

This Cover Page is an important document.

- It highlights the key features and risks of this product and should be read together with the Policy Illustration, Product Summary and Bundled Product Disclosure Document, where applicable.
- It is important to read the Policy Illustration, Product Summary and Bundled Product Disclosure Document, where applicable, before deciding whether to purchase this product. If you do not have a copy of these documents, please contact us at 6737 1221 or your Financial Adviser Representative to ask for them.
- You should not purchase this product if you do not understand or are not comfortable with the risks of this product.

Heirloom (VII)

Product Type	Universal Life Plan
Premium Term	Flexible Premium
Policy Term	Whole Life
Current Crediting Rate	4.20%
Guaranteed Crediting Rate	1.60%
Name of Insurer	Manulife (Singapore) Pte. Ltd.
Policy Currency	US Dollars

WHAT ARE YOU PURCHASING?

This is a non-participating flexible premium universal life plan. It is a product which offers you insurance coverage and also invests part of your premiums in the insurer's Non-participating Fund. It comprises guaranteed and non-guaranteed benefits and may not be suitable for you if you want all benefits to be guaranteed.

WHAT ARE THE KEY RISKS OF A UNIVERSAL LIFE PLAN?

By purchasing a universal life plan, your premiums will be pooled together and invested with premiums from other policyholders in the Non-participating Fund managed by Manulife (Singapore) Pte. Ltd.. As a policyholder, the key risks commonly associated with universal life plan are:

Investment Risks	Lower than expected investment returns earned by the fund.
Insurance Risks	Higher than expected claims made by policyholders (e.g. due to death or other terminations).
Expense Risks	Higher than expected expenses incurred for managing the Non-participating Fund.
Currency Risks	If your home currency is not denominated in the Policy Currency, the payments you make or receive may be worth less over time when expressed in your home currency.

These risks can affect the crediting rate to be declared to and the charges to be deducted from the policy, which in turn affect the accumulation value.

Your policy will lapse if the accumulation value is insufficient to pay for the charges. In order to keep your policy in force, you may need to pay additional premium(s).

ARE THE UNIVERSAL LIFE ILLUSTRATED CREDITING RATES GUARANTEED?

The Policy Illustration shows two crediting rates – current and guaranteed crediting rates. Current crediting rate is not guaranteed and may increase or decrease after the guaranteed period, subject to the guaranteed crediting rate as a minimum floor. The guaranteed crediting rate is guaranteed by the company.

ARE THE UNIVERSAL LIFE ILLUSTRATED CHARGES GUARANTEED?

The Policy Illustration shows two charges – current and maximum charges. Some charges may increase or decrease after the guaranteed period. Should the charges be increased from their current level, a larger deduction will be made and this will impact the accumulation value of your policy. We may adjust the charges according to factors such as the expected future claims and expenses. However, the charges will never exceed the maximum level stated in your Policy Contract.

You may refer to the Product Summary for the details of the current and maximum charges for the policy.

Mrs Customer

Date

UOB

Date

WHAT RETURNS CAN YOU EXPECT FROM THIS POLICY BASED ON THE ILLUSTRATED CREDITING RATES AND CHARGES?

Based on the current crediting rate of 4.20%* per annum (p.a.) and current charges, your total Illustrated Yield upon surrender at age 100 is 2.21% p.a.

Based on the minimum guaranteed crediting rate of 1.60%* p.a. and maximum charges, the policy is projected to have lapsed before age 100.

*Guaranteed crediting rate for the first policy year is equal to the current crediting rate. The illustrations include Guaranteed Loyalty Bonus Crediting Rate (if applicable).

The total Illustrated Yields upon surrender have taken into consideration any additional premiums paid, partial withdrawals made and loans taken. Please refer to the Policy Illustration for assumptions made. The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the minimum guaranteed crediting rate) and charges (subject to the maximum charges) as well as the amounts of any additional premiums paid, partial withdrawals made and loans taken.

Depending upon actual experience, you may need to make additional premiums payment to keep the policy in force.

You can compare 2.21 % Illustrated Yield(s) upon surrender at age 100 with the returns of Singapore Savings Bonds and Singapore Government Securities.

