AIA Platinum Indexed Legacy (II)

Product Type	Universal Life Plan
Premium Term	Flexible Premium
Policy Term	Whole Life
<u>Fixed Account</u> Current Crediting Rate	4.30%
<u>Index Account</u> Assumed Current Crediting Rate	S&P 500: 6.25%
Guaranteed Crediting Rate	Fixed Account: • 4.30% on initial premium (for the first 3 years) • 2.00% on subsequent premiums Index Account: 0.00%
Name of Insurer	AIA SINGAPORE PRIVATE LIMITED
Policy Currency	US Dollars

WHAT ARE YOU PURCHASING?

This is a non-participating universal life plan. It is a product which offers you insurance coverage and also invests part of your premiums in the insurer's Non-participating Fund. It comprises guaranteed and non-guaranteed benefits and may not be suitable for you if you want all benefits to be guaranteed.

WHAT ARE THE KEY RISKS OF A UNIVERSAL LIFE PLAN?

By purchasing a universal life plan, your premiums will be pooled together and invested with premiums from other policyholders in the Non-participating Fund managed by AIA SINGAPORE PRIVATE LIMITED. As a policyholder, the key risks commonly associated with universal life plan are:

Investment Risk	Lower than expected investment returns earned by the fund.
Insurance Risks	Higher than expected claims made by policyholders (e.g. due to death or other terminations).
Expense Risks	Higher than expected expenses incurred for managing the Non-participating Fund.
Currency Risk	If your home currency is not denominated in the U.S. Dollars, the payments you make or receive may be worth less over time when expressed in your home currency.

COVER PAGE FOR NON-PARTICIPATING UNIVERSAL LIFE PLAN

These risks can affect the crediting rate to be declared to and the charges to be deducted from the policy, which in turn affect the accumulation value.

Your policy will lapse if the accumulation value is insufficient to pay for the charges, subject to the Minimum Surrender Value. In order to keep your policy in force, you may need to pay additional premium(s).

ARE THE UNIVERSAL LIFE ILLUSTRATED CREDITING RATE GUARANTEED?

The Policy Illustration shows two crediting rates – current and guaranteed crediting rate. Current crediting rate is not guaranteed and may increase or decrease after the guaranteed period, subject to the guaranteed crediting rate as a minimum floor. For the initial premium (Fixed Account), there is a 3-years guaranteed period. The guaranteed crediting rate is guaranteed by the company.

ARE THE UNIVERSAL LIFE ILLUSTRATED CHARGES GUARANTEED?

The Policy Illustration shows two charges – current and maximum charges. Some charges may increase or decrease after the guaranteed period. Should the charges increased from their current level, a larger deduction will be made and this will impact the accumulation value of your policy. We may adjust the charges according to factors such as the expected future claims and expenses. However, the charges will never exceed the maximum level stated in your policy contract.

You may refer to the product summary for the details of the current and maximum charges for the policy.

WHAT RETURNS CAN YOU EXPECT FROM THIS POLICY BASED ON THE ILLUSTRATED CREDITING RATES AND CHARGES?

*Based on the Fixed Account Current Crediting Rate of 4.30% p.a., assumed Index Account Current Crediting rate for the S&P 500 Sub-Account of 6.25% p.a., and current charges, your total Illustrated Yield upon surrender at age 88 is 3.87% p.a.

^Based on the Fixed Account minimum guaranteed crediting rate of 4.30% p.a. on initial premium (for the first 3 years), 2.00% p.a. on subsequent premiums, Index Account minimum floor crediting rate for the S&P 500 Sub-Account of 0.00% p.a., and maximum charges, the policy is projected to have lapsed before age 88.

*Under this scenario, for the Fixed Account, the guaranteed crediting rate is the same as the current crediting rate for a period of three years for initial premium. The illustrations for both Fixed Account and Index Account also include the Guaranteed Special Bonus (if applicable).

^Under this scenario, the applicable illustrated value is the higher of the following:

- (a) based on the guaranteed crediting rate of 2.00% p.a. for the Fixed Account, minimum floor crediting rate of 0.00% p.a. for the Index Account, and maximum charges; and
- (b) based on the Minimum Surrender Value[#], and maximum charges.

