Policy Currency	US Dollars

WHAT ARE YOU PURCHASING?

This is a non-participating planned premium universal life plan. It is a product which offers you insurance coverage and also invests part of your premiums in the insurer's Non-participating Fund. It comprises guaranteed and non-guaranteed benefits and may not be suitable for you if you want all benefits to be guaranteed.

WHAT ARE THE KEY RISKS OF A UNIVERSAL LIFE PLAN?

By purchasing a universal life plan, your premiums will be pooled together and invested with premiums from other policyholders in the Non-participating Fund managed by HSBC Global Asset Management (Singapore) Limited. As a policyholder, the key risks commonly associated with universal life plan are:

Investment Risks	Lower than expected investment returns earned by the fund
Insurance Risks	Higher than expected claims made by policyholders (e.g. due to death or other terminations)
Expense Risks	Higher than expected expenses incurred for managing the Non-participating Fund
Currency Risk	If your home currency is not denominated in the USD, the payments you make or receive may be worth less over time when expressed in your home currency.

Date:

Date:

These risks can affect the crediting rate to be declared to and the charges to be deducted from the policy, which in turn affect the policy value.

Your policy will lapse if the policy value is insufficient to pay for the charges. In order to keep your policy in force, you may need to pay additional premium(s).

ARE THE UNIVERSAL LIFE ILLUSTRATED CREDITING RATE GUARANTEED?

The Policy Illustration shows two crediting rates – current and guaranteed minimum crediting rate. Current crediting rate is not guaranteed and may increase or decrease, subject to the guaranteed minimum crediting rate as a minimum floor. The guaranteed minimum crediting rate is guaranteed by the company.

ARE THE UNIVERSAL LIFE ILLUSTRATED CHARGES GUARANTEED?

The Policy Illustration shows two charges – current and maximum charges. Some charges may increase or decrease. Should the charges be increased from their current level, a larger deduction will be made and this will impact the policy value of your policy. We may adjust the charges according to factors such as the expected future claims and expenses. However, the charges will never exceed the maximum level stated in your policy contract.

You may refer to the product summary for the details of the current and maximum charges for the policy.

WHAT RETURNS CAN YOU EXPECT FROM THIS POLICY BASED ON THE ILLUSTRATED CREDITING RATES AND CHARGES?

Based on the current general crediting rate for General Account of 4.35% p.a., current assumed crediting rate for S&P 500 Index Sub-Account of 6.60% p.a., Nasdaq-100 Index Sub-Account of 6.70% p.a., S&P Global Diversified Index Sub-Account of 7.30% p.a., S&P U.S. Tactical Multi-Asset Index Sub-Account of 7.80% p.a. and current charges, your total Illustrated Yield upon surrender at age 70 is 3.53% p.a.

Under this illustration, the guaranteed minimum crediting rate for the General Account on the First Net Premium in the first policy year is equal to the Guaranteed Interest Rate Lock Rate.

Based on the guaranteed minimum crediting rate for General Account of 2.00% p.a., floored crediting rate for S&P 500 Index Sub-Account, Nasdaq-100 Index Sub-Account and S&P U.S. Tactical Multi-Asset Index Sub-Account of 0.00% p.a., floored crediting rate for S&P Global Diversified Index Sub-Account of 0.45% p.a. and maximum charges, the policy is projected to have lapsed before age 70.

Under this illustration, the applicable illustrated values is the higher of (A) or (B), where:

- (A) is based on the guaranteed minimum crediting rate for General Account of 2.00% p.a., floored crediting rate for S&P 500 Index Sub-Account, Nasdaq-100 Index Sub-Account and S&P U.S. Tactical Multi-Asset Index Sub-Account of 0.00% p.a., floored crediting rate for S&P Global Diversified Index Sub-Account of 0.45% p.a. and maximum charges (US\$); and
- (B) is the Guaranteed Minimum Surrender Value based on maximum charges.

We will pay the Guaranteed Minimum Surrender Value at the time of full surrender if it is higher than the Policy Value less Surrender Charge. Guaranteed Minimum Surrender Value is determined using a fixed crediting rate of 2.00% p.a. regardless of the actual crediting rates earned by the General Account and the Index Account, less applicable charges.

The total Illustrated Yields upon surrender have not taken into consideration of any additional premiums paid, partial withdrawals made and loans taken. Please refer to the Policy Illustration for assumptions made. The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual general crediting rates (subject to the guaranteed minimum crediting rate) and charges (subject to the maximum charges) as well as the amounts of any additional premiums paid, partial withdrawals made and loans taken.

Depending upon actual experience, you may need to make additional premiums payment to keep the policy in force.

You can compare 3.53% p.a. total Illustrated Yield upon surrender at age 70 with the returns of Singapore Savings Bonds and Singapore Government Securities. You may refer to www.mas.gov.sg/bonds-and-bills/singapore-savings-bonds and www.mas.gov.sg/bonds-and-bills/singapore-government-bonds-information-for-individuals for more information on the returns of Singapore Savings Bonds and Singapore Government Securities. Please note that the total Illustrated Yield upon surrender at age 70 take into account the cost of insurance and expenses incurred.

HOW MUCH WILL YOU NEED TO PAY FOR ADVICE?

The total distribution cost of this product is the amount that you will pay for advice and for other distribution related expenses. It includes cash payments in the form of commissions and benefits paid to the financial advisory firm and its representative(s) who have provided you with financial advice. This is not an additional cost to you as it has been included in the premiums payable for this plan.

The Total Distribution Cost for this plan is \$132,282 as shown in the Policy Illustration. This makes up 15.18% of the total premiums payable.

WHAT HAPPENS IF YOU SURRENDER YOUR POLICY EARLY?

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid.

OTHER IMPORTANT INFORMATION

After purchasing a life insurance policy, you have 14-day free-look period – starting from the day you receive your policy documents to review the documents carefully. During this time, if you choose to cancel your policy, the insurer will refund you the premiums you have paid, less any medical fees and other expenses, such as payments for medical check-ups and medical reports, incurred by the insurer.

Introduction

HSBC Life (Singapore) Pte. Ltd. believes that it is important that you fully appreciate the benefits of your policy. You should also understand how the cost of your insurance cover and the expenses of administration and sales affect the benefits that you will receive.

The illustration that follows shows how the value of your policy progresses over time and the sum(s) that would be payable. The methods used to derive the values shown follow guidelines established by the Life Insurance Association, Singapore, to ensure that a fair and consistent approach is used in preparing this illustration.

Please note that your policy illustration provides two sets of illustrated values:

(1) Illustrated values at guaranteed crediting rate and maximum charges

The crediting rate used in this illustration is a guaranteed minimum that cannot be lowered any further and charges are the maximum chargeable that cannot be increased any further.

(2) Illustrated values at current crediting rate and charges

The crediting rate used in this illustration, which does not exceed the rate supportable by the underlying asset portfolio, is not guaranteed and may be varied at the company's discretion, subject to the guaranteed minimum. Charges are not guaranteed and may be increased in future up to the maximum limits. The crediting rate and charges used are the rate and charges prevailing at the date of this illustration.

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid. You are required to disclose all material facts to this policy truthfully in the proposal form, otherwise your policy issued may be void.

If you need clarification please do not hesitate to ask your financial adviser.

Notes:

This illustration assumes you are accepted on standard terms. This is not a contract of assurance. The precise benefits, terms and conditions will be provided in the Policy General Provisions.

The figures shown in the illustration and the actual value shown in the Policy General Provisions/ and Policy Schedule may differ due to rounding difference. In the event of inconsistency, the amount shown in the Policy General Provisions/ and Policy Schedule shall prevail.

Terms not otherwise defined in this document shall bear the meanings ascribed to them in the Policy General Provisions.

Any untrue, inaccurate or incomplete information may void the policy.

The Net Premiums (gross premiums paid less the applicable Policy Premium Charge) will be allocated into the General Account and Index Account according to the allocation above. You may request for a change in the Net Premium Allocation according to the terms and conditions as stated in the Policy General Provisions.

General Account

In this Policy Illustration, the current General Account general crediting rate is 4.35% p.a. and the guaranteed minimum crediting rate for General Account is 2.00% p.a. with interest credited daily into your General Account.

Index Account

The Net Premiums allocated into this account as per the Net Premium Allocation will be further allocated into the Index Sub-Account(s) according to the selected Index Sub-Account(s) Allocation above, which are linked to the following indices.

- (i) S&P 500 Index Sub-Account
- (ii) Nasdaq-100 Index Sub-Account
- (iii) S&P Global Diversified Index Sub-Account
- (iv) S&P U.S. Tactical Multi-Asset Index Sub-Account

In this Policy Illustration,

- (i) S&P 500 Index
 - 6.60% p.a. current assumed crediting rate
 - 100.00% Participation Rate (guaranteed)
 - 0.00% Floor Rate (guaranteed)
 - 10.00% Cap Rate (subject to minimum Cap Rate of 3.00%)
- (ii) Nasdaq-100 Index
 - 6.70% p.a. current assumed crediting rate
 - 100.00% Participation Rate (guaranteed)
 - 0.00% Floor Rate (guaranteed)
 - 9.50% Cap Rate (subject to minimum Cap Rate of 3.00%)
- (iii) S&P Global Diversified Index
 - 7.30% p.a. current assumed crediting rate
 - 108.00% Participation Rate (assumed*) (subject to minimum Participation Rate of 45.00%)
 - 1.00% Floor Rate (guaranteed)
 - Cap Rate does not apply
- (iv) S&P U.S. Tactical Multi-Asset Index
 - 7.80% p.a. current assumed crediting rate
 - 230.00% Participation Rate (assumed*) (subject to minimum Participation Rate of 100.00%)
 - 0.00% Floor Rate (guaranteed)
 - Cap Rate does not apply

** This assumed Participation Rate is used to illustrate the values in this Policy Illustration. The actual participation rate may vary and is subject to our review from time to time.*

The current assumed crediting rate for the Index Sub-Account(s) are based on historical returns of the underlying index, after applying the relevant Floor Rate, Cap Rate (where applicable) and Participation Rate and is for illustration purpose only. Due to limited index performance data, the historical returns used to determine the current assumed crediting rates for S&P Global Diversified Index and S&P U.S. Tactical Multi-Asset Index includes both actual and back-tested data. More details of the indices can be found on the respective index providers' (S&P Dow Jones Indices LLC and Nasdaq, Inc.) websites. The current assumed crediting rate for the respective indices are not guaranteed and should not be regarded as an indication or representation of the past or future performance of the Index Sub-Account(s).

The Cap Rate (where applicable) and Participation Rate are not guaranteed unless stated otherwise and may be revised from one Index Segment to another. Any revision in Cap Rate (where applicable) and Participation Rate will only apply to new Index Segments after the revision. Index Segment is created on the Index Segment Initiation Date and expires on the Index Segment Maturity Date.

Actual crediting rate for each respective Index Segments under the Index Sub-Account(s) will only be known on their respective Index Segment Maturity Date.

For more details on Index Account, please refer to the Policy General Provisions/ Product Summary.

In this Policy Illustration, it is on the assumption that premiums are paid at the beginning of each policy year and the Net Premiums (as per allocation) allocated into the Index Account are allocated into the selected Index Sub-Account(s) on the Issue Date. In actual, the allocated Net Premiums in the Index Account will be housed in the Holding Segment(s) before allocating into the Index Sub-Account(s) on the next applicable Index Segment Initiation Date. The first Net Premiums will be housed for a minimum of 21 days from the Issue Date before allocating into the Index Sub-Account(s) on the next applicable Index Segment Initiation Date. We'll apply the General Crediting Rate on the values in the Holding Segment(s), subject to the Guaranteed Minimum Crediting Rate.

The illustrated values are as at the end of each policy year hence fluctuations during the policy year are not illustrated. The actual values during the policy year may be lower than the illustrated values at the end of the policy year due to the timing of charges deduction and interests crediting. The premium charge is deducted when premium is paid, and monthly charges are deducted on the monthly anniversary date while interest for the General Account and Guaranteed Minimum Surrender Value are calculated daily. In addition, interest for the Index Account is calculated yearly on the Index Segment Maturity Date which may not coincide with the end of policy year.

Automatic Premium Spread:

If Automatic Premium Spread is selected, amounts allocated into the Index Account will be spread and allocated into Index Segments over the next 12 months instead of a single Index Segment.

The purpose of Automatic Premium Spread is to lessen the impact of any market fluctuations for a more stable return in the Index Account in the long run instead of depending on the performance of one or a few Index Segments. We do not illustrate Automatic Premium Spread in this Policy Illustration as the effect of Automatic Premium Spread can only be seen in actual environment with varying crediting rates. The actual return of the Index will be different from one Index Segment to another and the long-term return for Index Account maybe higher or lower for policies that have selected for Automatic Premium Spread as compared to policies that did not select such option.

For more details on Automatic Premium Spread, please refer to the Policy General Provisions/ Product Summary.

Guaranteed Minimum Surrender Value:

We'll pay the Guaranteed Minimum Surrender Value at the time of full surrender. It will be paid when the Guaranteed Minimum Surrender Value is higher than the Policy Value less Surrender Charge. Guaranteed Minimum Surrender Value ensures that the Policy Value will grow at a fixed crediting rate of 2.00% p.a. regardless of the performance of the General Account and Index Account. Please refer to the Policy General Provisions/ Product Summary for details.

The illustrations in this Policy Illustration are based on the premiums and payment method you chose.

Main Policy Illustration – Summarises the Benefits of your Policy and in no way affects the Terms and Conditions stated in the Policy General Provisions

It is intended to illustrate the Policy Values, Cash Values and Death Benefits under different bases. It is important for you to understand that the actual figures, values and benefits may be more or less favorable depending on the actual charges and crediting rates applied to your policy as compared to the charges and rates illustrated in this document. For detailed terms and conditions and the applicable charges, you should refer to the Policy General Provisions, Policy Schedule and Endorsements and consult your financial adviser. The illustrated current General Account general crediting rates and current assumed Index Account crediting rates used in this document are for illustrative purposes only.