You may refer to <https://www.mas.gov.sg/bonds-and-bills> for more information on the returns of Singapore Savings Bonds and Singapore Government Securities. Please note that the Illustrated Yield(s) upon surrender at age 100 take into account the cost of insurance and expenses incurred.

HOW MUCH WILL YOU NEED TO PAY FOR ADVICE?

The Total Distribution Cost of this product is the amount that you will pay for advice and for other distribution related expenses. It includes cash payments in the form of commissions and benefits paid to the financial advisory firm and its representative(s) who have provided you with financial advice. This is not an additional cost to you as it has been included in the premiums payable for this plan.

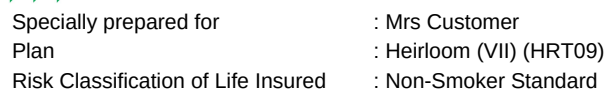

The Total Distribution Cost for this plan is \$1,330,814 as shown in the Policy Illustration. This makes up 12.28% of the total premiums payable.

WHAT HAPPENS IF YOU SURRENDER YOUR POLICY EARLY?

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid.

OTHER IMPORTANT INFORMATION

After purchasing a life insurance policy, you have a 14-day free-look period starting from the day you receive your policy documents to review the documents carefully. During this time, if you choose to cancel your policy, the insurer will refund you the premiums you have paid, less any medical fees and other expenses, such as payments for medical check-ups and medical reports, incurred by the insurer.

Age Last Birthday : 72

Coverage Description	Initial Amount	Initial Premium
Face Amount - Level for all years	US\$20,000,000	US\$10,837,243.00

This policy is protected under the Policy Owners Protection Scheme which is administered by the Singapore Deposit Insurance Corporation (SDIC). Coverage for your policy is automatic and no further action is required from you. For more information on the types of benefits that are covered under the scheme as well as the limits of coverage, where applicable, please contact us or visit the LIA or SDIC web-sites (www.lia.org.sg or www.sdic.org.sg).

The Estimated Policy Issue Date reflects the date when all initial premiums have been received, the policy is issued and the policy begins to be credited with interest. If all premiums are not received by the date selected, the policy values may differ from that which is illustrated in this Policy Illustration.

For policies that are backdated, monthly charges will be effected from the requested Policy Effective Date. We will credit interest to the policy from the Policy Issue Date, regardless of policy backdating, if any. If the policy does not take effect on the date selected, the policy values may differ from that which is illustrated in this Policy Illustration.

The Early Lapse Protection feature ensures that the policy will stay in force provided that the Early Lapse Protection Cumulative Premium Test is met. The Early Lapse Protection period is 5 years from the Policy Effective Date or until there is a change in life insured, whichever is earlier. During the Early Lapse Protection period, if the Net Surrender Value falls to zero or below, coverage will continue if the cumulative premiums paid since the policy was issued, net of withdrawals and any policy debt, are at least equal to the Early Lapse Protection premium, as stated in the Policy Summary, multiplied by the number of years coverage has been in effect. The Early Lapse Protection feature does not protect against a lapse in coverage, should your Policy Debt ever exceed the Policy Value. There is no additional charge for the Early Lapse Protection feature.

Change in the Cost of Insurance and / or Face Amount decreases may cause the cumulative premium requirement to be recalculated, thus affecting the Early Lapse Protection feature.

Acknowledgement:

I confirm that I have received all pages of the Cover Page, Policy Illustration, Product Summary and Bundled Product Disclosure Document, where applicable for the plan.

I understand that the Policy Illustration is intended for illustrative purposes only. I understand that there may be non-guaranteed elements illustrated which may be subject to change. The terms and conditions are specified in the Policy Contract.

The Representative(s) has / have explained the values, key benefits and information in the Cover Page, Policy Illustration, Product Summary and Bundled Product Disclosure Document, where applicable to my satisfaction.

I have also read through all the pages of the Cover Page, Policy Illustration, Product Summary and Bundled Product Disclosure Document, where applicable and understand the benefits of the plan.

The above quotation is valid for two months from the date generated.

Please refer to the main illustration, supplementary illustration and important notes pages for the illustration and explanation on the guaranteed scenario for this policy.