[#]Upon request for a full surrender, we will pay the Minimum Surrender Value if it is higher than the Accumulation Values (of the Fixed Account and the Index Account) after deducting the surrender charge. The Minimum Surrender Value is determined using a crediting rate of 2.00% p.a., and after deducting for applicable charges. It does not take into account the actual crediting rates and Guaranteed Special Bonus for the Fixed Account or the Index Account.

The total Illustrated Yields upon surrender have not taken into consideration any additional premiums paid, partial withdrawals made and loans taken. Please refer to the Policy Illustration for assumptions made. The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the minimum guaranteed crediting rate) and charges (subject to the maximum charges) as well as the amounts of any additional premiums paid, partial withdrawals made and loans taken.

Depending upon actual experience, you may need to make additional premiums payment to keep the policy in force.

You can compare 3.87% Illustrated Yields upon surrender at age 88 with the returns of Singapore Savings Bonds and Singapore Government Securities. You may refer to www.mas.gov.sg/bonds-and-bills/singapore-savings-bonds and www.mas.gov.sg/bonds-and-bills/singapore-government-bonds-information-for-individuals for more information on the returns of Singapore Savings Bonds and Singapore Government Securities. Please note that the Illustrated Yields upon surrender at age 88 have taken into account the cost of insurance and expenses incurred.

HOW MUCH WILL YOU NEED TO PAY FOR ADVICE?

The total distribution cost of this product is the amount that you will pay for advice and for other distribution related expenses. It includes cash payments in the form of commissions and benefits paid to the financial advisory firm and its representative(s) who have provided you with financial advice. This is not an additional cost to you as it has been included in the premiums payable for this plan.

The Total Distribution Cost for this plan is \$99,358 as shown in the Policy Illustration. This makes up 19.9% of the total premiums payable.

WHAT HAPPENS IF YOU SURRENDER YOUR POLICY EARLY?

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid.

OTHER IMPORTANT INFORMATION

After purchasing a life insurance policy, you have a 14-day free-look period starting from the day you receive your policy documents to review the documents carefully. During this time, if you choose to cancel your policy, the insurer will refund you the premiums you have paid, less any medical fees and other expenses, such as payments for medical check-ups and medical reports, incurred by the insurer.

PLAN SUMMARY

Plan/Rider		<u>Premium</u>		<u>Coverage</u>	
		Amount (\$)	Term (Years)	Amount (\$)	Term (Years)
<i>Plan</i>					
UI2	AIA Platinum Indexed Legacy (II)	500,000.00	1	3,398,971.00	Whole Life

Based on your selection, AIA Platinum Indexed Legacy (II) allocates the premium you paid after premium charge (referred to as "Net Premium") into two different accounts to grow your policy value:

Initial Account Allocation

- (i) 0% of net premium into the Fixed Account
- (ii) 100% of net premium into the Index Account

Fixed Account

Current Crediting Rate : 4.30% p.a.
Guaranteed Crediting Rate : 4.30% p.a. on initial premium (for the first 3 years) and 2.00% p.a. on subsequent premiums.
Guaranteed Special Bonus payable : 0.35% p.a. starting from policy year 11 until the policy anniversary following the Life Assured's 100th birthday, payable on the Fixed Account.

Index Account

Index Sub-Account	Allocation in Index Account	Minimum Floor Rate	Assumed Current Crediting Rate	Cap Rate
S&P 500	100%	0.00%	6.25% p.a.	9.00%

Guaranteed Special Bonus payable : 0.35% p.a. starting from policy year 11 until the policy anniversary following the Life Assured's 100th birthday, payable on the Index Account (comprising of the Holding Account, Interim Holding Account, and Index Segments).

Scheduled Premium Transfer: Yes **Duration:** 12 months

If Scheduled Premium Transfer is selected, a portion of your premiums will be regularly transferred into Index Segments over the duration you selected. The purpose of the Scheduled Premium Transfer is to ensure stable long-term returns in the Index Account by smoothing out the impact of changes in market conditions. It enables the policy to enjoy returns through a regular savings approach, instead of being fully invested into one single Index Segment.

Note that the Policy Illustration does not illustrate Scheduled Premium Transfer. Instead, it assumes that the premium allocated to the Index Account is fully invested into one single Index Segment at policy inception. The actual effect of Scheduled Premium Transfer can only be appreciated in a volatile market environment, causing the underlying index to rise and fall, thus resulting in varying crediting rates.

Death Benefit Bequest Option: As you have not selected the Death Benefit Bequest Option, you will receive the Death Benefit in one lump sum. This arrangement cannot be changed after the Issue Date.