30/60	871,310	0	0	871,310	10,000,000	10,000,000
35/65	871,310	0	0	871,310	0	10,000,000
40/70	871,310	0	0	871,310	0	10,000,000

¹Illustrated values at the higher of (a) or (b), where:

- (a) is based on the guaranteed minimum crediting rate for General Account, floored crediting rate for Index Account and maximum charges; and
- (b) is the Guaranteed Minimum Surrender Value² based on maximum charges.

²We will pay the Guaranteed Minimum Surrender Value at the time of full surrender. It will be paid when the Guaranteed Minimum Surrender Value is higher than the Policy Value less Surrender Charge. Guaranteed Minimum Surrender Value ensures that the Policy Value will grow at a fixed crediting rate of (2.00% p.a.) regardless of the actual crediting rates and any loyalty bonus earned by the General Account and Index Account, less applicable charges.

³The illustrated values are based on guaranteed minimum crediting rate for General Account of 2.00% p.a., floored crediting rate for S&P 500 Index Sub-Account, Nasdaq-100 Index Sub-Account and S&P U.S. Tactical Multi-Asset Index Sub-Account of 0.00% p.a., floored crediting rate for S&P Global Diversified Index Sub-Account of 0.45% p.a. and maximum charges. The values in the Policy Illustration are illustrated assuming the values in each Index Sub-Account will grow at its respective floored crediting rate. The illustrations include Loyalty Bonus Rate (if applicable) to both General Account and Index Account.

⁴The guaranteed minimum crediting rate for the General Account on the First Net Premium in the first policy year is equal to the Guaranteed Interest Rate Lock Rate.

⁵The illustrated values are based on current General Account general crediting rate of 4.35% p.a. and current assumed crediting rate for S&P 500 Index Sub-Account of 6.60% p.a., Nasdaq-100 Index Sub-Account of 6.70% p.a., S&P Global Diversified Index Sub-Account of 7.30% p.a., S&P U.S. Tactical Multi-Asset Index Sub-Account of 7.80% p.a.. The values in this Policy Illustration are illustrated assuming the values in each Index Sub-Account will grow at its respective current assumed crediting rate. The illustrations include Loyalty Bonus Rate (if applicable) to both General Account and Index Account.

Please note that the Day 1 Cash Value for this policy is illustrated to be USD 0.

Based on the current general crediting rate for General Account, current assumed crediting rate for Index Sub-Account(s) and current charges, your total Illustrated Yield upon surrender at age 70 is 3.53% p.a.

Based on the guaranteed minimum crediting rate for General Account, floored crediting rate for Index Sub-Account(s) and maximum charges, the policy is projected to have lapsed before age 70.

The total Illustrated Yields upon surrender have not taken into consideration of any additional premiums paid, partial withdrawals made and loans taken. Please refer to the Policy Illustration for assumptions made. The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the guaranteed minimum crediting rate) and charges (subject to the maximum charges) as well as the amounts of any additional premiums paid, partial withdrawals made and loans taken.

¹Illustrated values at the higher of (a) or (b), where:

- (a) is based on the guaranteed minimum crediting rate for General Account, floored crediting rate for Index Account and maximum charges; and
- (b) is the Guaranteed Minimum Surrender Value² based on maximum charges.

²We will pay the Guaranteed Minimum Surrender Value at the time of full surrender. It will be paid when the Guaranteed Minimum Surrender Value is higher than the Policy Value less Surrender Charge. Guaranteed Minimum Surrender Value ensures that the Policy Value will grow at a fixed crediting rate of (2.00% p.a.) regardless of the actual crediting rates and loyalty bonus earned by the General Account and Index Account, less applicable charges.

³The illustrated values are based on guaranteed minimum crediting rate for General Account of 2.00% p.a., floored crediting rate for S&P 500 Index Sub-Account, Nasdaq-100 Index Sub-Account and S&P U.S. Tactical Multi-Asset Index Sub-Account of 0.00% p.a., floored crediting rate for S&P Global Diversified Index Sub-Account of 0.45% p.a. and maximum charges. The values in the Policy Illustration are illustrated assuming the values in each Index Sub-Account will grow at its respective floored crediting rate. The illustrations include Loyalty Bonus Rate (if applicable) to both General Account and Index Account.

⁴The guaranteed minimum crediting rate for the General Account on the First Net Premium in the first policy year is equal to the Guaranteed Interest Rate Lock Rate.

⁵The illustrated values are based on current General Account general crediting rate of 4.35% p.a. and current assumed crediting rate for S&P 500 Index Sub-Account of 6.60% p.a., Nasdaq-100 Index Sub-Account of 6.70% p.a., S&P Global Diversified Index Sub-Account of 7.30% p.a., S&P U.S. Tactical Multi-Asset Index Sub-Account of 7.80% p.a.. The values in this Policy Illustration are illustrated assuming the values in each Index Sub-Account will grow at its respective current assumed crediting rate. The illustrations include Loyalty Bonus Rate (if applicable) to both General Account and Index Account.

What is the significance of the Illustrated Investment Rate of Return?

The illustrations have been prepared on two sets of assumptions regarding the crediting rate and charges applicable to the policy:

(1) Illustrated values at the guaranteed crediting rates and maximum charges

The crediting rates used in this illustration are a guaranteed minimum that cannot be lowered any further, and charges are the maximum chargeable that cannot be increased any further.

Under this illustration, the applicable illustrated values is the higher of (A) or (B), where:

(A) is based on the guaranteed minimum crediting rate for General Account, floored Index Sub-Account(s) crediting rate and maximum charges; and

(B) is the Guaranteed Minimum Surrender Value based on maximum charges.

We will pay the Guaranteed Minimum Surrender Value at time of full surrender. It will be paid when the Guaranteed Minimum Surrender Value is higher than the Policy Value less Surrender Charge. Guaranteed Minimum Surrender Value ensures that the Policy Value will grow at a fixed crediting rate of (2.00% p.a.) regardless of the actual crediting rates and any loyalty bonus earned by the General Account and Index Account, less applicable charges.

The illustrations include Loyalty Bonus Rate (if applicable) to both General Account and Index Account.

(2) Illustrated values at current General Account crediting rate, current assumed Index Account Crediting Rate and current Charges prevailing at the date of this illustration

The current General Account crediting rate used in this illustration, which does not exceed the rate supportable by underlying asset portfolio, is not guaranteed and may be varied at the discretion of HSBC Life (Singapore) Pte. Ltd., subject to the guaranteed minimum of 2.00% p.a..

For the purpose of this illustration, the assumed crediting rates for each Index Sub-Account is set to be:

(i) 6.60% p.a. S&P 500 Index Sub-Account

(ii) 6.70% p.a. Nasdaq-100 Index Sub-Account

(iii) 7.30% p.a. S&P Global Diversified Index Sub-Account

(iv) 7.80% p.a. S&P U.S. Tactical Multi-Asset Index Sub-Account

For (iii) and (iv), it is based on an assumed participation rate of 108.00% and 230.00% respectively.

The values in this Policy Illustration are illustrated based on each Index Sub-Account growing at its respective current assumed crediting rate.

The current assumed crediting rate for the respective indices are not guaranteed and should not be regarded an indication or representation of the past or future performance of the Index Sub-Account(s).

Charges are not guaranteed and may be increased in the future up to the maximum limits. The crediting rates and charges used are the rates and charges prevailing at the date of this illustration. Please note that this Policy Illustration will only be valid if your Policy is inception before any revised crediting rates or charges are affected.

The actual crediting rates applicable to your Policy may be different from those shown in the illustrations, which are used purely for illustrative purposes. The actual rates may be higher or lower depending on future investment performance. The actual rates applicable to the Index Sub-Account(s) in your policy further depend on the actual performance of the underlying indices, actual cap rate (where applicable) and actual participation rate. The cap rate (where applicable) and participation rate may be different for each Index Segment and subject to our review from time to time.

The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the guaranteed minimum crediting rate) and actual charges (subject to the maximum charges), as well as the amounts of any additional premiums, partial withdrawals made and loans taken.

Depending upon actual experience you may need to make additional premium payments to keep the policy in force.

What is the Illustrated Yield upon Surrender?

The Illustrated Yields upon Surrender represent the annualised investment return you may receive upon the surrender of the policy at the age of 70, net of the cost of insurance and charges, based on the Illustrated Crediting Rates and Charges.

The Illustrated Yields upon Surrender based on current general crediting rate for General Account, current assumed crediting rates for Index Sub-Account(s) and current charges are not guaranteed and do not represent the upper and lower limits on the yield you could receive on this policy.

The total Illustrated Yields upon Surrender have not taken into consideration any additional premiums paid, partial withdrawals made and loans taken. The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the guaranteed minimum crediting rate) and actual charges (subject to the maximum charges) as well as the amounts of any additional premiums paid, partial withdrawals made and loans taken.

Please note that the guaranteed benefit you receive upon the surrender of the policy may be less than the total premiums paid.

What is the impact of deductions on what you might get back?

The following table illustrates the effect that deductions will have on the amount you get back on surrender or maturity. It also highlights the cost of surrendering the policy early.

Table of Deductions

End of Policy Year/Age	Total Premiums Paid To-date (US\$)	DEDUCTIONS					
		Illustrated values at the guaranteed minimum crediting rate and maximum charges (US\$) ^{1,2,3,4}			Illustrated values at the current General Account general crediting rate, current assumed Index Account crediting rate and current charges (US\$) ^{2,4,5}		
		Value of Premiums Paid To-date (US\$)	Effect of Deductions To-date (US\$)	Surrender Value (US\$)	Value of Premiums Paid To-date (US\$)	Effect of Deductions To-date (US\$)	Surrender Value (US\$)
1/31	87,131	0	0	0	92,881	92,881	0
2/32	174,262	179,524	163,778	15,746	191,893	174,651	17,242
3/33	261,393	271,988	239,994	31,994	297,439	261,598	35,841
4/34	348,524	366,301	268,937	97,364	409,952	298,333	111,618
5/35	435,655	462,501	298,095	164,405	529,890	336,935	192,955

7/37	609,917	660,710	361,044	299,666	794,037	424,999	369,037
8/38	697,048	762,798	388,358	374,440	939,325	466,545	472,780
9/39	784,179	866,927	413,544	453,384	1,094,201	506,996	587,205
10/40	871,310	973,139	430,632	542,507	1,259,300	538,177	721,123
15/45	871,310	1,074,424	634,765	439,659	1,762,111	909,854	852,257
20/50	871,310	1,186,251	780,561	405,690	2,465,682	1,335,062	1,130,621
25/55	871,310	1,309,717	975,781	333,936	3,450,175	1,973,483	1,476,692
30/60	871,310	1,446,033	1,261,562	184,471	4,827,753	2,922,071	1,905,682
35/65	871,310	0	0	0	6,755,367	4,340,557	2,414,810
40/70	871,310	0	0	0	9,452,635	6,452,269	3,000,367

What do the columns in the Table of Deductions mean?

- (1) "Value of Premiums Paid To-date" is obtained by accumulating the premiums paid to date at the Illustrated Investment Rate of Return, assuming the premiums paid can be invested without deduction for the cost of insurance and without any expenses.
- (2) The difference between the "Value of Premiums Paid To-date" and "Surrender Value" represents the "Effect of Deductions To-date". This is the accumulated value of the deductions for the distribution costs, expenses, mortality and morbidity costs, surrender penalty, expected transfers to shareholders and expected tax payments.

¹Illustrated values at the higher of (a) or (b), where:

- (a) is based on the guaranteed minimum crediting rate for General Account, floored crediting rate for Index Account and maximum charges; and
- (b) is the Guaranteed Minimum Surrender Value² based on maximum charges.

²We will pay the Guaranteed Minimum Surrender Value at the time of full surrender. It will be paid when the Guaranteed Minimum Surrender Value is higher than the Policy Value less Surrender Charge. Guaranteed Minimum Surrender Value ensures that the Policy Value will grow at a fixed crediting rate of (2.00% p.a.) regardless of the actual crediting rates and loyalty bonus earned by the General Account and Index Account, less applicable charges.

³The illustrated values are based on guaranteed minimum crediting rate for General Account of 2.00% p.a., floored crediting rate for S&P 500 Index Sub-Account, Nasdaq-100 Index Sub-Account and S&P U.S. Tactical Multi-Asset Index Sub-Account of 0.00% p.a., floored crediting rate for S&P Global Diversified Index Sub-Account of 0.45% p.a. and maximum charges. The values in the Policy Illustration are illustrated assuming the values in each Index Sub-Account will grow at its respective floored crediting rate. The illustrations include Loyalty Bonus Rate (if applicable) to both General Account and Index Account.

⁴The guaranteed minimum crediting rate for the General Account on the First Net Premium in the first policy year is equal to the Guaranteed Interest Rate Lock Rate.

⁵The illustrated values are based on current General Account general crediting rate of 4.35% p.a. and current assumed crediting rate for S&P 500 Index Sub-Account of 6.60% p.a., Nasdaq-100 Index Sub-Account of 6.70% p.a., S&P Global Diversified Index Sub-Account of 7.30% p.a., S&P U.S. Tactical Multi-Asset Index Sub-Account of 7.80% p.a.. The values in this Policy Illustration are illustrated assuming the values in each Index Sub-Account will grow at its respective current assumed crediting rate. The illustrations include Loyalty Bonus Rate (if applicable) to both General Account and Index Account.

How much are you paying for Distribution costs?

This table shows the total costs of distribution that HSBC Life (Singapore) Pte. Ltd. expects to incur in relation to your policy, including the cost of any financial advice provided to you.

Total Distribution Cost

End of Policy Year/Age	Total Premiums Paid To-date (US\$)	Total Distribution Cost To-date (US\$)
1/31	87,131	132,282
2/32	174,262	132,282
3/33	261,393	132,282
4/34	348,524	132,282
5/35	435,655	132,282
6/36	522,786	132,282
7/37	609,917	132,282
8/38	697,048	132,282
9/39	784,179	132,282
10/40	871,310	132,282
15/45	871,310	132,282
20/50	871,310	132,282
25/55	871,310	132,282
30/60	871,310	132,282
35/65	871,310	132,282
40/70	871,310	132,282

What does the last column represent?