Policy Summary

Country / City of Residence	Singapore	
Residency Code	P	
Death Benefit	Refer to Product Summary	From year 1 to 53
Charges	Current	
Current Crediting Rate	4.20%	
Current Loan Interest Rate	4.25%	
Minimum Initial Premium	US\$56,610.42	
Early Lapse Protection Premium	US\$679,325.04	
Day 1 Surrender Value	US\$8,633,276	
Day 1 Death Benefit	US\$20,000,000	
Guaranteed Loyalty Bonus Crediting Rate	0.35%	From year 11 to 28

If you choose to pay a regular premium or lump sum premiums, the illustrations will be based on the assumption that the Planned Premiums will be paid at the beginning of each policy year.

Planned Premium and Lump Sum premiums are subject to the maximum limit checks. Please refer to Policy Illustration and Supplementary Illustration tables for premium amounts that can be accepted for this policy.

If you take a loan on your policy, the loan amount and borrowed loan interest will be transferred from the Fixed Account to the Loan Account.

The Current Loan Interest Rate indicated above is for illustrative purposes only. The actual Loan Interest Rate applicable will depend on the prevailing Loan Interest Rate at the point when the Loan application is approved. The approved Loan Interest Rate will be applicable for that policy year only. Loan Interest Rate is subject to change in the subsequent policy years.

The Loan Interest Rate Charged on Policy Debt and Loan Interest Rate Credited to the Loan Account illustrated in the Supplementary Illustration "Illustrated values at the guaranteed crediting rate of 1.60% and maximum charges (US\$)" are 15% and 13.75% respectively. The actual Loan Interest Rate(s) applicable may be higher or lower than the rate(s) used in our assumptions.

Please refer to the IMPORTANT NOTES pages for explanation on the Illustrated Crediting Rate.

The figures illustrated under the columns "DEATH BENEFIT", "SURRENDER VALUE" and "ACCUMULATION VALUE" have taken into consideration any additional premiums, partial withdrawals and loans taken (if any) as shown in the Supplementary Illustration.

This policy does not actually have a maturity value as this is a Whole of Life plan.

*Guaranteed crediting rate for the first policy year is equal to the current crediting rate. The illustrations include Guaranteed Loyalty Bonus Crediting Rate (if applicable).

Based on the minimum guaranteed crediting rate of 1.60% p.a. and maximum charges, the policy is projected to have lapsed before age 100.

Based on the current crediting rate of 4.20% p.a. and current charges, your total Illustrated Yield upon surrender at age 100 is 2.21% p.a.

indicates that the policy has lapsed under the illustrated assumption. Additional premium would be required to maintain policy benefits. Please refer to the Supplementary Illustrations for the year of lapse.

35/107	10,837,243	1,330,814
40/112	10,837,243	1,330,814

Please refer to the IMPORTANT NOTES pages for explanation on the Total Distribution Cost.

IMPORTANT NOTES:**Introduction**

Manulife (Singapore) Pte. Ltd. believes that it is important that you fully appreciate the benefits of your policy. You should also understand how the cost of your insurance cover and the expenses of administration and sales affect the benefits that you will receive.

The Policy Illustration shows how the value of your policy progresses over time and the sum(s) that would be payable. The methods used to derive the values shown follow guidelines established by the Life Insurance Association, Singapore, to ensure that a fair and consistent approach is used in preparing this Policy Illustration.

Please note that your Policy Illustration provides two sets of illustrated values:

(1) Illustrated values at the guaranteed crediting rate and maximum charges

The crediting rate used in this illustration is a guaranteed minimum that cannot be lowered any further. The Loan Interest Rate Charged on Policy Debt and Loan Interest Rate Credited to the Loan Account used in this illustration (if applicable) are 15% and 13.75% respectively, but the actual Loan Interest Rate(s) may be higher or lower. For all other charges, the maximum chargeable rates are used.

(2) Illustrated values at the current crediting rate and current charges

The crediting rate used in this illustration, which does not exceed the rate supportable by underlying asset portfolio, is not guaranteed and may be varied at the discretion of Manulife (Singapore) Pte. Ltd., subject to the guaranteed minimum. Charges are not guaranteed and may be increased in the future up to the maximum limits. The crediting rate and charges used are the rate and charges prevailing at the date of this illustration. For the avoidance of doubt, the Current Loan Interest Rate (if applicable) as stated in the Policy Summary is for illustrative purposes only. The actual Loan Interest Rate applicable will depend on the prevailing Loan Interest Rate at the point when the Loan application is approved, which may be higher or lower than the rate used in this illustration.