The assumed current crediting rate for the S&P 500 Index Sub-Account of 6.25% p.a. is based on the historical returns of the underlying index (excluding dividends), with a minimum floor rate of 0.00% (guaranteed), and capped at 9.00% for the S&P 500 Index Sub-Account.

The assumed current crediting rate for the Index Sub-Account is not guaranteed, and is an estimate that is used for illustration purpose. It should not be regarded as an indication or representation of the historical or future performance of the Index Sub-Account.

The cap rate is not guaranteed, and may be revised from one index segment to another. The revision of the cap rate for new segment will be determined before the creation date of the segment. Any revision in cap rate will only apply to new index segments after the revision.

The actual crediting rate for the respective index segments of the Index Sub-Account will only be known at their respective Segment Maturity Dates.

The values in the policy illustration are illustrated assuming the values in the Sub-Account will increase at the respective assumed crediting rate.

Introduction

This Policy Illustration is valid in Singapore and any other jurisdiction where it is not prohibited.

AIA Singapore Private Limited (AIA Singapore) believes that it is important that you fully appreciate the benefits of your policy. You should also understand how the cost of your insurance cover and the expenses of administration and sales affect the benefits that you will receive.

The illustration that follows shows how the value of your policy progresses over time and the sum(s) that would be payable. The methods used to derive the values shown follow guidelines established by the Life Insurance Association, Singapore, to ensure that a fair and consistent approach is used in preparing this illustration.

Please note that your policy illustration provides two sets of illustrated values:

(1) Illustrated values at the minimum guaranteed crediting rate and maximum charges

The crediting rate used in this illustration is a guaranteed minimum that cannot be lowered any further and charges are the maximum chargeable that cannot be increased any further.

(2) Illustrated values at the current crediting rate and current charges

The crediting rate used in this illustration, which does not exceed the rate supportable by underlying asset portfolio, is not guaranteed and may be varied at the company's discretion, subject to the guaranteed minimum. Charges are not guaranteed and may be increased in the future up to the maximum limits.

The crediting rate and charges used are the rate and charges prevailing at the date of this illustration.

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid.

If you need clarification, please do not hesitate to ask your AIA Financial Services Consultant / Insurance Representative.

(ii) illustrated values as determined based on Minimum Surrender Value and current charges. The Minimum Surrender Value is determined using the minimum guaranteed crediting rate of 2.00% p.a. regardless of the actual crediting rate earned by the Fixed Account and Indexed Account, after deducting for the applicable monthly charges, and the surrender charge.

* The Death Benefit illustrated above is before deduction of indebtedness.

Day 1 Cash Value is illustrated to be USD 380,853.

Minimum premium required for the first policy year is USD 457,640.

Based on the Fixed Account minimum guaranteed crediting rate of 4.30% p.a. on initial premium (for the first 3 years), 2.00% p.a. on subsequent premiums, Index Account minimum floor crediting rate for the S&P 500 Sub-Account of 0.00% p.a., and maximum charges, the policy is projected to have lapsed before age 88.

Based on the Fixed Account Current Crediting Rate of 4.30% p.a., assumed Index Account Current Crediting rate for the S&P 500 Sub-Account of 6.25% p.a., and current charges, your total Illustrated Yield upon surrender at age 88 is 3.87% p.a.

The Illustrated Yields upon Surrender based on current crediting rate and current charges is not guaranteed and do not represent the upper and lower limits on the yield you could receive on this policy.

The total Illustrated Yields upon Surrender have not taken into consideration any additional premiums paid, partial withdrawals made and loans taken. The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the minimum guaranteed crediting rate) and actual charges (subject to the maximum charges) as well as the amounts of any additional premiums paid, partial withdrawals made and loans taken.

Please note that the guaranteed benefit you receive upon the surrender of the policy may be less than the total premiums paid.

¹ The higher of:

- (i) Accumulation Value (under the Guaranteed Basis) less surrender charge; or
- (ii) illustrated values as determined based on Minimum Surrender Value and maximum charges. The Minimum Surrender Value is determined using the minimum guaranteed crediting rate of 2.00% p.a. regardless of the actual crediting rate earned by the Fixed Account and Indexed Account, after deducting for the maximum monthly charges, and the surrender charge.