- (1) The Total Distribution Cost To-date is the sum of each year's expected distribution-related costs, without interest. Such costs include cash payments in the form of commission, costs of benefits and services to the distribution channel.
- (2) Please note that the Total Distribution Cost is not an additional cost to you; it has already been allowed for in calculating your premium.
- (3) You can obtain the Total Distribution Cost of each of the supplementary benefits (if applicable) from your financial adviser or its representatives.

Supplementary Policy Illustration – Must be read in conjunction with the Main Illustration

Guaranteed crediting rate illustration

This is an illustration of the illustrated Policy Values, Cash Values and Death Benefits under the guaranteed basis. The illustrations are based on the assumption that the Planned Premiums will be paid on time. It is important for you to understand that the actual figures, values and benefits could be more or less favorable depending on the actual charges and crediting rates applied to your policy as compared to the charges and crediting rates illustrated in this document.

					Interest Rate for the Guaranteed Interest Rate Lock (Apply to the General Account & First Net Premium only): 4.40%

90/120	871,310	0	0	871,310	0	0	0	0	0

¹Illustrated values at the higher of (a) or (b), where:

- (a) is based on the guaranteed minimum crediting rate for General Account, floored crediting rate for Index Account and maximum charges; and
- (b) is the Guaranteed Minimum Surrender Value² based on maximum charges.

²We will pay the Guaranteed Minimum Surrender Value at the time of full surrender. It will be paid when the Guaranteed Minimum Surrender Value is higher than the Policy Value less Surrender Charge. Guaranteed Minimum Surrender Value ensures that the Policy Value will grow at a fixed crediting rate of (2.00% p.a.) regardless of the actual crediting rates and loyalty bonus earned by the General Account and Index Account, less applicable charges.

³The illustrated values are based on guaranteed minimum crediting rate for General Account of 2.00% p.a., floored crediting rate for S&P 500 Index Sub-Account, Nasdaq-100 Index Sub-Account and S&P U.S. Tactical Multi-Asset Index Sub-Account of 0.00% p.a., floored crediting rate for S&P Global Diversified Index Sub-Account of 0.45% p.a. and maximum charges. The values in the Policy Illustration are illustrated assuming the values in each Index Sub-Account will grow at its respective floored crediting rate. The illustrations include Loyalty Bonus Rate (if applicable) to both General Account and Index Account.

⁴The guaranteed minimum crediting rate for the General Account on the First Net Premium in the first policy year is equal to the Guaranteed Interest Rate Lock Rate.

Supplementary Policy Illustration – Must be read in conjunction with the Main Illustration

Current crediting rate illustration

This is an illustration of the illustrated Policy Values, Cash Values and Death Benefits under the current illustrated basis. The illustrations are based on the assumption that the Planned Premiums will be paid on time. It is important for you to understand that the actual figures, values and benefits could be more or less favorable depending on the actual charges and crediting rates applied to your policy as compared to the charges and crediting rates illustrated in this document.

¹Illustrated values at the higher of (a) or (b), where:

- (a) is based on the current general crediting rate for General Account, current assumed crediting rate for Index Account and current charges; and
- (b) is the Guaranteed Minimum Surrender Value² based on current charges.

²We will pay the Guaranteed Minimum Surrender Value at the time of full surrender. It will be paid when the Guaranteed Minimum Surrender Value is higher than the Policy Value less Surrender Charge. Guaranteed Minimum Surrender Value ensures that the Policy Value will grow at a fixed crediting rate of (2.00% p.a.) regardless of the actual crediting rates and loyalty bonus earned by the General Account and Index Account, less applicable charges.

³The guaranteed minimum crediting rate for the General Account on the First Net Premium in the first policy year is equal to the Guaranteed Interest Rate Lock Rate.

⁴The illustrated values are based on current General Account general crediting rate of 4.35% p.a. and current assumed crediting rate for S&P 500 Index Sub-Account of 6.60% p.a., Nasdaq-100 Index Sub-Account of 6.70% p.a., S&P Global Diversified Index Sub-Account of 7.30% p.a., S&P U.S. Tactical Multi-Asset Index Sub-Account of 7.80% p.a.. The values in this Policy Illustration are illustrated assuming the values in each Index Sub-Account will grow at its respective current assumed crediting rate. The illustrations include Loyalty Bonus Rate (if applicable) to both General Account and Index Account.

Supplementary Policy Illustration – Must be read in conjunction with the Main Illustration

Alternate crediting rate illustration (Optional)

This is an illustration of the illustrated Policy Values, Cash Values and Death Benefits under the alternate illustrated basis. The illustrations are based on the assumption that the Planned Premiums will be paid on time. It is important for you to understand that the actual figures, values and benefits could be more or less favorable depending on the actual charges and crediting rates applied to your policy as compared to the charges and crediting rates illustrated in this document.

					Interest Rate for the Guaranteed Interest Rate Lock (Apply to the General Account & First Net Premium Only): 4.40%				
End of Policy Year/Age	Total Planned Premiums Paid (US\$)	Total Unscheduled Premium Paid (US\$)	Total Partial Surrender (US\$)	Total Premiums Paid To-date (US\$)	Illustrated values at the alternate General Account general crediting rate, alternate assumed Index Account crediting rate and current charges ^{1,2,3,4}				
					Policy Value (US\$)	Policy Value less Surrender Charge (US\$)	Guaranteed Minimum Surrender Value ² (US\$)	Cash Value ^{1,2} (US\$)	Death Benefit (US\$)

Explanatory Notes

Scope of the Illustration:

- (i) This document is only a summary illustration of the main benefits of your policy. You should consult your financial adviser or HSBC Life (Singapore) Pte. Ltd. for more information.
- (ii) The terms and rates actually applied to your policy, e.g. the Cap Rate of the Index, General Crediting Rate, may be different from those illustrated here. They will be determined based on the prevailing terms and rates on the date we issue your policy.

Illustration Assumptions:

- (iii) The illustration assumes that Planned Premiums are paid in full.
- (iv) Initial Total Premium is the sum of Planned Premium and Initial Unscheduled Premium. Initial Unscheduled Premium is the additional premium amount at day 1 over the Planned Premium.
- (v) All crediting rates applied to the General Account and Holding Segment in this illustration are annual effective rates applied on a monthly basis. The actual crediting rates will be applied on a daily basis.
- (vi) In the illustration, all interest payments are credited to the Policy Value after the Policy Premium Charge, the Policy Expense Charge and the Insurance Charge have been deducted. For details of the charges, please refer to the Charges and Premiums sections in the Product Summary.
- (vii) The Guaranteed Interest Rate Lock Rate of 4.40% p.a. is applies to the First Net Premium paid into the General Account during the Guaranteed Interest Rate Lock Period. The rate is valid as at the print date of this illustration and may be different from the final rate applicable when policy is issued.
- (viii) The guaranteed minimum crediting rate of 2.00% p.a. is the minimum interest rate used to calculate crediting interest for the General Account and Holding Segment throughout the policy term.
- (ix) The illustrated General Account general crediting rate is the assumed rate of interest credited to the value of the Holding Segments, all Premium(s) paid into the General Account other than the First Premium, and the First Net Premium paid into the General Account after the Guaranteed Interest Rate Lock Period. The assumed illustrated General Account general crediting rate is NOT guaranteed and may be different from the current rate. The actual General Account general crediting rates is periodically declared by us may be higher or lower.
- (x) The Floor Rate is the minimum crediting rate which applies to the Index Account throughout the policy term.
- (xi) The illustrated current assumed Index Account crediting rate is the assumed rate of interest credited to the value of the Index Account throughout the policy term. The assumed illustrated Index Account crediting rate is NOT guaranteed and may be different from the current rate. The actual Index Account crediting rates is periodically declared by us may be higher or lower.
- (xii) The maximum charges, which represents 110% of the current scale of Insurance Charges, as set out in the Product Summary's Glossary, are used in the illustration under the guaranteed basis while current charges are used under the illustrated (non-guaranteed) Basis. The rates of charges used in this illustration are assumed to remain unchanged throughout the policy term.
- (xiii) The policy includes a Terminal Illness Benefit which pays an advancement on the Death Benefit. The Terminal Illness Benefit is capped at an aggregate of SGD 3,000,000 (or its equivalent in the Policy Currency) per individual. We will pay if the Life Insured is diagnosed as suffering from Terminal Illness.
- (xiv) The Guaranteed Minimum Surrender Value ensures that the Policy Value will grow at a fixed crediting rate of 2.00% p.a. regardless of the actual crediting rates and loyalty bonus earned by the General Account and Index Account. The Guaranteed Minimum Surrender Value only applies upon full surrender of the policy.
- (xv) The Loyalty Bonus is reflected in the illustration's Policy Value and Cash Value. We'll pay the Loyalty Bonus from Policy Year 11 to Age 121. Loyalty Bonus won't be credited if the Policy Value exceeds the Sum Insured.
- (xvi) Illustrated values in this illustration have been rounded to nearest dollar.
- (xvii) The No-Lapse Guarantee Benefit maintains the Sum Insured (at our cost) until the earlier of the death of the Life Insured and the 5th Policy Anniversary. We'll only do this if you've paid the No-Lapse Guarantee Premium for the selected premium term before the stated No-Lapse Guarantee Premium Due Date; and you haven't surrendered any part of the Policy Value except the Surrenderable Portion and the Total Premiums paid minus outstanding Indebtedness is higher than the No-Lapse Guarantee Premium. The No-Lapse Guarantee Benefit will cease to apply to the policy if the No-Lapse Guarantee Premium is not paid before the No-Lapse Guarantee Premium Due Date; or you have surrendered a part of the Policy Value other than the Surrenderable Portion, or your policy terminates or the Life Insured is replaced. Please refer to the Product Summary for details on No-Lapse Guarantee Benefit.
- (xviii) Lifestyle Benefit only applies if you are eligible and qualified. Prior to the end of Policy Year 3 (after Policy Year 1), you may provide a prescribed form and relevant medical reports, at your own expense, as proof of improved risk factors. If you're eligible subject to our underwriting assessment and/or any requirement that we may impose from time to time and we confirm your eligibility for the discount upon receiving your request by the end of Policy Year 3, you'll receive 1% discount on the Insurance Charge for the next 10 years. In this Policy Illustration, the 1% discount will not be reflected.

- Withdrawal Benefits:

(xix) A partial surrender will reduce the Policy Value and Sum Insured. We'll treat any partial surrender as a request for full surrender if it would cause the remaining Cash Value to fall below USD 5,000 (or its equivalent in the Policy Currency) or Sum Insured to fall below the minimum Sum Insured of USD 250,000 (or its equivalent in the Policy Currency).
 (xx) We'll deduct a partial surrender first from the General Account, then the Holding Segment and then proportionately from the Index Segment(s) created under the Index Sub-Account. We'll deduct a Surrender Charge if the withdrawal occurs during the Surrender Charge Period or will result in a reduction in Sum Insured. We won't deduct a Surrender Charge if you meet the Free Surrender criteria. For more details, please refer to the Partial or Full Surrender clause in the Policy General Provisions.
- Selected Benefit Option(s):

(xxi) You have chosen to receive Death Benefit in Lump Sum. Please refer to Product Summary for details on Death Benefit Instalment Option.

Appendix I – Illustration of Charges

1. **Policy Premium Charge:** Please refer to the Product Summary.
2. **Policy Expenses Charge:** 2,000.00 per month for 15 years (Current Rate of Charge)
3. **Surrender Charges Table:**

Policy Year	Surrender Charge Amount Based on illustrated Policy Values	
	At the guaranteed minimum crediting rate and maximum charges	At the current General Account general crediting rate, current assumed Index Account crediting rate and current charges
1st	50,321	55,256
2nd	86,158	97,706
3rd	122,355	143,365
4th	112,649	136,423
5th	102,720	128,637
6th	92,748	120,144
7th	85,967	115,264
8th	72,203	100,287
9th	55,619	80,073
10th	30,825	46,029
11th	25,031	40,896
12th	19,710	35,479
13th	14,887	29,766
14th	10,585	23,743
15th	6,826	17,393
16th+	0	0

Policy Year	Surrender Charge Percentage (%)
1st	100.0 %
2nd	85.0 %
3rd	80.0 %
4th	55.0 %
5th	40.0 %
6th	30.0 %
7th	23.8 %
8th	17.5 %
9th	12.0 %
10th	6.0 %
11th	5.2 %
12th	4.4 %
13th	3.6 %
14th	2.8 %
15th	2.0 %
16th+	0.0 %

The Surrender Charge amount is determined according to Surrender Charge percentage and illustrated Policy Values.

19	-	44	0.110	69	0.853	94	7.027	119	16.806
20	-	45	0.118	70	0.822	95	7.391	120	17.239
21	-	46	0.128	71	0.877	96	7.740		
22	-	47	0.138	72	0.947	97	8.062		
23	-	48	0.143	73	1.044	98	8.349		
24	-	49	0.149	74	1.175	99	8.587		

Note: The illustrated values in Table of Monthly Cost of Insurance have been rounded to three decimal places.

5. **Administrative Charges:** If you wish to change the life insured, Administrative Charges may apply.

HSBC Life Diamond Prestige IUL II

Product Summary

Details of Product Provider

HSBC Life (Singapore) Pte. Ltd. ("HSBC", "We", "Our", "Us") (Reg. No. 199903512M) is the product provider and underwriter for this product. This product is distributed through the HSBC's representatives or appointed distributors only.

Important Notes

This document isn't a legal contract and only covers the main product features. The content of this document may vary from the terms of the Policy General Provisions finally issued to you. Only terms in your Policy General Provisions are binding between us. Please refer to the Policy General Provisions for full contractual provisions and definitions of capitalized terms used in this document. If your Policy General Provisions says something different to this summary, then we'll follow what the Policy General Provision says. A sample of the Policy General Provisions is available upon request. You can ask our representatives or appointed distributors for more details.