As buying a life insurance policy is a long-term commitment, an early termination of the policy usually involves high costs and the surrender value, if any, that is payable to you may be zero or less than the total premiums paid.

If you need clarification, please do not hesitate to ask your Financial Adviser Representatives.

What is the significance of the Illustrated Crediting Rates and Charges?

The illustrations have been prepared on two sets of assumptions regarding the crediting rate and charges applicable to the policy:

(1) The illustrated values at guaranteed crediting rate of 1.60% p.a.* and maximum charges represent the lower benefit limits of the policy.

(2) The illustrated values at current crediting rate of 4.20% p.a.* and current charges are based on rates and charges prevailing at the date of this illustration.

The actual crediting rate applicable to your policy may be different to those shown in the illustrations, which are used purely for illustrative purposes. The actual rates may be higher or lower depending on future investment performance.

The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the guaranteed crediting rate) and actual charges (subject to the maximum charges) as well as the amounts of any additional premiums, partial withdrawals made and loans taken.

Depending upon actual experience, you may need to make additional premium payments to keep the policy in force.

*Guaranteed crediting rate for the first policy year is equal to the current crediting rate. The illustrations include Guaranteed Loyalty Bonus Crediting Rate (if applicable).

What is the Illustrated Yield upon surrender?

The Illustrated Yields upon surrender represent the annualised investment return you may receive upon the surrender of the policy at the age of 100, net of the cost of insurance and charges, based on the Illustrated Crediting Rates and Charges.

The Illustrated Yields upon surrender based on current crediting rate and current charges is not guaranteed and do not represent the upper and lower limits on the yield you could receive on this policy.

The total Illustrated Yields upon surrender have taken into consideration any additional premiums paid, partial withdrawals made and loans taken. The actual benefits payable (if any) and coverage are not guaranteed and are dependent on the actual crediting rates (subject to the minimum guaranteed crediting rate) and actual charges (subject to the maximum charges) as well as the amounts of any additional premiums paid, partial withdrawals made and loans taken.

Please note that the guaranteed benefit you receive upon the surrender of the policy may be less than the total premiums paid.

What do the columns in the Table of Deductions mean?

1. "Value of Premiums Paid To-Date" is obtained by accumulating the premiums paid to date less any withdrawals at the Illustrated Crediting Rate, assuming the premiums paid can be invested without deduction for the cost of insurance and without any expenses.

2. The difference between the "Value of Premiums Paid To-Date" and "Total Surrender Value" represents the "Effect of Deductions To-Date". This is the accumulated value of the deductions for the distribution costs, expenses, mortality and morbidity costs, surrender penalty, expected transfers to shareholders and expected tax payments.

What does the Total Distribution Cost To-Date column represent?

1. The Total Distribution Cost To-Date is the sum of each year's expected distribution-related costs, without interest. Such costs include cash payments in the form of commission, costs of benefits and services paid to the distribution channel.

2. Please note that the Total Distribution Cost is not an additional cost to you; it has already been allowed for in calculating your premium.

3. You can obtain the Total Distribution Cost of each of the supplementary benefits (if applicable) from your Financial Adviser Representatives.

Product Summary

Details of Product Provider

Manulife (Singapore) Pte. Ltd. (“we”, “our”, “us”) (registration number 198002116D) is the product provider and underwriter for this policy. This policy is distributed through our representatives or appointed distributors only. You may contact us for claims under this policy. Contact details: 8 Cross Street #15-01, Manulife Tower, Singapore 048424 Tel: 67371221, Website: www.manulife.com.sg.

Product Description

Heirloom (VII) is a non-participating universal life policy denominated in US currency that provides life insurance, if sufficient premiums are paid. Premium payments are flexible, subject to the premium requirements and limits. The policy includes an Early Lapse Protection (ELP) feature that guarantees that the policy will not lapse during the ELP period if certain criteria are met. In addition to flexible premiums and a death benefit, Heirloom (VII) also offers growth of Policy Value as well as the availability of loans and withdrawals.

Product Benefits

The following are summary of the product benefits and you are advised to refer to the details and further terms and conditions in the policy contract.

