy.

The policy ends once we make the payment.

- B) if the sum assured for the Accelerated Terminal Illness benefit is lower than the sum assured of the Death benefit, we pay the sum assured for the Accelerated Terminal Illness benefit as shown on your certificate of life assurance, less any amounts you owe us in connection with your policy.

Your Accelerated Terminal Illness benefit ends and the sum assured for the Death benefit is reduced to an amount equal to the difference between the sum assured for the Death benefit and the sum assured for the Accelerated Terminal Illness benefit.

Terminal illness means “any condition caused by illness or injury, where at the time of claim, despite all reasonable medical treatment, the Life Assured is expected to live for no more than 12 months.”

The specialist medical practitioner treating the condition must provide supporting evidence of the condition, possible medical treatment, the prognosis after undergoing the possible medical treatment, and certify that the Life Assured is expected to live for no more than 12 months despite all possible medical intervention. We reserve the right to appoint an independent medical specialist who is an expert in the condition to confirm the diagnosis and prognosis.

Terminal Illness in the presence of HIV infection is excluded.

We can ask for a medical examination to be carried out by a medical practitioner registered with the Singapore Medical Council if we decide the medical reports given to us are not enough for our purposes.

What is not covered for Accelerated Terminal Illness Benefit?

We do not pay in any of the following circumstances:

- if the life assured has already died at the time of the claim. We will pay the Death benefit instead;
- if the symptoms of the terminal illness existed at the cover start date or date of reinstatement (if any) of this benefit; or
- if the life assured is diagnosed as having a terminal illness caused by:
 - self-inflicted injuries while sane or insane;
 - acquired immunodeficiency syndrome (AIDS), AIDS-related complex or infection by human immunodeficiency virus (HIV) except HIV due to blood transfusion and occupationally acquired HIV as defined below;
 - using unprescribed drugs if the drugs are required by law to be prescribed by a registered medical practitioner; or
 - an activity under special exclusion and special terms and conditions shown in your certificate of life assurance.

HIV due to blood transfusion and occupationally acquired HIV is:

- A. Infection with the Human Immunodeficiency Virus (HIV) through a blood transfusion, provided that all of the following conditions are met:

- The blood transfusion was medically necessary or given as part of a medical treatment;
- The blood transfusion was received in Singapore after the Issue Date, Date of endorsement or Date of reinstatement of this Supplementary Contract, whichever is the later; and
- The source of the infection is established to be from the Institution that provided the blood transfusion and the Institution is able to trace the origin of the HIV tainted blood.

B. Infection with the Human Immunodeficiency Virus (HIV) which resulted from an accident occurring after the Issue Date, date of endorsement or date of reinstatement of this Supplementary Contract, whichever is the later whilst the Insured was carrying out the normal professional duties of his or her occupation in Singapore, provided that all of the following are proven to the Company's satisfaction:

- Proof that the accident involved a definite source of the HIV infected fluids;
- Proof of sero-conversion from HIV negative to HIV positive occurring during the 180 days after the documented accident. This proof must include a negative HIV antibody test conducted within 5 days of the accident; and
- HIV infection resulting from any other means including sexual activity and the use of intravenous drugs is excluded.

This benefit is only payable when the occupation of the insured is a medical practitioner, housemen, medical student, state registered nurse, medical laboratory technician, dentist (surgeon and nurse) or paramedical worker, working in medical centre or clinic (in Singapore).

This benefit will not apply under either section A or B where a cure has become available prior to the infection. "Cure" means any treatment that renders the HIV inactive or non-infectious.

When does the Accelerated Terminal Illness benefit end?

The Accelerated Terminal Illness benefit will end when:

- the life assured dies
- we pay a claim on the Accelerated Terminal Illness benefit, or
- the policy ends,

whichever event happens first.

No Lapse Period

For the first five years from the policy's cover start date, your policy will not lapse even if the Account Value is less than or equal to zero.