² The higher of:

- (i) Accumulation Value (under the Non-Guaranteed Basis) less surrender charge; or
- (ii) illustrated values as determined based on Minimum Surrender Value and current charges. The Minimum Surrender Value is determined using the minimum guaranteed crediting rate of 2.00% p.a. regardless of the actual crediting rate earned by the Fixed Account and Indexed Account, after deducting for the applicable monthly charges, and the surrender charge.

What do the columns in the table of deductions mean?

- 1. "Value of Premiums Paid To-date" is obtained by accumulating the premiums paid to date at the Illustrated Crediting Rate, assuming the premiums paid can be invested without deduction for the cost of insurance and without any expenses.
- 2. The difference between the "Value of Premiums Paid To-date" and "Surrender Value" represents the "Effect of Deductions To-date". This is the accumulated value of the deductions for the cost of insurance, distribution cost, expenses, surrender charge, expected tax payments, and expected transfers to shareholders (for participating policies).

This table shows the total costs of distribution that AIA Singapore expects to incur in relation to your policy, including the cost of any financial advice provided to you.

TOTAL DISTRIBUTION COST		
End of Policy Year / Age	Total Premiums Paid To-date (\$)	Total Distribution Cost To-date (\$)
1/49	500,000	99,358
2/50	500,000	99,358
3/51	500,000	99,358
4/52	500,000	99,358
5/53	500,000	99,358
6/54	500,000	99,358
7/55	500,000	99,358
8/56	500,000	99,358
9/57	500,000	99,358
10/58	500,000	99,358
15/63	500,000	99,358
20/68	500,000	99,358
25/73	500,000	99,358
30/78	500,000	99,358
35/83	500,000	99,358
40/88	500,000	99,358
52/100	500,000	99,358

1. The Total Distribution Cost To-date is the sum of each year's expected distribution-related costs, without interest. Such costs include cash payments in the form of commission, costs of benefits and services paid to the distribution channel.
2. Please note that the Total Distribution Cost is not an additional cost to you; it has already been allowed for in calculating your premium.
3. You can obtain the Total Distribution Cost of each of the supplementary benefits (if applicable) from your AIA Financial Services Consultant / Insurance Representative.

The Illustrated values in the Supplementary Illustration are determined based on the following rates (per annum):

	Policy Year	Guaranteed Basis	
		Fixed Account	Index Account
Crediting Rate on Initial Premium	Year 1-3	4.30%	0.00%
	Year 4 onwards	2.00%	0.00%
Crediting Rate on Subsequent Premiums (if any)	All years	2.00%	0.00%
Charges*		Maximum Charges	

* Charges refers to Premium Charge, Administrative Charge, and Insurance Risk Charge.

In addition to the above crediting rates, the Guaranteed Special Bonus of 0.35% p.a. will be applied to the Fixed Account and Index Account from Policy Year 11 until the policy anniversary following the Life Assured's 100th birthday.

74/122	500,000	0	0	0	0	0

¹ illustrated values as determined based on Minimum Surrender Value and maximum charges. The Minimum Surrender Value is determined using the minimum guaranteed crediting rate of 2.00% p.a. regardless of the actual crediting rate earned by the Fixed Account and Indexed Account, after deducting for the maximum monthly charges, and the surrender charge.

² The higher of:

- (i) Accumulation Value (under the Guaranteed Basis) less surrender charge; or
- (ii) illustrated values as determined based on Minimum Surrender Value and maximum charges. The Minimum Surrender Value is determined using the minimum guaranteed crediting rate of 2.00% p.a. regardless of the actual crediting rate earned by the Fixed Account and Indexed Account, after deducting for the maximum monthly charges, and the surrender charge.

* The Death Benefit illustrated above is before deduction of indebtedness.

Day 1 Cash Value is illustrated to be USD 380,853.

Minimum premium required for the first policy year is USD 457,640.

This is only a supplementary illustration and must be read in conjunction with the main policy illustration.

Based on the Fixed Account minimum guaranteed crediting rate of 4.30% p.a. on initial premium (for the first 3 years), 2.00% p.a. on subsequent premiums, Index Account minimum floor crediting rate for the S&P 500 Sub-account of 0.00% p.a., maximum charges, and Annual Withdrawals (if any), the policy is projected to have lapsed before age 88.