1. Death Benefit

If the life insured dies during the policy term, we will pay the face amount of the policy or the policy value as of the date of death, whichever is higher, less any policy debt.

2. Terminal Illness (TI) Benefit

If the life insured is diagnosed with TI, we will pay the death benefit in a lump sum in advance subject to the limits of compensation below. TI coverage will expire on the policy anniversary immediately after the 99th birthday. TI is defined as an illness, which in the opinion of a medical examiner and if our appointed medical examiner agrees, is likely to lead to death within 12 months from the date of diagnosis.

Limits of Compensation

The maximum total amount we will pay for TI claim(s) for all universal life policies covering the same life insured is US\$2 million. The policy will not terminate on TI if the amount of death benefit is not fully accelerated due to the above limits of compensation. The face amount and policy value will be reduced after the TI claim is paid out.

3. Early Lapse Protection

The Early Lapse Protection (ELP) feature guarantees that the policy will not lapse during the ELP period as long as the ELP Cumulative Premium Test is satisfied, even if the net surrender value (surrender value less any policy debt) is zero or below. The ELP period is 5 years from the policy effective date or until there is a change in life insured, whichever is earlier.

4. Age 100 Advantage

As long as the policy remains in force at age 100 (i.e. the policy anniversary immediately after the life insured's 100th birthday), there will be no further Cost of Insurance (COI) or Face Amount Charge, collectively called the “Monthly Deduction”, and interest will continue to be credited to the policy. Interest on any outstanding loans will also continue to be charged. The insurance benefit payable will be the death benefit less any policy debt.

Note:

- No additional premiums will be allowed at and after age 100 (only loan repayments will be allowed).
- New loans and withdrawals are not allowed at and after age 121.

5. Cash Value Enhancement Option

The Cash Value Enhancement (CVE) option reduces the surrender charge that would normally be charged on a full surrender of the policy; this reduction is applicable for the first 12 policy years. When this option is chosen, a higher premium charge on each premium payment is charged in place of the standard premium charge (please refer to paragraph 12). You must make the decision to add CVE at time of policy application. You cannot revoke your choice once the policy is issued.

6. Quit Smoking Incentive

The Quit Smoking Incentive allows Preferred Smokers and Standard Smokers to be reclassified as Standard Non-Smoker without full medical underwriting, and automatically be charged at Standard Non-Smoker rates for the first 3 policy years.

- If, by the end of policy year 3, the life insured provides satisfactory evidence of having quit smoking for at least 12 consecutive months, then the policy is reclassified as Standard Non-Smoker, and future policy values will continue to reflect Standard Non-Smoker monthly charges.
- If the life insured fails to provide satisfactory evidence of having quit smoking for at least 12 consecutive months, policy values from the 4th policy year onwards will reflect the appropriate Smoker monthly charges.

7. Change of Life Insured Option

The Change of Life Insured option allows you to change the current life insured to another life insured ('new life insured') after 2 years from the policy issue date, subject to the following conditions:

- (a) Acceptance of the new life insured is at our sole discretion and will depend upon the insurability of the new life insured and such other terms and conditions as we shall determine from time to time. Any medical expenses incurred as a result will be fully borne by you;
- (b) If such request is accepted by us, we reserve the right to impose an administrative charge;
- (c) Date of birth of the new life insured must not be later than the policy issue date;
- (d) Insurance coverage on the current life insured (prior to the change) will be terminated on the effective date of change. The following shall take effect immediately from the effective date of change:
 - (i) Early Lapse Protection will be terminated;
 - (ii) Cost of Insurance rates will be based on the new life insured's age, gender, residency code, risk classification and any additional ratings;
 - (iii) Face Amount Charge rates will be based on the new life insured's age as at the policy effective date, gender, residency code and risk classification;
 - (iv) The loyalty bonus expiry date will be re-calculated based on the new life insured's age; and
 - (v) Time periods indicated under suicide and incontestability shall restart from the effective date of change.

Where the owner of this policy is a corporation and this policy was purchased for the purpose of business succession and planning strategy and the current life insured ceases to be employed or otherwise engaged with the owner, then you may request to change the life insured under this policy during the policy term. Where the owner of this policy is an individual, you may make up to 2 changes of life insured during the policy term.