The No Lapse Period (NLP) will apply only if:

- there is no change in life assured; and
- you did not make any withdrawals from your account value, or
 - if you have made withdrawal, you back-paid all the withdrawn amounts;
 - the total withdrawn amount is equal to or less than the total top-up amount.

The Death and Accelerated Terminal Illness benefits will not lapse even if there is insufficient value in the policy to pay for charges. The charges such as the monthly assurance charge that we bill to the policy will remain as amounts that you owe us. All outstanding amounts will be waived only if the death or terminal illness occur within the NLP.

If you did not meet any of the above conditions, the NLP will not apply. This means that your policy will lapse if the Account Value is not enough to pay for the charges.

Even if you reinstate the NLP or your policy, the NLP will expire after the 5-year period (this is five years from the cover start date) and would not be extended beyond this period.

Your policy will end when:

- the No Lapse Period is not in effect;

- there is insufficient Account Value with two months of unpaid charges; and
- there is insufficient Minimum Surrender Value with two months of unpaid charges.

We reserve the rights to vary the terms of this benefit at any time.

Quit Smoking Benefit:

If the life assured has stopped smoking for at least one or two years, you can apply to review the life assured's smoking status after two years from the cover start date of the policy.

The quit smoking benefit allows smokers to sign a declaration form and provide us with a nicotine test based on the criteria below to prove that they have quit smoking. The nicotine test (which is the Urine Cotinine Test) must be conducted by a registered medical practitioner from our panel clinics. You must pay all costs involved in obtaining the test and test results.

Risk Classes	Criteria to qualify for non-smoker status
Preferred Non-smoker Rates	No tobacco / nicotine products for the last 2 years
Standard Plus Non-smoker rates	No tobacco / nicotine products for the last 1 year
Standard Non-smoker rates	No tobacco / nicotine products for the last 1 year

If the life assured meets all the necessary terms and conditions, their policy will be re-classified, and the monthly assurance charge will be based on the non-smoking rate. There will be no refund of premium.

Minimum Surrender Value

The Minimum Surrender Value (**MSV**) is worked out separately to ensure the policy accumulates crediting rate with a minimum crediting rate of 2.00% per year, less applicable policy charges, throughout the policy term (the **Minimum Policy Value**), regardless of the actual Account Value in the Fixed Account and Index Account. MSV equals to Minimum Policy Values less Surrender Charge.

We pay the MSV:

- on a full surrender; and
- if the MSV is higher than the actual surrender value of the policy.

The MSV crediting rate is guaranteed from the cover start date of the policy.

MSV will take into account any transaction or changes made to the policy that affects the actual Account Value, such as:

- Top-up and additional premium;
- Partial withdrawal;
- Reduction in sum assured;
- Change of life assured; or
- Change in Policy Charges,

but it will not be affected by the Net Premium Allocation, Index Account Allocation, Automatic Premium Spread and Account Switch.

Even when the actual account value runs out, the policy will not end as long as there is still value in the Minimum Surrender Value. In this situation, the following will apply:

- The policy charges will continue to be accrued as amounts you owe us in the actual Account Value.
- If you surrender the policy, the payout will be based on the Minimum Surrender Value without deducting the amounts you owe us.

- In the event of a death or terminal illness claim, we will pay the full sum assured less amounts that you owe us.
- If the policyowner makes a top-up, we will deduct the applicable premium charge and the amounts you owe us after the top-up allocation into the policy.

The policy will lapse once both the actual Account Value and MSV run out.

Guaranteed Minimum Surrender Value (GMSV)

The Guaranteed Minimum Surrender Value (GMSV) is a separate value that guarantees that the MSV will not be lower than 95% of the surrender value that was effective on day 1 of your policy.

This guarantee is for the first 3 policy years (GMSV period) only. This means from the 4th policy year onwards, there is no more GMSV.

During the GMSV period, the MSV will not be lower than 95% of the surrender value that was effective on day 1 of your policy. However, the MSV will continue to accumulate crediting rate with a minimum crediting rate of 2.00% per year, less applicable policy charges, even when its value is lower than the GMSV.