In this Product Summary, reference to "Age" means the Life Insured's age last birthday.

As buying a life insurance policy is a long-term commitment, an early termination of the Policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid.

Please refer to the Policy Illustration which illustrates the surrender value you may receive in different Policy Years if you intend to surrender your Policy.

You should carefully examine the features of this product, particularly the surrender provisions and your investment objectives or expectations, with your financial advisor before deciding to invest. You should read this Product Summary with the portfolio factsheet (which identifies underlying assets, crediting rate and investment philosophy).

Any untrue, inaccurate or incomplete Application information may void the Policy. If this happens, it will be void from the Issue Date. We can change or revoke the Policy; or adjust the Benefits. We can do this at our sole and absolute discretion. If the Policy is void or revoked, we'll:

- ◆ Refund your Premiums without interest; and
- ◆ Deduct any medical and underwriting expenses we've incurred in accepting your Application.

Nature and Objective of the Plan

HSBC Life Diamond Prestige IUL II is a whole life non-participating universal life insurance plan denominated in US currency. It provides coverage against death and terminal illness.

The plan gives you flexibility to take advantage of the upside opportunity of the equity markets with limited market risk. It doesn't participate in the profits of any insurance fund. Premium payments are flexible, subject to the premium requirements and limit. This plan is suitable for those with protection or legacy needs. This plan is not suitable for those looking for pure insurance cover with no savings component and not suitable if you have a short-term investment horizon or are risk-adverse.

Overview of the Plan

An overview of the HSBC Life Diamond Prestige IUL II product structure:

* refer to p20 for Charges

The plan allows some flexibility like a policy loan, partial withdrawal and change in Sum Insured. If you choose to exercise any of these options, it is important for you to take note of the risk of early policy termination to avoid any loss of coverage.

For more information, you can refer to the following sections:

Quick Contents		
4	Policy Value	Sum of values in the General Account and Index Account.
5	General Account	How the General Account works.
6	Guaranteed Interest Rate Lock	The mechanism for guaranteeing a fixed rate of interest during the Guaranteed Interest Rate Lock Period.
7 (i)	Holding Segment(s)	Houses the Net Premiums in the Index Account and earns the General Crediting Rate until the Index Segment is created.
7 (ii)	Index Sub-Account(s)	The underlying Index(es). House(s) one or more Index Segment(s) where the creation of the Index Segment(s) subjects to the Index Segment Initiation Rule.
7 (iii)	Index Segment Initiation Rule	The creation, maturity and how interest is being credited into the Index Segment.
7 (iv)	Remove or substitute an Index	What we will do if we remove, add or substitute any Index(es) under the Index Sub-Account(s)
7 (v)	Subsequent Accounts Reallocation	Flexibility between General Account and Index Account and/or between Index Sub-Account(s) allocations. If you have any change in preferences, you must inform us prior to the applicable Index Segment Cutoff Date.
7 (vi)	Index Segment Maturity Options	Prior to Index Segment Maturity, you are given options to allocate the Index Segment Proceeds. You will have to inform us of your selection or the default option is to re-allocate them into the corresponding Index Segment(s) in the same Index Sub-Account(s).
8	Automatic Premium Spread	The default option is opt in. You may choose to opt out.
p20	Charges	Charges applicable to the Policy, refer to the Section on Charges on page 20.

Benefits under the Plan

1. Death Benefit

We'll pay the Death Benefit when the Life Insured dies. We'll only do this while the Policy is in force.

The Death Benefit is the higher of the Sum Insured and the Policy Value.

2. Terminal Illness (TI) Benefit

We'll pay the TI Benefit when the Life Insured is diagnosed as suffering from Terminal Illness. We'll only do this while the Policy is in force.

The TI Benefit is an advancement on the Death Benefit. The terminal illness benefit under all policies issued by us for each individual life insured is capped at an aggregate of SGD 3,000,000 (or its equivalent in the Policy Currency). We'll pay you the TI Benefit as follows:

Does the TI Benefit advance the Death Benefit in full?	We'll pay	Policy Status after payment
Yes	TI Benefit	Terminated
No, due to the SGD 3,000,000 (or its equivalent in the Policy Currency) limit per individual	TI Benefit up to the SGD 3,000,000 (or its equivalent in the Policy Currency) limit per individual	In force

On payment of the TI Benefit, the Death Benefit and Policy Value will be reduced. The TI Benefit will be deducted from the Policy Value:

- ◆ First from the General Account;
- ◆ Followed by the Holding Segment(s) proportionately; and
- ◆ Then proportionately from the Index Segment(s) created under the Index Sub-Account(s).

In addition:

- ◆ If the TI Benefit advances the Death Benefit in full, the Policy will terminate; or
- ◆ If the Death Benefit is more than the TI Benefit,
 - ◆ we will reduce the Sum Insured and Policy Value by the amount paid for TI Benefit; and
 - ◆ No further charges will be incurred; and
 - ◆ No partial surrender/ full surrender/ Policy Loan will be allowed.

If the Policy Value is zero or less after such deduction:

- ◆ The Policy remains in force for 12-months after payment of the TI Benefit;
- ◆ We'll pay any remaining Death Benefit if the Life Insured dies within 12-months after payment of the TI Benefit and your Policy will terminate; or
- ◆ If the Life Insured survives the 12-months period after payment of the TI Benefit, your Policy will terminate after the expiry of that 12-month period. When this happens, we'll pay the Policyowner the remaining Sum Insured. We'll deduct all Indebtedness from the Sum Insured before we make payment.

We'll only pay the TI Benefit once. We don't have to pay you the TI Benefit if:

- ◆ We've already paid a claim for the TI Benefit;
- ◆ We've paid the amount equivalent to SGD 3,000,000 (or its equivalent in the Policy Currency) limit per individual; or
- ◆ Your Policy has been terminated.

Terminal Illness means "any condition caused by illness or injury, where at the time of claim, despite all reasonable medical treatment, the Life Insured is expected to live for no more than 12 months."

The specialist medical practitioner treating the condition must provide supporting evidence of the condition, possible medical treatment, the prognosis after undergoing the possible medical treatment, and certify that the Life Insured is expected to live for no more than 12 months despite all possible medical intervention. We reserve the right to appoint an independent medical specialist who is an expert in the condition to confirm the diagnosis and prognosis. Terminal Illness in the presence of HIV infection is excluded.

3. Death Benefit Instalment Option

At the point of policy application, you can select for the Death Benefit to be paid in annual instalments over a period of 2 to 10 years. Once selected, you are not allowed to change the Benefit Payout Period. You may submit a request to cancel the Death Benefit Instalment Option no earlier than 1 year from the Issue Date and before the death of the Life Insured.

The Death Benefit Instalment Option is subject to the following terms and conditions:

- upon the death of the Life Insured, the Death Benefit payable will be paid in yearly instalments over the Benefit Payout Period as follows:
 - (a) the first instalment will be paid on the date we approve the claim (the “**Claim Approval Date**”). The subsequent instalments will be paid on a yearly basis on the subsequent anniversaries of the Claim Approval Date, until the end of the Benefit Payout Period;
 - (b) each instalment is calculated by multiplying the Death Benefit with the Instalment Factor and rounded to the nearest dollar:

Example:

The Death Benefit payable is \$3,000,000, for a Benefit Payout Period of 6 years. The Instalment Factor is 17.17%.

Each instalment payable is $\$3,000,000 \times 17.17\% = \$515,100$ (rounded to the nearest dollar).

- you can only nominate a natural person as the Beneficiary;
- the Death Benefit Instalment Option will still apply when there is a change of Life Insured; and
- the Death Benefit Instalment Option will be cancelled automatically when:
 - (a) you submit a request to cancel the Death Benefit Instalment Option;
 - (b) we find that you or any of the Beneficiaries are not a natural person at any time during the Policy Term;
 - (c) the Policyowner who is not the Life Insured dies during the Benefit Payout Period, and when this happens, the remaining Death Benefit will be immediately aggregated without applying the Instalment Factor and paid in a lump sum to the Policyowner's estate, subject to applicable law

Example:

Death Benefit payable: \$3,000,000

Benefit Payout Period: 6 years

After 2 instalments have been paid, the Policyowner dies. We will pay the remaining death benefit of $\$3,000,000 \times (6-2)/6 = \$2,000,000$ in a lump sum;

- (d) any Beneficiary dies during the Benefit Payout Period and when this happens, the remaining Death Benefit will be paid in a lump sum to the deceased Beneficiary's estate. If there is more than 1 Beneficiary, the remaining Death Benefit will be immediately aggregated without applying the Instalment Factor and paid out in accordance with the respective shares of the deceased Beneficiary's estate and the surviving Beneficiary(ies) as allocated by the Policyholder in accordance with the nomination made. The payout will be paid in a lump sum to each of them; or
- (e) the policy is assigned to another person including collateral assignment or there is a change of Policyowner, whichever is the earliest.

Once the Death Benefit Instalment Option has been cancelled, it cannot be selected again and we will pay the Death Benefit in a lump sum when it becomes payable.

4. Policy Value

The Policy Value at any time is the sum of values in the General Account and Index Account.

When we receive your Premiums, we'll deduct the Policy Premium Charge. The Net Premiums will then be allocated into the General Account and Index Account, based on your chosen Net Premium Allocation. You can tell us your choice for Net Premium Allocation before the Issue Date or make a request to us during the policy term.

On the Policy Effective Date and on each Monthly Anniversary Date, we will deduct the applicable charges from the Policy Value. It will be deducted proportionately from the (i) General Account; (ii) Holding Segment(s); and (iii) Index Segment(s) created under the Index Sub-Account(s).

You may also surrender your Policy Value partially or fully.

5. General Account

The General Account forms part of the Policy Value.

We'll apply 2 interest rates to the value in your General Account. These rates are:

- ◆ **A Guaranteed Interest Rate Lock Rate**

which applies to the value of the General Account derived from the First Net Premium. It's guaranteed under the Guaranteed Interest Rate Lock.

You may read more on the Guaranteed Interest Rate Lock section below.

- ◆ **A General Crediting Rate**

which applies:

- ◆ During the Guaranteed Interest Rate Lock Period, to the portion of the General Account excluding the First Net Premium; and

- ◆ After the Guaranteed Interest Rate Lock Period, to the entire value of the General Account.

The Guaranteed Minimum Crediting Rate is 2.00%.

The interest will be credited daily into the General Account. Interest is non-forfeitable after it has been credited into the General Account.

At policy application, we do not allow 100% Net Premium Allocation into the General Account. This option will be enabled after the first Index Segment Maturity Date.

6. Guaranteed Interest Rate Lock

The Guaranteed Interest Rate Lock guarantees the Guaranteed Interest Rate Lock Rate during the Guaranteed Interest Rate Lock Period of 1 year. This guarantee applies irrespective of any subsequent change in the Guaranteed Interest Rate Lock Rate or the General Crediting Rate. This rate only applies to the First Net Premium paid into the General Account.

7. Index Account

The Index Account forms the other part of the Policy Value. It's made up of Holding Segment(s) and Index Sub-Account(s).

(i) Holding Segment(s)

The Net Premiums allocated to the Index Account will be housed in the Holding Segment(s) before further allocation into the selected Index Sub-Account(s) on the next applicable Index Segment Initiation Date. The First Net Premiums will be housed for a minimum of 21 days from the Issue Date (date exclusive) before allocating into the Index Sub-Account(s) on the next applicable Index Segment Initiation Date. (e.g. If Issue Date is 25 May, the First Net Premium will be housed for a minimum of 21 days until 15 June, and continue to be housed until 15 July since this is the next applicable Index Segment Initiation Date).

We'll apply the General Crediting Rate on the values in the Holding Segment(s), subject to the Guaranteed Minimum Crediting Rate. The interest will be credited daily into the Holding Segment(s). Interest is non-forfeitable after it has been credited into the Holding Segment(s).

(ii) Index Sub-Account(s)

The Index Sub-Account(s) is made up of one or more Index Segments where the creation of the Index Segment(s) is subject to the Index Segment Initiation Rule.

(iii) Index Segment Initiation Rule

- 1) Each Index Segment is created on the Index Segment Initiation Date and matures on the corresponding Index Segment Maturity Date.
- 2) Any amounts in the Holding Segment before the Index Segment Cutoff Date, will be used to create Index Segment on the upcoming Index Segment Initiation Date. For amounts in the Holding Segment after the Index Segment Cutoff Date, it will only be used to create Index Segment in the next applicable Index Segment Initiation Date.
- 3) On each Index Segment Maturity Date, the crediting interest will be calculated based on your chosen index(es)' point-to-point percentage change of the underlying Index value ("Index Difference").

Index Difference = $\frac{(B) - (A)}{(A)}$, expressed as a percentage and rounded to the nearest 2 decimal points, where:

(A) is the Closing Value of the Index on the trading day immediately before the Index Segment Initiation Date;

(B) is the Closing Value of the Index on the Index Segment Maturity Date.

Closing Value means a value of the Index at the end of a trading day. If the date immediately preceding the Index Segment Initiation Date or on the Index Segment Maturity Date is not a trading day for the Index, the Closing Value will be the value of the Index as of the close of the most recent prior trading day.

The crediting interest earned for the Index Segment will be the Index Difference subject to the Index Segment Floor Rate and Index Segment Cap Rate (where applicable), multiplied by the Index Segment Participation Rate.