8. Policy Value

Your policy value is equal to the sum of the values in the Fixed Account and the Loan Account.

When you make a premium payment on your policy, a premium charge is deducted. The balance of the premium ("net premium") goes into the Fixed Account. Each month we will deduct the Monthly Deduction from the Fixed Account. Interest at the current interest crediting rate is then applied to the Fixed Account. When a policy loan is taken or when the loan interest charged in any policy year is not fully repaid, an amount equal to the loan or the unpaid loan interest charged ("capitalised interest") will be transferred from the Fixed Account to the Loan Account.

The Fixed Account value is equal to the net premiums paid plus interest credited, plus amounts transferred to it for policy debt repayments, less amounts deducted for the Monthly Deduction and other charges, less amounts transferred from it for policy loan and capitalised interest and less any amounts withdrawn from it.

The Loan Account is equal to the amounts transferred from the Fixed Account for policy loan or capitalised interest, plus Loan Account interest credited and less amounts transferred from it for policy debt repayments.

The following and their compounding effects over time, can positively or negatively affect the growth of your policy value:

- the amount, timing and frequency of your premium payments;
- the rate of interest credited to the Fixed Account;
- the rate of interest charged for a policy loan, and the rate of interest credited to the Loan Account;
- the current Cost of Insurance rates;
- the Face Amount Charge;
- any withdrawal; or
- other actions by you that are not originally illustrated.

It is important to monitor your policy value to ensure that it is sufficient to meet your objectives.

9. Face Amount

The face amount of your policy is the initial amount of life insurance you applied for as stated in your policy contract. You can decrease the face amount of your policy after the first policy year.

Conditions for face amount decreases:

- Minimum face amount decrease is US\$100,000.
- Policy can never be decreased below the US\$500,000 minimum face amount.
- A pro-rata surrender charge applies to face amount decreases made during the surrender charge period.

10. Interest Crediting Rate

Interest is declared by us and credited monthly to the Fixed Account. The minimum guaranteed crediting rate is 1.60% per annum.

A guaranteed loyalty bonus crediting rate will be added to the current crediting rate to calculate the interest for Fixed Account from policy year 11 ("loyalty bonus commencement date") and ends immediately before the policy anniversary after the life insured's 100th birthday ("loyalty bonus expiry date"). The loyalty bonus expiry date will be re-calculated based on the new life insured's age when there is a change in life insured.

The guaranteed loyalty bonus crediting rate is 0.35% per annum.

The loyalty bonus commencement date, loyalty bonus expiry date and guaranteed loyalty bonus crediting rate are shown in the policy schedule page.

11. Policy Premiums

(a) Flexible Premium Payments

You may choose to make a premium payment of any amount and at any time before Age 100, subject to the maximum limits imposed by us. We reserve the right to refund any premium payment which exceeds the maximum limit.

As long as there is sufficient net surrender value in the policy, you may skip a premium, or discontinue premium payments entirely. Additional premiums may be required if actual interest credited is lower than illustrated, if loans or withdrawals are taken or if current COI rates increase.

(b) Minimum Initial Premium

This is the premium amount required to issue the policy and keep the policy in force for the 1st policy month. If the policy is backdated, the minimum premium due and payable will be the minimum initial premium, plus an additional premium amount which is equal to the minimum initial premium multiplied by the number of months backdated.

(c) Planned Premium

The planned premium is the amount you plan to pay, as indicated on the policy illustration. If you choose to pay annually, the planned premiums are due at the beginning of each policy year.

The actual amount and frequency of premium payments will affect the policy value and potentially the death benefit and how long the policy is kept in force.

12. Policy Charges

(a) Premium Charge

A premium charge of 7.00% is charged on each premium paid.

The premium charge for policies electing the Cash Value Enhancement (CVE) option is equal to 8.50% of each premium paid for the first 12 policy years and 7.00% from policy year 13 onwards.

(b) Face Amount Charge

A charge per US\$1,000 of face amount, which is based on issue age, gender, residency code, risk classification and face amount, is deducted monthly for the face amount charge period as shown below.