GMSV will be reduced by any impact to the actual Account Value caused by the following transaction or changes made to the policy:

- Partial withdrawal; and
- Reduction in sum assured

but is not affected by top-up and additional premium that will increase the MSV.

Charges:

1. Premium Charge

When you pay your single premium or make a top-up, a premium charge is deducted.

The premium charge is worked out by multiplying the premium payment made by the applicable premium charge rate.

	Single Premium	Top-up / Additional Premium for Change of Life Assured
Premium Charge Rate	8.50%	7.00%

The premium charge rate is guaranteed from the cover start date of the policy.

2. Monthly Assurance charge

There is a monthly charge that we deduct proportionately from the Fixed Account and Index Account (from Master Holding Account and Segment Holding Account), until the life assured turns 110 years old.

The monthly assurance charge is the cost of providing you the basic benefits of Death and Terminal Illness. It is expressed as a rate per \$1,000 of your Sum At Risk. The "Sum At Risk" is the difference between your sum assured as shown on your certificate of life assurance and the Account Value, subject to a minimum value of zero. This means that the monthly assurance charge will only be charged when the Sum At Risk is more than zero. We can change the monthly assurance charge but it will not be more than the maximum monthly assurance charge. We will give you 30 days' written notice before making the change.

We will deduct the monthly assurance charge every month from your Account Value from the cover start date of your policy and after that on the same day every month throughout the term of your policy.

We will determine the monthly assurance charge by taking into account the applicable rates, the amount of the benefits payable and the life assured's age at each billing. If you are required to pay extra for medical, occupational or hazardous activities, this will be added to the charge.

If there is a change in the life assured, the monthly assurance charge will be revised, taking into account the applicable rates, the amount of the benefits payable and the new life assured's age.

Please see Appendix A for the Current and maximum monthly assurance charges.

Monthly assurance charge waiver at age 110

If the policy is still effective when the life assured reaches 110 years old, there will be no further monthly assurance charge deducted from the policy.

The crediting rate will continue to be credited to the respective account.

3. Administration Charge

The Administration charge is also a monthly charge that we deduct proportionately from the Fixed Account and Index Account (from the Master Holding Account and the Segment Holding Account). The administration charge is applicable during the first 15 policy years.

This charge rate is applied on every \$1,000 of the sum assured.

The administration charge is based on the life assured's details at the start of the policy.

For a change of life assured, the administration charge rate will be based on the new life assured's details effective from the next policy month.

For a reduction of sum assured, the administration charge rate will be based on the original sum assured.

Please see Appendix B for the Administration charges.

4. Surrender Charge

If you surrender your policy within 15 years from the cover start date, there is a Surrender Charge that we will apply. It is a percentage of the total Account Value. We deduct the charge from the Account Value.

If you apply to surrender your policy, each top-up amount has its own independent track of 15-year period to work out the Surrender Charge.

It will also be applied on a pro-rated basis if you request for a reduction in sum assured during the first 15 policy years.

The Surrender Charge rate is guaranteed from the cover start date of the policy.

Surrender Charge table:

Policy Year	Surrender Charge on Total Account Value
1	15.0%
2	15.0%

Policy Year	Surrender Charge on Total Account Value
3	15.0%
4	15.0%
5	15.0%
6	14.5%
7	14.0%
8	13.5%
9	13.0%
10	12.5%
11	10.4%
12	8.3%
13	6.2%
14	4.1%
15	2.0%
16 and above	0%

5. Partial Withdrawal Charge

If you make a withdrawal within the first 15 years of the policy, we will apply a Partial Withdrawal Charge and sum assured will be reduced by the withdrawn amount.

If you apply to withdraw from a top-up, each top-up amount has its own independent track of 15-year period to work out the withdrawal charge.