End of Policy Year / Age	Total Premiums Paid To-date (\$)	Annual Withdrawal (\$)	Non-Guaranteed Basis			
			Illustrated Values at Current Fixed Account Crediting Rate, assumed Index Account Crediting Rate & Current Charges			
			Minimum Surrender Value (\$)¹	Surrender Value (\$)²	Accumulation Value (\$)	Death Benefit (\$)
73/121	500,000	0	0	12,141,094	12,141,094	12141094
74/122	500,000	0	0	12,899,912	12,899,912	12899912

¹ illustrated values as determined based on Minimum Surrender Value and current charges. The Minimum Surrender Value is determined using the minimum guaranteed crediting rate of 2.00% p.a. regardless of the actual crediting rate earned by the Fixed Account and Indexed Account, after deducting for the applicable monthly charges, and the surrender charge.

² The higher of:

- (i) Accumulation Value (under the Non-Guaranteed Basis) less surrender charge; or
- (ii) illustrated values as determined based on Minimum Surrender Value and current charges. The Minimum Surrender Value is determined using the minimum guaranteed crediting rate of 2.00% p.a. regardless of the actual crediting rate earned by the Fixed Account and Indexed Account, after deducting for the applicable monthly charges, and the surrender charge.

This is only a supplementary illustration and must be read in conjunction with the main policy illustration.

Based on the Fixed Account current crediting rate of 4.30% p.a., assumed Index Account current crediting rate for the S&P 500 Sub-account of 6.25% p.a., current charges, and Annual Withdrawals (if any), your total Illustrated Yield upon surrender at age 88 is 3.87% p.a.

Explanatory Notes to Policy Illustration:

Fixed Account

This account credits crediting rate as declared by AIA Singapore on monthly basis. The crediting rate declared, subject to minimum guaranteed fixed account crediting rate, may be higher or lower depending on future investment performance.

Index Account

This account provides the opportunity to grow policy value through participation in the growth of underlying Indices. Index Account consist of one Holding Account, Interim Holding Account & Index Segments, and the Index Sub-account. Premium allocated into Index Account will be first kept in the Holding Account (earns the same crediting rate as Fixed Account) and subsequently allocated into the S&P 500 Index sub-account.

The Index sub-account has up to 12 Index Segments. Interest of the Index Sub-account is credited into Index Account annually using annual point-to-point strategy that compares the start and end date values of their respective segment over a one-year period to determine the percentage of change in the index. If the result is positive, your account value may be credited with index interest. If the result is negative, your account value is protected by the guaranteed floor.

Index Segment

Index Segments are components of the index account to which net premiums are allocated. There are up to 12 Index Segments, which begin on 12th of every month and run for a calendar year and matures on the 11th of the month on the following year. The value of an index account is the sum of its segment values and any amount pending application to that segment.

Cap Rate

Cap Rate is the maximum rate used to determine how much excess index interest that we will credit the index accounts. It may increase or decrease at the end of each segment period but will never be less than the Floor Rate. Current cap rate is not guaranteed and may be varied at the Company's discretion, subject to the minimum cap rate.

Floor Rate

Floor rate is the minimum guaranteed crediting rate of Index Account which protects the policy from negative index performance.

Crediting Rate

The actual crediting rate applicable to your Policy may be different from the crediting rate shown in the Policy Illustration. Cap rate and floor rate will affect the actual crediting rate. Below are the reference historical returns of S&P 500 Index Sub-Account (excluding dividends) with floor rate of 0%, minimum and current cap rate.

	Minimum	Current
Cap Rate	3.00%	9.00%
Historical Return	2.00% p.a.	6.25% p.a.

You may request your AIA Financial Services Consultant / Insurance Representative to provide a supplementary illustration based on the minimum cap rate by referencing to the historical return above.

The rate used is purely for illustrative purpose – the actual crediting rate, subject to the Minimum Guaranteed Crediting Rate, may be higher or lower depending on the timing of the Initial Premium payment and subsequent premium payments.

The crediting rates for subsequent premium payments may be different from that for the Initial Premium.

Total Premiums Paid to Date

This is the sum of the periodic premium payments you plan to make each year. The timing and amount of premium payments you make after the Initial Premium is flexible. We will continue to deduct the applicable charges even when there is no premium payment made.

Annual Withdrawal

These are the withdrawals that you plan to make from the Policy. The withdrawals are illustrated only in the supplementary illustration, and are based on the Current Crediting Rate and Current charges illustration. Any applicable Partial Withdrawal Charge will be applied accordingly.