Index Segment Crediting Rate

= Lower of [Higher of (Index Difference, Floor Rate), Cap Rate (if applicable)] x Participation Rate

The Index Segment Floor Rate, minimum Cap Rate and minimum Participation Rate are as follows:

Index Sub-Accounts	Floor Rate	Minimum Cap Rate	Minimum Participation Rate
S&P 500 Index	0.00%	3.00%	100%
Nasdaq-100 Index	0.00%	3.00%	100%
S&P Global Diversified 7.5% TCA 0.75% Decrement Index (USD) ER ("S&P Global Diversified Index")	1.00%	Not Applicable	45%
S&P U.S. Tactical Multi-Asset 4.5% TCA 0.65% Decrement Index (USD) ER ("S&P U.S. Tactical Multi-Asset Index")	0.00%	Not Applicable	100%

-
- 4) We'll credit the applicable interest amount on the day after the Index Segment Maturity Date into the Index Segment Balance to form the Index Segment Proceeds.
 - 5) The Index Segment Proceeds will be held in the Holding Segment(s) before allocating into the Index Segment(s) under the same or different Index Sub-Account(s) on the next Index Segment Initiation Date according to your instructions. Alternatively, you may also tell us how you would want to proceed with the Index Segment Proceeds. You may read more on the available options under Index Segment Maturity Options section below.
 - 6) The crediting interest amount for each Index Segment is equal to the Adjusted Index Segment Balance multiplied by the Index Difference subject to the Floor Rate, Cap Rate (where applicable) and Participation Rate as mentioned in paragraph 3 above. You may read more on the formula for Adjusted Index Segment Balance in the Glossary section.
 - 7) **No Interest** will be credited into the Index Segment if you surrender your Policy before the Index Segment Maturity Date.

Illustrative example 1 for crediting rate calculation for **S&P 500 Index**
(e.g. Floor Rate of 0%, Cap Rate 10.00% and Participation Rate of 100%)

Index Segment Initiation Date : 15 September 2025, assuming index value is at 3,800
Index Segment Maturity Date : 8 September 2026, assuming index value is at 4,370

Index Difference of the underlying index = $(4,370 - 3,800) / 3,800 = 15.00\%$

Index Segment Crediting Rate

= Lower of [Higher of (Index Difference, Floor Rate), Cap Rate (if applicable)] x Participation Rate
= Lower of [Higher of (15.00%, 0.00%), 10.00%] x 100%
= Lower of [15.00%, 10.00%] x 100%
= **10.00%**

Illustrative example 2 for crediting rate calculation for **S&P 500 Index**
(e.g. Floor Rate of 0%, Cap Rate 10.00% and Participation Rate of 100%)

Index Segment Initiation Date : 15 September 2025, assuming value is at 3,800
Index Segment Maturity Date : 8 September 2026, assuming value is at 3,370

Index Difference of the underlying index = $(3,370 - 3,800) / 3,800 = -11.32\%$

Index Segment Crediting Rate

= Lower of [Higher of (Index Difference, Floor Rate), Cap Rate (if applicable)] x Participation Rate
= Lower of [Higher of (-11.32%, 0.00%), 10.00%] x 100%
= Lower of [0.00%, 10.00%] x 100%
= **0.00%**

Illustrative example 3 for crediting rate calculation for **Nasdaq-100 Index**
(e.g. Floor Rate of 0%, Cap Rate 9.50% and Participation Rate of 100%)

Index Segment Initiation Date : 15 September 2025, assuming value is at 3,800
Index Segment Maturity Date : 8 September 2026, assuming value is at 4,050

Index Difference of the underlying index = $(4,050 - 3,800) / 3,800 = 6.58\%$

Index Segment Crediting Rate

= Lower of [Higher of (Index Difference, Floor Rate), Cap Rate (if applicable)] x Participation Rate
= Lower of [Higher of (6.58%, 0.00%), 9.50%] x 100%
= Lower of [6.58%, 9.50%] x 100%
= **6.58%**

Illustrative example 4 for crediting rate calculation for **S&P Global Diversified Index**
(e.g. Floor Rate 1%, No Cap and Participation Rate of 108%)

Index Segment Initiation Date : 15 September 2025, assuming value is at 2,400
Index Segment Maturity Date : 8 September 2026, assuming value is at 2,640

Index Difference of the underlying index = $(2,640 - 2,400) / 2,400 = 10.00\%$

Index Segment Crediting Rate

= Lower of [Higher of (Index Difference, Floor Rate), Cap Rate (if applicable)] x Participation Rate
= Lower of [Higher of (10.00%, 1.00%), N.A.] x 108%
= Lower of [10.00%, N.A.] x 108%
= **10.80%**

Illustrative example 5 for crediting rate calculation for **S&P Global Diversified Index**
(e.g. Floor Rate 1%, No Cap and Participation Rate of 108%)

Index Segment Initiation Date : 15 September 2025, assuming value is at 2,400
Index Segment Maturity Date : 8 September 2026, assuming value is at 2,140

Index Difference of the underlying index = $(2,140 - 2,400) / 2,400 = -10.83\%$

Index Segment Crediting Rate

= Lower of [Higher of (Index Difference, Floor Rate), Cap Rate (if applicable)] x Participation Rate
= Lower of [Higher of (-10.83%, 1.00%), N.A.] x 108%
= Lower of [1.00%, N.A.] x 108%
= **1.08%**

Illustrative example 6 for crediting rate calculation for **S&P U.S. Tactical Multi-Asset Index**
(e.g. Floor Rate 0%, No Cap and Participation Rate of 230%)

Index Segment Initiation Date : 15 September 2025, assuming value is at 2,400
Index Segment Maturity Date : 8 September 2026, assuming value is at 2,550

Index Difference of the underlying index = $(2,550 - 2,400) / 2,400 = 6.25\%$

Index Segment Crediting Rate

= Lower of [Higher of (Index Difference, Floor Rate), Cap Rate (if applicable)] x Participation Rate
= Lower of [Higher of (6.25%, 0.00%), N.A.] x 230%
= Lower of [6.25%, N.A.] x 230%
= **14.38%**

(iv) Removal or substitute an Index

We can remove or substitute an existing Index with another comparable index at our discretion if we determine that such Index is no longer suitable.

In lieu of adding or substituting any new Index Sub-Account, we may reallocate the Index Account allocation of the affected Index Sub-Account to a new Index Sub-Account at our absolute discretion. The revised Index Account allocation will apply to any future amounts allocated into the Index Account.

We will send you a notification at least thirty (30) days prior to the changes made to an Index Sub-Account. Any open Index Segment(s) of the existing Index will remain until such Index Segment Maturity Date after which the relevant Index Segment will be allocated according to your instruction(s).

(v) Subsequent Accounts Reallocation

You may request before the Index Segment Cutoff Date to:

- Transfer your Policy Value between the General Account and Index Account; and/or
- Transfer your Policy Value between Index Sub-Account(s).

For transferring of Policy Value from General Account to Index Account, different handling will apply if Automatic Premium Spread is selected.

Upon our approval of your request, we will process the transfer of balances between Index Account and General Account, and/or between the Index Sub-Account(s):

- From Index Account to General Account: The Index Segment Proceeds will be transferred to the General Account after the Index Segment matures;
- From General Account to Index Account: The value of the General Account will be transferred to the Holding Segment(s) and housed until the Index Segment End Date;
- Between the Index Sub-Account(s): The Index Segment Proceeds will be transferred to the Holding Segment(s) after the Index Segment matures and housed until the Index Segment End Date.

You may read more on the available options under the Index Segment Maturity Options clause below.

The minimum amount of transfer must be in multiples of 10% and a minimum of USD 5,000 (or its equivalent in the Policy Currency). The remaining Policy Value must be USD 5,000 (or its equivalent in the Policy Currency) and above. If the balance is below USD 5,000 (or its equivalent in the Policy Currency), the entire balance in one account will be transferred to the other account.

We won't process any such transfer or change request received on or after the Index Segment Cutoff Date. We'll allocate according to your latest instructions on the next relevant Index Segment Initiation Date.

(vi) **Index Segment Maturity Options**

On each Index Segment Maturity Date, you have the following options:

Options for your Index Segment Proceeds	
Option 1 (default)	Re-allocate into the next corresponding Index Segment within the same Index Sub-Account(s). You can do this before the Index Segment Cutoff Date prior to the next Index Segment Initiation Date. We can decide to substitute or stop offering any Index Sub-Account. We won't be able to carry out your instructions if this happens.
Option 2	Transfer them into another Index Sub-Account(s) and/or the General Account.

You may select different option(s) for each Index Segment.

Option 1 is the default option. We'll use this if you don't tell us your choice. You must tell us your choice before the Index Segment Cutoff Date prior to any upcoming Index Segment Initiation Date.

Please note that the Index Segment Cap Rate and Participation Rate information as shown in the policy illustration are only for illustration purpose and is not guaranteed. It's intended to help you decide on the maturity option. We'll set the actual Index Segment Cap Rate and Participation Rate on each Index Segment Initiation Date.

8. Automatic Premium Spread

This Policy has the option that allows the spreading of premium to create Index Segments over 12 months.

If you select this option, the Net Premiums (including any amount transfer from the General Account) allocated into the Index Account will be:

- ◆ Spread into 12 portions ("Spread Amount") as follows:
 - a) The 1st to 11th portion is equal to the amount allocated divided by 12 and rounded to 2 decimal points; and
 - b) The 12th portion is equal to the remaining balance of the amount allocated.
- ◆ The 12 portions will be held in the 12 different individual Holding Segments respectively for the creation of each Index Segments in the next 12 months, subject to the Index Segment Initiation Rule;
- ◆ For any amounts received before the Index Segment Cutoff Date of the upcoming Index Segment Initiation Date, the Spread Amount will only start being allocated into the next 12 individual Holding Segments. Otherwise, for amounts received after the Index Segment Cutoff Date, the Spread Amount will start being allocated from the subsequent individual Holding Segments accordingly;
- ◆ For the avoidance of doubt, there will only be up to 12 individual Holding Segments and 12 Index Segments under each Index Sub-Account of the Policy at any time.

While this option remains valid, any Net Premiums allocated into the Index Account subsequently will be dealt with in the similar manner as described above.

You can select this feature before the Issue Date or at any time after Policy Year 1 from the Issue Date.

You can also opt out from this option. Any change will only apply to future premiums allocated to the Index Account. Any on-going premium spread amount will not be interrupted.

9. No-Lapse Guarantee Benefit

We'll maintain the Sum Insured (at our cost) until the earlier of:

- ♦ The death of the Life Insured; and
- ♦ The 5th Policy Anniversary.

We'll only do this if you meet the following conditions:

- ♦ You've paid the No-Lapse Guarantee Premium for the selected premium term before the stated No-Lapse Guarantee Premium Due Date;
- ♦ You haven't surrendered any part of the Policy Value except the Surrenderable Portion; and
- ♦ Total Premiums paid minus outstanding Indebtedness is higher than the No-Lapse Guarantee Premium.

The No-Lapse Guarantee Benefit will cease to apply to your Policy if:

- ♦ The No-Lapse Guarantee Premium is not paid before the No-Lapse Guarantee Premium Due Date; or
- ♦ You have surrendered a part of the Policy Value (excluding the Surrenderable Portion);
- ♦ Your Policy terminates; or
- ♦ The Life Insured is replaced.

The No-Lapse Guarantee Premium for the different premium terms are:

Premium Term	No-Lapse Guarantee Premium payable by		
	At Policy Inception	Within 30 calendar days from	
		1 st Policy Anniversary*	2 nd Policy Anniversary*
Single Pay	25% of SP		
Multi-Pay 2 – 10	1 st annual Planned Premium	2 nd year Planned Premium	
Multi-Pay 15 and above	1 st year Planned Premium	2 nd year Planned Premium	3 rd year Planned Premium

*date inclusive

10. Change of Life Insured

You can ask us to change the Life Insured. You'll need to use the prescribed application form(s) and follow the below:

Policyowner	Conditions of Request
Corporation	You must: ♦ Inform us in writing if the Life Insured is no longer employed with the Policyowner. This includes any associated corporation or connected business entity; and ♦ Apply to us to change the Life Insured. We don't have to grant your request. If we don't agree and the Life Insured is no longer employed with the Policyowner, we'll terminate the Policy. We'll also return the Cash Value to you.
Individual	You may apply to change the Life Insured to another Life Insured. You may make up to 2 changes during the Policy term. We don't have to grant your request.

We can decide if we'll accept any replacement Life Insured. It's our decision alone. It will depend on:

- ♦ You showing satisfactory proof that you or the business organisation or corporation has an insurable interest on the new life insured;
- ♦ You fulfil any terms and conditions we ask you to; and
- ♦ The new life insured meets our prevailing underwriting requirements. You cannot change the Life Insured if we've paid the TI Benefit.

If we accept your proposed change in Life Insured:

- The Insurance Charge and Policy Expense Charge will be adjusted to reflect the new Life Insured's:
 - Age.
 - Gender.
 - Country of residence.
 - Underwriting class.
 - Any additional ratings.
- Loyalty Bonus expiry date will be readjusted based on the new life insured's age.
- Time periods for exclusions and incontestability will restart. We'll restart these from the date of the change.
- Any No-Lapse Guarantee Benefit will terminate.

Once the change in Life Insured becomes effective:

- You'll receive an Endorsement with the new life insured's particulars; and
- The cover for the original Life Insured ends. The new life insured's cover starts on the new issue date. You can find this in the Endorsement. All rights in connection with the original Life Insured are immediately terminated.

In accepting the new Life Insured, we can impose an adjustment cost. This can only be set after the relevant Index Segment Maturity Date. We'll reflect the adjustment cost amount in your statement.

We can't always substitute a Life Insured under your Policy. This could be because of applicable laws or regulations. There might also be other practical constraints. If this happens, we'll need to issue a new policy. We'll only do this if we accept the new life insured. All benefits, privileges and values under your Policy will be terminated and transferred fully as far as this is practicable to the new policy.

11. Guaranteed Minimum Surrender Value

Guaranteed Minimum Surrender Value is the Policy Value earning an interest of 2.00% p.a. upon Policy surrender regardless of the performance of the General Account and the Index Account.

If the Guaranteed Minimum Surrender Value is higher than the Policy Value after deducting applicable Surrender Charge, we will:

- (a) pay the Guaranteed Minimum Surrender Value less Policy Loan upon full surrender of the Policy; or
- (b) use the Guaranteed Minimum Surrender Value if this Policy should go into default under Grace Period.