Issue Age	Face Amount Charge Period
35 and below	First 18 policy years
36 to 54	First 15 policy years
55 and above	First 12 policy years

(c) Cost of Insurance (COI) Charge

A charge per US\$1,000 of net amount at risk is deducted monthly. This charge increases with attained age and varies with gender, risk classification and residency code of the life insured. Any additional ratings is also included. This charge is applicable up to Age 100.

The current COI rates are guaranteed for the first policy year. After the first policy year, the COI rates may increase or decrease. It will however not exceed the maximum COI rate table, listed in the policy contract. Maximum COI rates shown in the policy contract (which are shown before any additional ratings) is 110% of the current COI rates (before any additional ratings) at the launch of this product.

(d) Surrender Charge

A surrender charge will apply when you surrender your policy during the surrender charge period. The surrender charge period is 18 years. The surrender charge varies by issue age, gender, risk classification, residency code and any additional ratings. Pro-rata surrender charge will be applied upon requested face amount decreases and withdrawals that cause face amount decreases.

13. Withdrawals

You may make withdrawals from your policy after the first policy year and while there is a positive net surrender value. Withdrawal can only be requested once per policy month, at a minimum amount of US\$500.

A pro-rata surrender charge will be assessed for withdrawals taken during the surrender charge period, on the amount of the withdrawal that exceeds the penalty free withdrawal limit. Your policy's face amount will also be reduced by the amount of the withdrawal that exceeds the penalty free withdrawal limit.

Penalty Free Withdrawal Limit

Equals to 5% of the policy value as at the policy anniversary immediately before the policy year less any withdrawals made in the current policy year. Penalty free withdrawal is available from the 11th policy year onwards. If the penalty free withdrawal limit is not fully utilised in any policy year, the balance will not be carried forward to the next policy year.

14. Policy Loan

You may apply for a loan and the available loan value on any date is 90% of the surrender value, less any policy debt, subject to our discretion. The available loan value will be determined as at the end of the business day on which the loan application is received by us.

The interest rate charged on policy loan is variable. We set this rate each year at your policy anniversary and it does not change during the policy year. We will treat any amounts you pay into this policy as premiums, unless you instruct us to treat such amounts as loan repayments.

We may reject your application for policy loan if your policy is in the grace period.

Key Product Provisions

The following are some provisions found in the policy contract. This is only a brief summary and you are advised to refer to the actual terms and conditions in the policy contract. Please consult your financial adviser representative should you require further explanation.

1. Payment of Premiums

Premium payments are flexible. This means that, subject to our approval and the minimum premium requirement, you may choose the amount and frequency of additional premium payments after paying the minimum premium required to issue the policy.

2. Free Look

You may cancel this policy by writing to us within 14 days after you receive this policy. If you decide to cancel your policy during this period, we will refund your premiums, without interest, less any policy debt and any medical or other expenses, to you. If we send this policy to you by post or email, we will consider it to have been delivered and received by you 7 days after the date of posting.

3. Termination Clause

This policy terminates on the earliest of the following events:

- (a) at the end of the grace period for which we have not received the amount necessary to bring the policy out of default;
- (b) our acceptance of your request to terminate this policy;
- (c) death benefit is fully accelerated on the TI of the life insured; or
- (d) the death of the life insured.

Communications to Policy Owners

You can expect to receive a quarterly and annual statement from us to provide information about the performance of your policy. If this document is not received within one month from the end of the quarter or policy anniversary respectively, please request from your financial representative.

Foreign Currency Risk

This policy is denominated in US\$. You will be exposed to foreign exchange risk should you need to convert from another currency to US\$ for premium payment purposes or convert the US\$ policy proceeds to another currency.

Please also note that any request to convert the US\$ proceeds to another currency is at our sole discretion.

Important Notes:

This product summary is published for general information only and does not take into account the specific investment objectives, financial situation and the particular needs of any specific person. This is not a contract of insurance. You will find full details of the terms, conditions and exclusions of this policy in the policy contract. You will receive the policy contract after we accept your application.

This Policy is protected under the Policy Owners' Protection Scheme which is administered by the Singapore Deposit Insurance Corporation (SDIC). Coverage for your policy is automatic and no further action is required from you. For more information on the types of benefits that are covered under the scheme as well as the limits of coverage, where applicable, please contact us or visit the Life Insurance Association (LIA) or SDIC web-sites (www.lia.org.sg or www.sdic.org.sg).