Partial Withdrawal Charge table:

Policy Year	Partial Withdrawal Charge on Withdrawn Amount
1	15.0%
2	15.0%
3	15.0%
4	15.0%
5	15.0%
6	14.5%

11	10.4%
12	8.3%
13	6.2%
14	4.1%
15	2.0%
16 and above	0%

Options:

1. Change of Life Assured

You can choose to change the life assured to another life assured only after two years from the cover start date of the policy.

This change is allowed only if:

- you show satisfactory proof that you have insurable interest on the new life assured in line with the laws and regulations that apply;
- the new life assured meets our underwriting requirements; and
- the date of birth of the new life assured is not later than the original cover start date of the policy.

You cannot change the life assured if we have previously paid a terminal illness claim under the policy.

When the change in life assured becomes effective,

- you will receive a revised certificate of life assurance with the new life assured's particulars.
- the cover for the original life assured ends and the cover for the new life assured starts on the new cover start date as shown in the revised certificate of life assurance. All rights under the original life assured ends with immediate effect.
- the No lapse Period, if it is still effective, will end.
- the policy charges will be based on the new life assured.
- the Loyalty Crediting Rate (if applicable) will start from the 11th policy year based on the former life assured's cover start date. We will not revise the start date of the Loyalty Crediting Rate even if there is a change in life assured.

If the revised administration charge based on the new life assured is higher than that based on the original life assured, a one-time charge will be payable. If it is lower, then no one-time charge will be payable.

If the Account Value (less any lump sum top-up, after deducting any top-up withdrawals and crediting any crediting rate earned on any lump sum top-up) at the time of application for the change in life assured, is less than the single premium payable on the life of the new life assured, then an additional lump sum premium is required to make up the difference

before the change of life assured can become effective.

The additional premium will be in multiples of \$1,000. We will apply a premium charge on the additional premium before it is deposited into the account. This additional premium shall not be treated as top-up premium, so the maximum cumulative amount of top-up will not apply. The Loyalty Crediting rate does not apply to the additional premium amount.

When we place the additional premium into the account, the additional premium amount will follow the same Net Premium Allocation and Index Account Allocation as chosen for the basic premium.

You may choose to opt in or out of the Automatic Premium Spread for the additional premium amount (which will be allocated to the Index Account, if applicable).

2. Policy Reinstatement

If your policy ends as a result of having a zero account value and Minimum Surrender Value, you may apply to reinstate it if:

- You apply within 12 months from the end date of the policy;
- You give us satisfactory evidence of the health of the life assured. You will have to pay any costs involved in this; and
- You pay a premium payment (as a top-up amount) that is at least equal to:
 - the minimum top-up amount; and
 - all the amounts that you owe us before your policy lapsed,provided the top-up feature is available and there is still available balance within the top-up limit on reinstatement.

The premium charge will apply on this premium payment. The net premium amount will then be used to pay the amounts that you owe us before the policy lapsed. If the net premium amount (after deduction of the premium charge) is not enough to pay the amounts that you owe us you may be required to pay us a higher premium amount.

We will not take into consideration the Crediting Rates and Policy Charges during the lapsed period when you reinstate your policy. We will only consider those that were applied in the last policy month before the date of reinstatement.

The end date of your policy will be shown in the written correspondence that we send you to tell you that your policy has ended.

3. Top-up

You can choose to make an ad-hoc Top-up at any time after the cover start date, provided you are still within the age limit. The minimum top-up amount is \$10,000 and then in multiples of \$100.

If a top-up is made and the Automatic Premium Spread was opted in, the top-up amount will also be spread over 12 months with its own premium spread amount and 12-month period, independent from any on-going premium spread chosen previously. APS can be opted in or out on the top-up amount.