Any Transaction made will affect the Guaranteed Minimum Surrender Value.

12. Quit Smoking Incentive

Quit Smoking Incentive allows “Preferred Smokers” and “Standard Smokers” to enjoy the advantage of “Standard Non-Smoker” charges for the first 3 Policy Years. If by the end of Policy Year 3, you provide satisfactory evidence (as determined by us) that the Life Insured has quit smoking for at least 12 consecutive months, we’ll reclassify the Policy as “Standard Non-Smoker”.

Future Policy Values will continue to reflect “Standard Non-Smoker” charges provided that the following conditions are fulfilled:

- ♦ The Life Insured is underwritten as “Preferred Smoker” and “Standard Smoker” status from the Issue Date; and
- ♦ The Policy has been issued for more than 12 months; and
- ♦ The Life Insured must, at his or her own expense, provide us with a negative urine nicotine test conducted by our appointed Doctor; and
- ♦ The Life Insured must submit the prescribed form, declaring that he or she has stopped smoking for at least 12 consecutive months prior to the date of submission of the completed form and such declaration has been approved and accepted by us.

If you don’t provide this evidence, the appropriate “Smoker” Policy Expense Charge and Insurance Charge will be applied from the 4th Policy Year onwards.

13. Lifestyle Benefit

The Lifestyle Benefit applies if you’ve history of the following conditions upon application only:

- ♦ Overweight;
- ♦ Pre-diabetes;
- ♦ Type 2 diabetes;
- ♦ Hyperlipidemia; or
- ♦ Hypertension or high blood pressure.

The Life Insured must be underwritten as Standard Plus or Standard Non-Smoker class as determined by us from the Issue Date.

If Lifestyle Benefit eligibility as shown in the Policy Schedule page is ‘Yes’, then you are qualified for it. Otherwise this Clause is not applicable to this Policy.

Prior to the end of Policy Year 3 (after Policy Year 1), the qualified Life Insured may provide a prescribed form and relevant medical reports, at your own expense, as proof of improved risk factors.

If you’re eligible subject to (i) our underwriting assessment and/or any requirements that we may impose from time to time; and (ii) we confirm your eligibility for Lifestyle Benefit upon receiving your request by the end of Policy Year 3, you’ll receive 1% discount on Insurance Charge for the next 10 years.

We’ll process the Lifestyle Benefit after the relevant Index Segment Maturity Date. We can reject requests submitted earlier than stated in the request form.

14. Loyalty Bonus

The Loyalty Bonus will be added to the current declared rate of the General Account and Index Account.

We'll pay the Loyalty Bonus according to the figures below:

Policy Year	Loyalty Bonus Crediting Rate
11 to Age 121	0.35%

We'll only pay the Loyalty Bonus while the Policy is in force. The Loyalty Bonus expiry date refers to the date when the last Loyalty Bonus is paid out. This is at Age 121 of the Life Insured.

If Loyalty Bonus commencement date falls within an Index Segment, the Loyalty Bonus for that Index Segment will be pro-rated by the number of days from Loyalty Bonus commencement date to Index Segment Maturity Date.

The Loyalty Bonus won't be credited if the Policy Value exceeds the Sum Insured. The Loyalty Bonus expiry date will be adjusted on change of the Life Insured. It will be based on the new Life Insured's Age.

The Loyalty Bonus is not applicable to the calculation of the Guaranteed Minimum Surrender Value.

Policy Loan

You may obtain a loan from us after the first Policy Anniversary. Your loan balance on the application date can't be greater than 75% of the prevailing Cash Value at the date of your loan application. Your loan balance includes the new loan and any existing loans with accrued interest.

We'll terminate the Policy if the total loan balance exceeds 90% of the Cash Value. We can do this any time. We'll pay the Cash Value as if the Policy had been fully surrendered.

We'll release the requested loan amount as soon as we can. We'll still need to comply with our business conditions and our procedures. We'll generally make payment within 90 days of receiving a valid request.

We'll charge interest on the outstanding amount under your Policy Loan. The rate will be set by us from time to time. We'll add any unpaid interest to your Policy Loan.

You can repay the whole or part of the Policy Loan. You'll need to pay the principal together with interest. You can do this at any time. Any Indebtedness will be deducted from amounts payable under your Policy. This includes when a claim is made. Our claim for Indebtedness will have priority over others.

Premiums

(i) Planned Premium

You'll pay the Planned Premium in the Policy Currency and pay by any method we make available. You may choose to make your premium payment via:

- ♦ A lump sum payment; or
- ♦ As a series of multiple premiums, for the period as chosen by you at the point of policy application; subject to a maximum as imposed by us. We reserve the right to refund any premium payment that exceeds the maximum limit.

As long there is sufficient Policy Value in the Policy, you may skip a premium, pay less than Planned Premium, pay more than Planned Premium or discontinue premium payments entirely.

♦ Minimum Initial Premium

You'll need to pay the Minimum Initial Premium on the date your Application is accepted. We won't issue the Policy until we've received the Minimum Initial Premium.

For lump sum payment, the Minimum Initial Premium is 10% of the Planned Premium. For series of multiple premiums, the Minimum Initial Premium is the 1st year's Planned Premium.

The Minimum Initial Premium for lump sum payment will be held in the General Account first until the remaining premium has been received before allocating into the chosen Index Sub-Account(s).

(ii) Unscheduled Premiums

You can make additional Unscheduled Premium payments at any time beyond the total Planned Premium. This Unscheduled Premium will not result in a corresponding increase in Sum Insured and is subject to the maximum amount as determined by us. We can refuse, reduce or limit the number or amount of Unscheduled Premium payments you can make in any Policy Year. You can't make additional Unscheduled Premium payments after the Policy Anniversary falling immediately before the Life Insured turns Age 121. We'll apply your Premium(s) to the Policy Value as soon as practicable.

Charges

The following non-refundable Charges apply to your Policy:

Policy Premium Charge	We'll deduct a Policy Premium Charge from all Premium(s) paid. We'll do this before the Premium is allocated to the General Account and Index Account. You can find the amount of such Charge in the Policy Schedule. <table><tr><th>Policy Year</th><th>Policy Premium Charge (% of each premium paid)</th></tr><tr><td>1</td><td>8.00%</td></tr><tr><td>2</td><td>7.00%</td></tr><tr><td>3</td><td>6.00%</td></tr><tr><td>4</td><td>5.50%</td></tr><tr><td>5</td><td>5.00%</td></tr><tr><td>6</td><td>4.00%</td></tr><tr><td>7</td><td>4.00%</td></tr><tr><td>8</td><td>4.00%</td></tr><tr><td>9</td><td>4.00%</td></tr><tr><td>10</td><td>4.00%</td></tr><tr><td>11+</td><td>4.00%</td></tr></table>	Policy Year	Policy Premium Charge (% of each premium paid)	1	8.00%	2	7.00%	3	6.00%	4	5.50%	5	5.00%	6	4.00%	7	4.00%	8	4.00%	9	4.00%	10	4.00%	11+	4.00%
Policy Year	Policy Premium Charge (% of each premium paid)																								
1	8.00%																								
2	7.00%																								
3	6.00%																								
4	5.50%																								
5	5.00%																								
6	4.00%																								
7	4.00%																								
8	4.00%																								
9	4.00%																								
10	4.00%																								
11+	4.00%																								
Policy Expense Charge	This Charge will be deducted from the Policy Value: ♦ On the Policy Effective Date for the first payment; and ♦ After that, on each Monthly Anniversary Date. Deductions are made for 15 Policy Years from the Policy Effective Date. The Policy Expense Charge is set by us on the Issue Date.																								
Insurance Charge	This Charge will be deducted from the Policy Value based on the Sum At Risk on: ♦ The Policy Effective Date; and ♦ After that, on each Monthly Anniversary Date until the Life Insured attains Age 121. If the Sum At Risk is zero or less, then no such charge will be deducted. The Sum At Risk is the Sum Insured less the Policy Value. We'll set the rates charged based on the prevailing and relevant mortality risk rates according to the Life Insured's Age at the relevant Monthly Anniversary Date, gender, country of residence and underwriting class of the Life Insured. We can change these rates at any time but will send you a notification at least thirty (30) days prior to the change. The revised rate won't exceed 110% of the rates stated in the Policy Schedule.																								

Partial or Full Surrender

You may surrender the Policy partially or fully by withdrawing from the Policy Value.

Full Surrender	You may ask us for a full surrender of the Policy Value at any time. Before we can arrange a full surrender, you'll need to: ◆ Send us all documents and information required by us, including the return of all Policy documents. ◆ Pay a Surrender Charge during the Surrender Charge Period which will be deducted from the Policy Value.
Partial Surrender	You may also ask us for a partial surrender of your Policy Value. You can do this after the first Policy Anniversary. After each partial surrender we'll reduce the following by the partial surrender amount (including the Surrender Charge): ◆ The Policy Value; and ◆ The Sum Insured. We'll treat any partial surrender as a request for full surrender if it would cause: ◆ The remaining Cash Value to fall below USD 5,000 (or its equivalent in the Policy Currency); or ◆ The Sum Insured to fall below the minimum Sum Insured of USD 250,000 (or its equivalent in the Policy Currency). We'll deduct a partial surrender: ◆ First from the General Account; ◆ Then the Holding Segment(s) proportionately; and ◆ Then proportionately from the Index Segment(s) created under the Index Sub-Account(s). We'll deduct a Surrender Charge if the withdrawal: ◆ Occurs during the Surrender Charge Period; and ◆ Will result in a reduction in Sum Insured. We won't deduct a Surrender Charge if you meet the Surrender Charge Free Withdrawal criteria.

How to surrender	A surrender may be affected by any withdrawal from the Policy Value. This applies to surrenders in part or in full. You must exit from any Guaranteed Interest Rate Lock benefit before any portion of the Policy Value subject to such benefit can be surrendered. You can partially surrender up to the Surrenderable Portion without affecting any applicable No-Lapse Guarantee Benefit. A request for partial or full surrender: ♦ Will take effect on the date we receive the surrender request in the form prescribed by us. ♦ Will only take effect if the amount to be surrendered is equal to or greater than the minimum amount set by us from time to time. ♦ May have payment of proceeds deferred for up to 90 days from the date we receive such request. If the full or partial surrender occurs before the Index Segment Maturity Date, no pro-rated interest will be credited. Please contact your financial advisor to discuss the surrender option available and the associated timing.
Surrender Charge	We'll charge the Surrender Charge for the Surrender Charge Period. Surrender Charge is payable as follows: ♦ Total amount withdrawn from the Policy Value multiplied by the associated Surrender Charge percentage (%) for the Policy Year of the request.
Surrender Charge Free Withdrawal	After the 10th Policy Anniversary, the following applies to the Surrender Charge Free Withdrawals: ♦ The Sum Insured won't be reduced by the Surrender Charge Free Withdrawals ♦ There will be no Surrender Charge applied to the first 6 of such Surrender Charge Free Withdrawals. ♦ Any Surrender Charge Free Withdrawal not fully utilised in any Policy Year can't be carried forward to the next Policy Year. For example, at Policy Year 12, 2.00% of Policy Value was utilised. The remaining 3.00% of Policy Value will not be brought forward to the next Policy Year.

Sample Illustration

The examples below are hypothetical lump sum payment and for illustrative purposes only. In actual circumstances, the Policy Value may go up or down depending on the Crediting Rate earned, Crediting Rate credited and Charges incurred.

Example 1

Partial Surrender **On or Before** 10th Policy Anniversary

You requested for a partial surrender (net of surrender charge) of USD200,000 in Policy Year 5.

At the beginning of Policy Year 5

Sum Insured: USD10,000,000

Policy Value: USD4,000,000

The figures shown below are for illustrative purposes.

Partial Surrender Amount = USD200,000

= Total Withdrawal Amount from Policy Value – Surrender Charge Amount

a	Total Withdrawal Amount from Policy Value	= Partial surrender amount / (1 – Surrender Charge %)
---	---	---

		= USD200,000 / (1 – 16.0%)
		= USD238,095

b	Surrender Charge Amount	= Total withdrawal amount x Surrender Charge %
---	-------------------------	--

		= USD238,095 x 16.0%
		= USD38,095

c	Revised Policy Value	= Policy Value (before partial surrender) – Partial surrender amount – Surrender Charge amount
---	----------------------	---

		= USD4,000,000 – USD200,000 – USD38,095
		= USD3,761,905

d	Revised Sum Insured	= Sum Insured (before partial surrender) – Partial Surrender amount – Surrender Charge amount
---	---------------------	--

		= USD10,000,000 – USD200,000 – USD38,095
		= USD9,761,905

Example 2

Partial Surrender **After** 10th Policy Anniversary

You requested for the following partial surrender (net of surrender charge):

- ♦ USD200,000 in Policy Year 12;
- ♦ USD300,000 in Policy Year 13; and
- ♦ USD500,000 in Policy Year 14.

At the beginning of Policy Year 12

Sum Insured (SI): USD10,000,000

Policy Value (PV): USD5,000,000

The figures shown below are for illustrative purposes.