Surrender Value

For the main policy illustration, the Surrender Value is the illustrated amount you will receive if you surrender the Policy. This is the illustrated Accumulation Value less any applicable surrender charge. It has been calculated assuming no policy loan and no Annual Withdrawals have been made on your Policy.

For the supplementary illustration, the Surrender Value is the illustrated amount you will receive if you surrender the Policy. This is the illustrated Accumulation Value less any applicable surrender charge. It has been calculated assuming no policy loan has been made on your Policy.

Minimum Surrender Value

We will pay the Minimum Surrender Value at the time of full surrender if the Minimum Surrender Value is higher than the Surrender Value. Minimum Surrender Value is determined using minimum guaranteed crediting rate of 2.0% regardless of the actual crediting rate earned by the Fixed Account and Indexed Account.

Accumulation Value

For the main policy illustration, the illustrated Accumulation Value is the sum of premiums paid and interest earned based on the applicable crediting rates less any charges deducted. It has been calculated assuming no policy loan and no Annual Withdrawals have been made on your Policy.

For the supplementary illustration, the illustrated Accumulation Value is the sum of premiums paid and interest earned based on the applicable crediting rates less any Annual Withdrawals and charges deducted. It has been calculated assuming no policy loan has been made on your Policy.

Death Benefit

For the main policy illustration, the illustrated Death Benefit has been calculated assuming no policy loan and no Annual Withdrawals have been made on your Policy.

For the supplementary illustration, the illustrated Death Benefit has been calculated less any applicable Annual Withdrawals and charges deducted, but assuming no policy loan has been made on your Policy.

The actual Surrender Value, Accumulation Value and Death Benefit are not guaranteed and are dependent on the actual crediting rates and charges, the timing and amount of subsequent premium payments, the timing and amount of withdrawals and policy loans, and changes to your Insured Amount.

Summary of Charges

The charges applicable to your policy are:

1. Premium Charge

The premium charge is applied to the initial premium and any additional premiums as shown in the table below:

Policy Year	Premium Charge Rate (% of premium paid)
1	8.0%
2	8.0%
3	8.0%
4	8.0%
5	8.0%
6	5.0%
7	5.0%
8	5.0%
9+	5.0%

2. Administration Charge (Per US\$1,000 Current Insured Amount)

The administration charge rate varies according to the Insured's age, gender, underwriting risk class, country of residence, and current insured amount banding as at the effective date of each layer and will be deducted from the accumulation value on a monthly basis for 15 years commencing from the effective date of respective layer. A new layer will be created for each increase in current insured amount. The administration charge rate shown in table below is applicable to the first layer only. Please refer to the policy contract for the administration charge rates for subsequent layers.

Policy Year	Administration Charges Rates for the First Layer (Annual)
1 to 15	4.36

3. Partial Withdrawal/ Surrender Charge (Per US\$1,000 Current Insured Amount)

The partial withdrawal/ surrender charge rate varies according to the Insured's gender, country of residence, smoker status, underwriting risk class and attained age as at the effective date of the layer and number of years from the effective date of that layer from which the partial withdrawal is made.

The partial withdrawal/ surrender charge is applicable in the first 15 years from the effective date of each layer, and is applied upon a partial withdrawal, upon a full surrender, as a result of a reduction in the current insured amount, or on termination of the policy if the required premiums are not paid by the expiry of the grace period. A new layer will be created for each increase in current insured amount.

The partial withdrawal/surrender charge rate shown in table below is applicable to the first layer only. Please refer to the policy contract for partial withdrawal/surrender charge rate for subsequent layer.

Policy Year	Partial Withdrawal/ Surrender Charge for First Layer
1	22.870
2	22.870
3	22.870
4	22.870
5	22.870
6	22.870
7	20.580
8	18.300
9	14.870

13	4.570
14	2.290
15	1.140

4. Insurance Risk Charge (IRC)(Per US\$1,000 Sum At Risk)

The applicable IRC rates will be based on the Insured's gender, attained age, country of residence, smoker status, underwriting risk class and any extra charges (if applicable) including but not limited to medical loading and is applied on the sum at risk on a monthly basis. The IRC rates for the first 5 policy years are guaranteed. We reserve the right to increase the IRC up to the maximum IRC charges as specified in table below.

The sum at risk is calculated by deducting the accumulation value (before the IRC deduction is made for the applicable month and after the deduction of administration charge) from the current insured amount before indebtedness.