- For top-up within the first policy year, the maximum amount allowed is 20% of the single premium paid at the start of your policy (less any previous top-ups).
- The maximum cumulative amount allowed is up to 100% of your single premium paid at the start of your policy (less the total sum of any previous top-ups, after deducting the total sum of any top-up withdrawals).
- The top-up amount will be used to deduct policy charges proportionately as well.
- To make a top-up will depend on whether it is available at that point in time and we can reject, refund or limit the amount of top-up at any time. We are not responsible for any loss as a result of our decision to reject, refund or limit the top-up amount.
- Every top-up is subject to a premium charge.
- Making a top-up does not increase the sum assured.

4. Partial Withdrawal

After your first policy year, we allow you to make partial withdrawals from your policy once every month. You must

withdraw in multiples of \$100 starting with a minimum amount of \$500.

We withdraw the amount from the Account Value in the following order:

- 1) Fixed Account
- 2) Master Holding Account
- 3) Segment Holding Account

If the withdrawal is made from the Segment Holding Account, the withdrawal will be first taken out from the segment that has the longest period to maturity.

The remaining Account Value in total must be at least \$5,000.

Withdrawal amounts will reduce the sum assured by the same amount, except where the withdrawal amount does not exceed Penalty-free Withdrawal Limit (see below). The sum assured can be reduced to below the policy's minimum sum assured, but this is subject to minimum sum assured amount of \$1,000,000 after withdrawals.

If the requested withdrawal amount results in the sum assured being lower than the minimum sum assured of \$1,000,000, the withdrawal amount will be reduced to ensure that the sum assured after the withdrawal is equal to or above the minimum sum assured of \$1,000,000.

Partial withdrawal during the first 15 policy years is subject to the Partial Withdrawal Charge.

Free Partial Withdrawal

Starting from the 11th policy year, you can ask for a penalty-free partial withdrawal that will not incur the Partial Withdrawal Charge or reduce the sum assured, provided:

- the cumulative partial withdrawals in one policy year do not exceed 5% of the Account Value as at the policy anniversary immediately before the withdrawal; and
- the withdrawal does not exceed 100% of the Fixed Account value at the time of withdrawal.

whichever is lower (altogether known as "Free Partial Withdrawal Limit").

This Free Partial Withdrawal is only applicable to the withdrawal from the Fixed Account of the basic premium.

Any remaining amounts under the Free Partial Withdrawal Limit will not be carried forward to the next Policy Year. Any withdrawal amount above the Free Partial Withdrawal Limit will reduce the sum assured and is subject to Partial Withdrawal Charge (if applicable).

Withdrawal from Top-up amount:

If you have made a top-up previously, any withdrawal will be first taken from your top-up balance after the first Policy Year in the same sequence as above (that means, taken out from the Fixed Account first, followed by the Master Holding Account and Segment Holding Account). The withdrawal amounts:

- Must be in multiples of \$100.
- Will not reduce the sum assured amount.

If your withdrawal is done within 15 years from the time you made the top-up, then it is subject to the Partial Withdrawal Charge. This charge will be deducted from your withdrawal amount and will be a percentage of the withdrawal amount. If you have made more than one top-up, then each top-up has its independent 15-year period that starts from the date of each top-up.

If you have made several top-ups previously and apply to withdraw from your top-up balance, we will withdraw from the first top-up and subsequently from the second top-up and so on.

5. Surrender (end) your policy

We give you an immediate surrender value after we receive your single premium and your policy is issued.

You can apply at any time to surrender (and end) your policy. We pay the surrender value, less any terminal illness claim amount already paid out (if any), unless the Minimum Surrender Value is higher than the actual surrender value.

If you surrender your policy within 15 years from the cover start date, there is a Surrender Charge that we will apply. It is a percentage of the total Account Value. We deduct the charge from the Account Value.

6. Reduce your sum assured

You can reduce your sum assured after the first policy year. You must reduce the sum assured in multiples of \$100,000 and the remaining sum assured cannot be less than \$2,000,000.

When you reduce your sum assured, we give you a new certificate of life assurance which will show the changes.

When the sum assured is reduced, the assurance charges for death and terminal illness will reduce accordingly. We will not return any of the reduced portion of the single premium, or make any payment from the Account Value.