	Policy Year		
	12	13	14
PV / SI	USD5,000,000 / USD10,000,000	USD4,800,000 / USD10,000,000	USD4,497,759 / USD9,937,759
Partial Surrender Amount	USD200,000 (4% of PV) First 5% of PV, not subject to Surrender Charge	USD300,000 (6.3% of PV), consists of: i) USD240,000 (5% of PV); and ii) USD60,000 (1.3% of PV), subject to Surrender Charge	USD500,000 (11.1% of PV), consists of: i) USD224,888 (5% of PV); and ii) USD275,112 (6.1% of PV), subject to Surrender Charge
a Total Withdrawal	= Partial surrender amount / (1 – Surrender Charge %)		
Amount from Policy Value	No Surrender Charge, thus this is USD200,000	= USD240,000 + USD60,000 / (1 – 3.6%) = USD302,241	= USD224,888 + USD275,112 / (1 – 2.8%) = USD507,925
b Surrender Charge	= Total surrender amount x Surrender Charge %		
Amount	First 5% of PV: No Surrender Charge	i) First 5% of PV: No Surrender Charge ii) Surrender Charge Amount = USD62,241 X 3.6% = USD2,241	i) First 5% of PV: No Surrender Charge ii) Surrender Charge Amount = USD283,037 x 2.8% = USD7,925
c Revised Policy Value	= Policy Value (before partial surrender) – Partial surrender amount – Surrender Charge amount		
	USD5,000,000 – USD200,000 – USD0 = USD4,800,000	USD4,800,000 – USD300,000 – USD2,241 = USD4,497,759	USD4,497,759 – USD500,000 – USD7,925 = USD3,989,834
d Revised Sum Insured	= Sum Insured (before partial surrender) – Partial surrender amount (above 5% of PV for first four surrenders) – Surrender Charge amount		
	USD10,000,000	USD10,000,000 – USD60,000 – USD2,241 = USD9,937,759	USD9,937,759 – USD275,112 – USD7,925 = USD9,654,722

Key Provisions

The following are some provisions found in the Policy General Provisions. This is only a brief summary and you are advised to refer to the actual terms and conditions in the Policy General Provisions. Please consult your financial advisor should you require further explanation.

Exclusions

- ◆ If the Life Insured commits suicide within 1 year from the latest of the Issue Date, Policy Effective Date and the last Reinstatement Date (if any), then the Policy becomes void from that date and we'll cancel it. We'll refund the Premium(s) you've paid without interest less any medical and underwriting expenses incurred in accepting your Application and any amount owing to us.
- ◆ If the replacement life insured commits suicide within 1 year from the latest of the new Issue Date and the last Reinstatement Date (if any), the Policy becomes void from that date and we'll cancel it. We'll refund the Policy Value less any medical and underwriting expenses incurred in accepting your Application and any amount owing to us.
- ◆ We won't pay the Terminal Illness Benefit if the diagnosis of Terminal Illness is in the presence of infection with any Human Immunodeficiency Virus (HIV) infection.

Claims

To make a claim under your Policy, please visit www.hsbclife.com.sg for the claim procedures or contact your financial advisor.

Free-Look Period

You may cancel your Policy within 14 days of receiving it.

We'll consider it received by you within 7 days of sending it to you or your advisor.

If you decide to cancel your Policy, you must:

- ◆ Notify us in writing; and
- ◆ Return the Policy, within the Free-Look Period.

We'll:

- ◆ Refund your Premium without interest; and
- ◆ Deduct medical and underwriting expenses we've incurred in accepting your Application.

Keeping Track of Your Policy

◆ Quarterly Statement and Annual Statement

We will send you statements on a quarterly and annual basis to show you the transactions and balance in your Policy Value for the preceding period since the last such statement. Information such as the Index Segment Maturity Date and instructions on how you could select and submit your preferred Index Segment Maturity options are included.

Change in Sum Insured

You can write to us and ask us to consider increasing or decreasing the Sum Insured. We don't have to agree to your request. If we do agree, we can place any additional terms or conditions on this change. If you'd like to request a change, here are further details:

Request	When you can make this request	Minimum amount of change	Additional obligations
Increasing the Sum Insured	Any time	USD100,000 (or its equivalent in the Policy Currency)	Ask us in writing. Give us: ♦ Evidence of insurability of the Life Insured; and ♦ Fulfilment of such terms and conditions as we may specify. We can change the minimum amount at any time. We'll only process an increase in Sum Insured after the relevant Index Segment Maturity Date. We can reject any requests given to us earlier than the period stated in the request form. You should check the request form before making a request.
Decreasing the Sum Insured	Any time after the first Policy Anniversary	USD100,000 (or its equivalent in the Policy Currency)	Ask us in writing after the first Policy Anniversary. You agree to: ♦ Keep the minimum remaining Sum Insured of USD 250,000 (or its equivalent in the Policy Currency) or such minimum Sum Insured as we decide (we can change the minimum amount at any time); and ♦ Any other additional terms and conditions we set or specify including any maximum cumulative Sum Insured reduction. You may need to pay a charge. We'll deduct the charge first from the General Account, followed by the Holding Segment(s) proportionately and lastly proportionately from the Index Segment(s) under the Index Sub-Account(s). We'll calculate the amount of this charge on the basis of a percentage reduction in the Sum Insured amount applied to the then applicable Surrender Charge as at the date of reduction in the Sum Insured, as set by us.

Termination

Your Policy will terminate on the earliest of:

- ◆ The full payment of Death Benefit;
- ◆ The full surrender of your Policy;
- ◆ When the Benefits are paid in full, unless otherwise stated including any payment triggered by Supplementary Benefits;
- ◆ When a claim under any other supplementary benefit attached to the Policy, which accelerates the Death Benefit in full, is admitted;
- ◆ If your Policy lapses due to insufficient value in both the Policy Value and the Guaranteed Minimum Surrender Value upon the expiry of the Grace Period;
- ◆ Your Policy being rendered void;
- ◆ Any other events which results in termination set out in the Policy;
- ◆ The cancellation of the Policy during the Free-Look Period or at any other time; and
- ◆ Any terminating event described under the relevant clauses of these General Provisions.

Risk of Early Policy Termination

Your Policy may terminate early if:

- ◆ Your Policy Value is insufficient to cover the policy charges and any Indebtedness under your Policy.
This can happen if:
 - (a) actual General Account General Crediting Rates and Index Account Cap Rate and Participation Rate are lower than those shown in your Policy Illustration which is a projection based on prevailing current General Account General Crediting Rates and current assumed Index Account crediting rate at the date of the Policy Illustration; or
 - (b) you increase your current Sum Insured, which will result in the Insurance Charges being higher; or
 - (c) you make Partial Surrenders; or
 - (d) the Insurance Charge increased by us.
- ◆ You have taken a loan on your Policy and the total indebtedness to us under your Policy is 90% or higher of the cash value.

If any of these occur, you should review the funding of your Policy Benefits with the help of an Authorised Intermediary or Representative of HSBC Life (Singapore) Pte. Ltd. and consider whether you need to pay additional premiums to avoid any loss of coverage.

Other Key Risks

Credit and insolvency risks	The product is an insurance policy issued by HSBC. Your benefit is subject to the credit risk of HSBC. Your premiums paid will form part of HSBC's assets. You don't have any rights or ownership over any of those assets. Your recourse is against HSBC only.
Benefits aren't guaranteed	There's uncertainty about how much we'll pay you for the Surrender Amount and Death Benefit. This is because your entitlement to these amounts depends on your Policy Value at that time. The Policy Value increases with interest earned and decreases as policy charges are deducted.
Investment risk for Index Account	The crediting rate applies to the Index Account of each policy. It depends on the actual performance returns of the underlying indices subject to the Floor Rate, Cap Rate (where applicable) and Participation Rate imposed. In the worst case scenario, the crediting rate that applies to the underlying Index Segment(s) is the Index Difference subject to the Floor Rate and then multiplied by the Participation Rate. In the best case scenario, the crediting rate that applies to the underlying Index Segment(s) is the Index Difference subject to the Cap Rate (where applicable) and then multiplied by the Participation Rate. The assumed Cap Rate and Participation Rate information is available in the Policy Illustration and the actual Cap Rate and Participation Rate will be set by us on each Index Segment Initiation Date. The Floor Rate is guaranteed while the Cap Rate (where applicable) and Participation Rate are not guaranteed unless stated otherwise. The Cap Rate and Participation Rate depends on a number of factors including but not limited to: i) the investment return on the underlying portfolio; ii) the cost of derivatives or other financial instrument to support the Index Account; and iii) the long term market outlook. If the investment returns on the underlying portfolio is higher than expected, the Cap Rate and Participation Rate might increase. If the cost of derivative or other financial instrument on the Index Account is higher than expected, the Cap Rate and Participation Rate would reduce. The portfolio factsheet provides more details on the underlying investment strategy.

**Investment risk
for General
Account**

The General Crediting Rate applies to the General Account of each policy. It depends on:

- ◆ The investment returns on the underlying assets supporting the policies; and
- ◆ Other factors such as: the long term future investment returns outlook, claims and surrender experience and expenses.

If long term investment returns are:

- ◆ Better than expected, the General Crediting Rate would increase.
- ◆ Worse than expected, the General Crediting Rate would reduce.

Market and other risk factors may impact investment returns of the assets supporting the policies such as:

- ◆ **Investment risk factors.** Market risk factors may impact Investment returns of the assets supporting the policies such as interest rate risks and credit risk. Interest rate risks where values of assets and interest earnings will be affected by the change of interest rate level and its outlook and any capital gains or losses resulted from asset disposals. Credit risk where the risk of investment losses is due to the default or change in credit standing of counterparties, e.g. bond issuers.
 - ◆ **Claims factor.** The actual experience of mortality and morbidity is uncertain, which may lead to higher than expected cost of providing mortality and living benefits. In this case, the Insurance Charge may be increased and the General Crediting Interest Rate may be reduced.
 - ◆ **Persistency factor.** The actual experience of policy surrender (partial or full) and policy lapse is uncertain, its effect on investment returns can vary depending on the size of any excess amount left behind after settling the surrender payment for the leaving policies.
 - ◆ **Expense factor.** The actual amount of expenses incurred and apportioned to the group of policies may be higher than expected.
-

Risks from the delay or missing the payment of premiums due	If you delay or miss paying your Planned Premiums (if any), then your Policy Value, Death Benefit or Surrender Amount may be lower than expected. It can also lead to policy lapses and a shorter life protection period.
Loss of life protection or Death Benefit	This risk arises if the Cash Value drops to zero or below unless: ♦ The No-Lapse Guarantee Benefit is still in force; or ♦ Additional Unscheduled Premium payments are made to keep the Policy in force.
Risks from Partial Surrender	A Partial Surrender may mean the interest credited is unable to cover the policy charges. If this happens, the Partial Surrender may lead to: ♦ Reduction in Sum Insured; ♦ Policy lapsation due to Cash Value becoming zero or less; and ♦ Shorter life protection period. You may lose the No-Lapse Guarantee Benefit if the Partial Surrender amount isn't drawn from any the Surrenderable Portion of the Policy Value.
Risks from assigning your policy	If your policy is assigned to a lender (i.e. Assignee) as collateral: ♦ You'll be subject to interest rate risk, which may increase costs of servicing the loan and risk of default in repaying the loan. Upon repayment default or failure to repay the loan under the relevant assignment or loan agreement or other facility agreements of similar nature, the Assignee may exercise the right to surrender the policy on your behalf. You may lose the life coverage and other benefits as a result. ♦ We'll pay the Death Benefit or other benefit amount first to the Assignee (unless otherwise advised by the Assignee) and any remaining balance of Death Benefit or other benefit amount to the Policyowner or Beneficiary (as the case may be). ♦ You may also face the risk of policy information and personal data being released to the Assignee.
Inflation risk	Cost of living is likely to be higher in the future due to inflation. So, you may be paid less from the policy in real terms in the future, even if HSBC meets all contractual obligations.
Interest rate risk for Policy Loan (if any)	You'll need to pay interest for your Policy Loan at the prevailing interest rate declared by HSBC. The interest rate may go up or down. If the outstanding loan plus any unpaid interest exceeds 90% of the CashValue, then: ♦ Your policy will be fully surrendered with Cash Value payable after deduction of the outstanding loan, unpaid interest and any surrender charges. ♦ Your life insurance coverage will no longer apply.

Policy currency risk	By choosing currencies other than local currency, you're subject to exchange rate risks. Exchange rates fluctuate. You may suffer a loss of your benefit values and any later premium payments may be higher than your initial premium payment as a result of the exchange rate fluctuations. Authorities may impose exchange controls which adversely affect the exchange rate.
Liquidity risk	This Policy is designed to be held for a long term period. If you have liquidity needs for any unexpected events, you may apply for Partial or Full Surrender. The Policy Values available for surrender may be subjected to Charges, hence amounts will be lower than what you may have expected. It's also subject to the respective policy terms and conditions and may induce other risks.

Other Important Notes

Right of Review

In order to provide the Benefits, we may review and supplement or amend certain clauses of your Policy. These include amendments to:

- (i) Policy related fees and charges; and
- (ii) Remove or substitute an Index.

We may make changes to the Policy if it is reasonably necessary to:

- (i) give effect to:
 - (a) applicable laws, rules, regulations; or
 - (b) a change, recommendation, order, requirement, notice, direction, code, circular or guidance issued by any regulatory, supervisory, governmental, statutory authority, industry association, self-regulatory, or resolution body having jurisdiction over us or a court of competent jurisdiction; or
- (ii) reflect changes to or alignment with:
 - (a) the operational costs, business operations or practices, systems and processes;
 - (b) the industry or prevailing market conditions or practices;
 - (c) the index(es); or
 - (d) our agreement or arrangement with third-party service providers (including but not limited to the licensor of the respective indices).

To the extent reasonably practicable, we will provide you at least 30 days' advance notice in writing before such change takes effect.

If you do not agree with a change, you may, to the extent applicable:

- (i) make a partial or full surrender;
- (ii) terminate the Policy; or
- (iii) change the coverage of your Policy.

The Policy is protected under the Policy Owner's Protection Scheme which is administrated by the Singapore Deposit Insurance Corporation (SDIC). Coverage for your Policy is automatic and no further action is required from you. For more information on the types of benefits that are covered under the scheme as well as the limits of coverage, where applicable, please contact HSBC Life (Singapore) Pte.Ltd. or visit the LIA or SDIC websites (www.lia.org.sg or www.sdic.org.sg).