If you reduce the sum assured within the first 15 years of the policy, a pro-rated surrender charge (based on the reduced sum assured amount) will be applied and deducted from the account value proportionately from each account. After 15 years from the cover start date, there is no charge when you reduce the sum assured.

This charge is calculated as follows:

- Surrender Charge x (Reduction in Sum Assured / Original Sum Assured) x Account Value
- The charge will be deducted from the Account Value proportionately from each account, including top-up amount.

If the sum assured of the Death benefit is the same as the sum assured of the Accelerated Terminal Illness benefit, the sum assured of the Accelerated Terminal Illness benefit will also be reduced to be the same as the sum assured of the Death benefit.

After reducing the sum assured and the sum assured of the Death benefit is still more than the sum assured of the Accelerated Terminal Illness benefit, we will not adjust or reduce the sum assured of the Accelerated Terminal Illness benefit. It will remain at its original sum assured.

Exclusions:

There are certain conditions such as death from suicide which no benefits will be payable. You are advised to read your policy document for the full details of these exclusions.

Termination:

Your policy will end once any of the following occurs:

- When the life assured dies
- When you surrender the policy and received the benefits;
- When there is no more or insufficient Account Value and Minimum Surrender Value to pay the charges and the No Lapse Period is not applicable, or
- When we have paid out the full sum assured.

Reports:

You will receive a statement on the performance and value of your policy. The statement will be issued by us on monthly basis.

What is the impact of early surrender?

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid.

Premiums:

The single premium is payable before the cover start date of the policy.

PRUApex Legacy Index is not a Medisave-approved policy and you may not use Medisave to pay the premium for this policy.

All premiums and benefits are payable in U.S. Dollars. We will not pay for any loss or changes, because of any transaction involving currency conversions.

Foreign Currency Risk:

This Policy is denominated in US dollar. You will be exposed to foreign exchange risk should you need to convert from another currency to US dollar for premium payment purposes or convert the US dollar Policy proceeds to another currency.

Note:

Life insurance is a contract of utmost good faith and a Proposer is required to disclose in the proposal form fully and faithfully all the facts, which he/she knows or ought to know, as otherwise the policy issued may be void.

Please refer to the exact terms and conditions, specific details and exclusions applicable to these insurance products in the policy document. We reserve the right to change, introduce new options or at our discretion withdraw the options offered, change the charges, as we consider appropriate.

Free Look Period:

After purchasing a life insurance policy, you have a 14-day free-look period - starting from the day you receive your policy documents to review the documents carefully. During this time, if you choose to cancel your policy, we will refund you the premiums you have paid (without interest), less any medical fees and other expenses, such as payments for medical check-ups and medical reports, incurred by us. We use a premium refund formula as determined by us to work out the amount to be refunded.

If we make your policy document and all other documents from us available electronically via our secure online portal on our website, we consider they have been delivered and received when you receive the relevant SMS or email telling you that the documents are accessible on this portal. Otherwise, we consider your policy and all other documents from us as delivered and received seven days from the date of posting to the last-known address you gave us.

If you decide this policy is not suitable for your needs, simply write to us within the 14-day free-look period.

S&P 500 Index Disclaimer:

The S&P 500® is a product of S&P Dow Jones Indices LLC or its affiliates ("SPDJI"), and has been licensed for use by Prudential Assurance Company Singapore (Pte) Limited. S&P®, S&P 500®, SPX®, SPY®, US 500™, The 500™, iBoxx®, iTraxx® and CDX® are trademarks of S&P Global, Inc. or its affiliates ("S&P"); Dow Jones® is a registered trademark of Dow Jones Trademark Holdings LLC ("Dow Jones"). It is not possible to invest directly in an index. Prudential's products (The "Product") are not sponsored or sold by SPDJI, Dow Jones, S&P, any of their respective affiliates (collectively, "S&P Dow Jones Indices"). S&P Dow Jones Indices do not make any representation or warranty, express or implied, to the owners of the Product or any member of the public regarding the advisability of investing in securities generally or in the Product particularly or the ability of the S&P 500® to track general market performance. Past performance of an index is not an indication or guarantee of future results. S&P Dow Jones Indices' only relationship to Prudential Assurance Company Singapore (Pte) Limited with respect to the S&P 500® is the licensing of the Index and certain trademarks, service marks and/or trade names of S&P Dow Jones Indices and/or its licensors. The S&P 500® is determined, composed and calculated by S&P Dow Jones Indices without regard to Prudential Assurance Company Singapore (Pte) Limited or the Product. S&P Dow Jones Indices have no obligation to take the needs of Prudential Assurance Company Singapore (Pte) Limited or the owners of the Product into consideration in determining, composing or calculating the S&P 500®. S&P Dow Jones Indices have no obligation or liability in connection with the administration, marketing or trading of the Product. There is no assurance that investment products based on the S&P 500® will accurately track index performance or provide positive investment returns. S&P Dow Jones Indices LLC is not an investment adviser, commodity trading advisory, commodity pool operator, broker dealer, fiduciary, promoter" (as defined in the Investment Company Act of 1940, as amended), "expert" as enumerated within 15 U.S.C. § 77k(a) or tax advisor. Inclusion of a security, commodity, crypto currency or other asset within an index is not a recommendation by S&P Dow Jones Indices to buy, sell, or hold such security, commodity, crypto currency or other asset, nor is it considered to be investment advice or commodity trading advice.

NEITHER S&P DOW JONES INDICES NOR THIRD PARTY LICENSOR GUARANTEES THE ADEQUACY, ACCURACY, TIMELINESS AND/OR THE COMPLETENESS OF THE S&P 500® OR ANY DATA RELATED THERETO OR ANY COMMUNICATION, INCLUDING BUT NOT LIMITED TO, ORAL OR WRITTEN COMMUNICATION (INCLUDING ELECTRONIC COMMUNICATIONS) WITH RESPECT THERETO. S&P DOW JONES INDICES SHALL NOT BE SUBJECT TO ANY DAMAGES OR LIABILITY FOR ANY ERRORS, OMISSIONS, OR DELAYS THEREIN. S&P DOW JONES INDICES MAKES NO EXPRESS OR IMPLIED WARRANTIES, AND EXPRESSLY DISCLAIMS ALL WARRANTIES, OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR USE OR AS TO RESULTS TO BE OBTAINED BY PRUDENTIAL ASSURANCE COMPANY SINGAPORE (PTE) LIMITED, OWNERS OF THE PRODUCT, OR ANY OTHER PERSON OR ENTITY FROM THE USE OF THE S&P 500® OR WITH RESPECT TO ANY DATA RELATED THERETO. WITHOUT LIMITING ANY OF THE FOREGOING, IN NO EVENT WHATSOEVER SHALL S&P DOW JONES INDICES BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, PUNITIVE, OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO, LOSS OF PROFITS, TRADING LOSSES, LOST TIME OR GOODWILL, EVEN IF THEY HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, WHETHER IN CONTRACT, TORT, STRICT LIABILITY, OR OTHERWISE. S&P DOW JONES INDICES HAS NOT REVIEWED, PREPARED AND/OR CERTIFIED ANY PORTION OF, NOR DOES S&P DOW JONES INDICES HAVE ANY CONTROL OVER, THE LICENSEE PRODUCT REGISTRATION STATEMENT, PROSPECTUS OR OTHER OFFERING MATERIALS. THERE ARE NO THIRD-PARTY BENEFICIARIES OF ANY AGREEMENTS OR ARRANGEMENTS BETWEEN S&P DOW JONES INDICES AND PRUDENTIAL ASSURANCE COMPANY SINGAPORE (PTE) LIMITED, OTHER THAN THE LICENSORS OF S&P DOW JONES INDICES.