Glossary

Adjusted Index Segment Balance

The Adjusted Index Segment Balance means on each Index Segment Maturity Date, the Initial Index Segment Balance less amounts deducted between the Index Segment Initiation Date and the Index Segment Maturity Date and Charges, withdrawals, any other charges permitted under this Policy from the Index Segment and TI benefit amount due to a claim. For the purpose of this calculation, each deduction of Monthly Charges (Insurance Charge & Policy Expense Charge) is multiplied by the number of months remaining before the Index Segment Maturity Date after the date of deduction, and the result of it be divided by 12.

Adjusted Index Segment Balance = (A) – (B) – (C) – (D)

(A) = Initial Index Segment Balance

(B) = Amount withdrawn from it together with Surrender Charge (if any)

(C) = applicable Monthly Charges (Insurance Charge & Policy Expense Charge) $\times 1 - \frac{n}{12}$

(D) = TI claim amount deducted from it (if any)

n = number of month of the Index Segment where respective Charges/ deduction/ claim occurs

Automatic Premium Spread

A feature that allows customer to spread the premium to create Index Segments over in the next 12 months. This helps to create a more stable return and reduce risk.

Benefit Payout Period

The period as stated in the Policy Schedule in which we will pay the Death Benefit in instalment under the Death Benefit Instalment Option.

Business Day

A day other than a Saturday, Sunday or public holiday on when insurance companies are open for business in both Singapore and New York, and the NYSE (New York Stock Exchange) is open for trading.

Calendar Day

Any day of the week including a Business Day.

Cap Rate

The maximum rate used to calculate any crediting interest for the applicable Index Segment under the Index Sub-Account(s) on its Index Segment Maturity Date. The actual Cap Rate will only be set by us on each Index Segment Initiation Date and it will not be lower than the minimum Cap Rate as shown in the Policy Schedule(s). We will notify you of the actual Cap Rate for each Index Segment upon each Index Segment creation.

Cash Value

The value acquired by the Policy over time. We'll pay you this amount when you surrender the Policy in accordance with the terms of the General Provisions, less any amount that is due and owing to us.

Crediting Rate

The interest rate credited to part or all of the Policy Value.

Death Benefit

The payment arising under the Policy in the event the Life Insured dies. Any surrenders or policy loans taken prior to the insured event could reduce the Death Benefit.

Death Benefit Instalment Option

The option you have selected at the point of policy application for the Death Benefit to be paid in instalment during the Benefit Payout Period. Only Policyowner who is a natural person may select the Death Benefit Instalment Option as this option will apply as long as the Policyowner remains a natural person.

First Net Premium

The Minimum Initial Premium or such greater amount that is received as the first premium payment for the Policy less the applicable Policy Premium Charge.

Floor Rate

The minimum interest rate used to calculate any crediting interest for the applicable Index Segment on the Index Segment Maturity Date as shown in the relevant Policy Schedule(s).

General Account

An account consisting of two tiers of annualized rates (New Money Crediting Rate and General Crediting Rate) to be credited to the Policy on a daily basis.

General Crediting Rate

Rate of interest credited to the:

- ◆ Value of the General Account (a) upon expiry of any Guaranteed Interest Rate Lock period and (b) in relation to all Premium(s) paid into the Policy other than the First Premium; and
- ◆ Value of the Holding Segment(s).

The General Crediting Rate information in the policy illustration is only for illustration purpose and not guaranteed.

Grace Period

60 days from the date when your Policy Value is less than or equals to zero. We will inform you to pay the amount required (as determined by us) to bring your Policy Value to above zero by sending notice to your latest address held in our records. When the amount is received by us, all the overdue and unpaid charges under this Policy will be deducted immediately. However, if no payment is received by end of the Grace Period, this Policy will automatically terminate.

Guaranteed Interest Rate Lock

The mechanism for guaranteeing a fixed rate of interest during the Guaranteed Interest Rate Lock Period.

Guaranteed Interest Rate Lock Period

A 1 year period shown in the relevant Policy Schedule(s) during which the Guaranteed Interest Rate Lock Rate will apply to the First Net Premium in the General Account only.

Guaranteed Interest Rate Lock Rate

The rate of interest credited to the value of the General Account in respect of the First Net Premium during the Guaranteed Interest Rate Lock Period.

Guaranteed Minimum Crediting Rate

Minimum interest rate used to calculate crediting interest for the General Account. This is shown in the relevant Policy Schedule(s).

Guaranteed Minimum Surrender Value

Guaranteed Minimum Surrender Value is the Policy Value earning an interest of 2.00% p.a. upon Policy surrender regardless of the performance of the General Account and the Index Account.

Holding Segment

The portion of the Index Account which holds amounts allocated into the Index Account until such time where these amounts are designated to the next Index Segment(s) on the applicable Index Segment Initiation Date.

HSBC, we, us or our

HSBC Life (Singapore) Pte. Ltd.

Indebtedness

Any amount that is due and owing to us under the Policy including Charges and the sum of the outstanding amount under the Policy loan (where applicable) and any interest accrued on such outstanding amount.

Index

The stock market or multi-asset index designated by us for the relevant Index Sub-Account(s).

Index Account

An account consisting of Holding Segment(s) and Index Sub-Account(s).

Index Segment

A "1 year" Index Segment is created on each Index Segment Initiation Date, matures on the corresponding Index Segment Maturity Date and ends on the corresponding Index Segment End Date.

Index Segment Balance

The portion of Policy Value formed by each Index Segment as at any date.

Index Segment Cutoff Date

The Index Segment Initiation Date minus 5 Singapore Business Days.

Index Segment End Date

The same day and month of the Index Segment Initiation Date in the next policy year minus one Calendar Day.

Index Segment Initiation Date

The 15th of the month, when an Index Segment commences.

Index Segment Maturity Date

4 Singapore Business Day plus one Calendar Day before the Index Segment End Date.

Index Segment Proceeds

The Index Segment Balance plus any interest credited on the Index Segment Maturity Date.

Index Sub-Account

An Index Sub-Account is made up of one or more Index Segments and the underlying Index. The Index Sub-Account has its own Cap Rate (where applicable) and Participation Rate.

Initial Index Segment Balance

It is the initial amount in the Holding Segment(s) that will be allocated into the next applicable Index Segment immediately before the applicable Index Segment Initiation Date.

Instalment Factor

The factor as stated in the Policy Schedule which is used to calculate the instalment payment for Death Benefit under Death Benefit Instalment Option. This factor is guaranteed.

Insurance Charge

The charge for cost of insurance that will be applied on the Sum at Risk on the Policy Effective Date and thereafter on each Monthly Anniversary Date. If the Sum at Risk is zero or less then no such charge will be deducted. The rate of Insurance Charge will be determined based on the prevailing mortality risk rates according to the Life Insured's age at the relevant Monthly Anniversary Date, gender, country of residence and underwriting class of the Life Insured. This charge is non-guaranteed. Refer to the Section, Charges, for more details.

Issue Date

The date on which we issue the Policy to you. This is stated in the relevant Policy Schedule(s).

Loyalty Bonus

The benefit payable to the Policyowner at the Policy Year 11 to Age 121 while the Policy is in force. This is applicable to the General Account and Index Account.

Minimum Initial Premium

The amount required to put the Policy in force. This amount is part of the Planned Premium, and is shown in the relevant Policy Schedule(s).

Monthly Anniversary Date

The date in each succeeding month corresponding to the Policy Effective Date. If such date doesn't exist, then the last day of that month.

Net Premiums

The gross premiums paid less the applicable Policy Premium Charge.

Net Premium Allocation

The allocation percentage of the Net Premiums for the General Account and Index Account. The allocation (%) is show in the Policy Schedule.

New Money Crediting Rate

The rate of interest credited to the value of the General Account in respect of the First Premium during the Guaranteed Interest Rate Lock Period.

No-Lapse Guarantee Premium

The minimum premium that must be paid to ensure the No-Lapse Guarantee Benefit remains in effect. This amount is part of the Planned Premium and is show in the relevant Policy Schedule(s).

No-Lapse Guarantee Premium Due Date

The latest date for us to receive the No-Lapse Guarantee Premium to ensure the No-Lapse Guarantee Benefit remains in effect.

Participation Rate

The rate used to calculate any crediting interest for the applicable Index Segment under the Index Sub-Account(s) on its Index Segment Maturity Date. The actual Participation Rate will only be set by us on each Index Segment Initiation Date and it will not be lower than the minimum Participation Rate as shown in the Policy Schedule(s). We will notify you of the actual Participation Rate for each Index Segment upon each Index Segment creation.

Planned Premium

The amount to be paid to us in one lump sum or in multiple depending on the amount and period you chose to keep the Policy in force.

Policy Anniversary

The same day and month each year following the Policy Effective Date.

Policy Currency

The currency in which the Policy is denominated. This is shown in the relevant Policy Schedule(s).

Policy Expense Charge

The charge deducted from the Policy Value on the Policy Effective Date for the first payment and, after that, on each Monthly Anniversary Date. Deductions are made for 15 Policy Years from the Policy Effective Date. Refer to the Section, Charges, for more details.

Policy Premium Charge

A Policy Premium Charge from all Premium(s) paid. We'll do this before the Premium is allocated to the General Account and Index Account. Refer to the Section, Charges, for more details.

Policy Value

The amount equivalent to all premiums paid, in both General Account and the Index Account, with interest added less any charges, any partial surrender amounts, the applicable Surrender Charges and any TI Benefit payment paid in accordance with the terms and conditions of the Policy.

Policy Year

The period between 2 consecutive Policy Anniversaries. The period from Issue Date to the first Policy Anniversary is the first Policy Year.

Sum At Risk

The amount by which the specified Sum Insured exceeds Policy Value.

Surrender Charge

The charge payable due to partial or full surrender. The Surrender Charge is a percentage of the Policy Value as shown in the Policy Schedule and / or Policy Illustration.

Surrender Charge Free Withdrawals

Partial surrenders of up to 5.00% of the Policy Value in each Policy Year after the 10th Policy Anniversary. Such surrenders do not reduce the Sum Insured and Surrender Charge will not be applied.

Surrender Charge Period

A Surrender Charge will be applied during the first 15 Policy Years.

Surrenderable Portion

The portion of the Policy Value attributable to the amount of Premium(s) cumulatively paid, over and above the No-Lapse Guarantee Premium, excluding interest credited and all Charges as at the date of the relevant Transaction.

Unscheduled Premium

Additional Unscheduled Premium payments that can be made at any time beyond the Planned Premium payments. These Unscheduled Premium payments will not result in a corresponding increase in Sum Insured, subject to the maximum amount allowed as determined by us. We can refuse, reduce or limit the number or amount of Unscheduled Premium payments you can make in any Policy Year. You can't make additional Unscheduled Premium payments after the Policy Anniversary falling immediately before the Life Insured turns Age 121.

Notice to Client

Buying an insurance plan that is not suitable for you may impact your ability to provide an appropriate solution for your needs. Before buying any insurance plan(s), you can seek advice from our financial adviser and consider whether the plan is suitable for you. Terms not otherwise defined in this acknowledgement page shall bear the meanings ascribed to them in the Product Summary.

Acknowledgement by Client

I have decided to buy the following insurance plan:
HSBC Life Diamond Prestige IUL II

I understand:

- This policy is intended to meet my long-term protection needs and realize potential policy value accumulation for estate, business or wealth planning needs;
- This is a non-participating planned premium universal life plan and an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid;
- There are relative risks and benefits in the respective index(es) available under this policy. The S&P Global Diversified Index and S&P U.S. Tactical Multi-Asset Index were respectively launched in 2024 and 2025 and hence the historical returns used to determine the current assumed crediting rates includes both actual and back-tested data;
- The values shown in the policy illustration document contain guaranteed elements and non-guaranteed elements. Non-guaranteed elements are subject to change and may turn out to be higher or lower:
 - a) The general account crediting rates and respective index sub-account(s) cap rate (where applicable) and participation rate are not guaranteed unless stated otherwise;
 - b) The above mentioned rates and index performance determine the crediting rates;
 - c) The index sub-account(s)' cap rate (where applicable) and participation rate will be determined on each index segment initiation date;
 - d) The actual benefits payable (if any) and coverage are dependent on actual crediting rates and actual charges;
 - The actual crediting rates may be higher or lower and is dependent on actual investment performance and the respective index sub-account(s)' cap rate (where applicable) and participation rate;
 - The actual Insurance Charge may be higher or lower and is dependent on the death benefit relative to the policy value;
- The following scenarios may result in a lower than illustrated policy value and higher insurance charges:
 - a) The actual crediting rates are lower than the current assumed crediting rates;
 - b) Any delay or missed payment of planned premiums;In these scenarios, additional premiums may be required to sustain the policy failing which, the policy may lapse and be terminated earlier which may impact your intended coverage;
- This product does not suit my needs if I do not wish to invest in US dollar currency and am averse to market and interest rate risk.

My financial adviser has explained the values/ key benefits/ information in the following documents to my satisfaction, and I have read all the pages of the following documents and understood the nature, purpose and benefits of the plan:

1. Cover Page and Policy Illustration

2. Product Summary

My financial adviser has explained to me the following:

- Nature and objective of product and how it is suited for my specific needs,
- Features and Benefits of the product, rider(s) and underwriting incentive(s) (if applicable),
- Risks associated with the product,
- 14-day free-look period,
- Contractual rights, warnings, exclusions and disclaimers.

3. Personal Financial Review - a completed copy signed by me

4. Life Insurance Association (LIA) Consumer Disclosure Guides

I have been informed and directed to view or download the following LIA consumer disclosure guides from www.hsbclife.com.sg or www.lia.org.sg:

- (a) Your Guide to Life Insurance
- (b) Your Guide to Health Insurance (if applicable)

Where I have requested to be given a hardcopy of the above documents, these have been provided to me.

This policy is protected under the Policy Owners' Protection Scheme which is administered by the Singapore Deposit Insurance Corporation (SDIC). Coverage for your policy is automatic and no further action is required from you. For more information on the types of benefits that are covered under the scheme as well as the limits of coverage, where applicable, please contact your insurer HSBC Life (Singapore) Pte. Ltd. or visit the LIA or SDIC websites (www.lia.org.sg or www.sdic.org.sg).
